Sydney NSW 2000

Dear Mr Forward,

Submission Opposing the Department of Planning and Environment recommendation
- Invincible Extension Project 07_0127 MOD 5 (D490/17)

I object to the proposed modification of the Invincible coal mine. Open-cut coal mining should not recommence in this sensitive part of the Gardens of Stone region. In October 2014 the Commission said that the “highest and best use of the area is for conservation purposes” and that ruling is not changed by the Department of Planning and Environment's (the Department's) recommendation.

It would be inappropriate to reverse the Commission's 2013 and 2014 decisions that had rejected open-cut mining in this 50 hectare area, as well as other areas of public forest. I strongly oppose this Department's recommendation to expand the open-cut area and continue coal production for eight years. As Commissioners' would appreciate, approval of this modification is likely to lead to incremental mine development, and the Department of Planning and Environment is opposed to a series of incremental increases in open-cut coal mining in the Ben Bullen State Forest.

Manildra (Castlereagh Coal) has made the open-cut proposal small (50ha) while at the same time it has applied for access to coal resources in 1,368 hectares around the proposed mine site. Manildra has been granted coal exploration licences Nos. 8618 and 8619 over much of the Ben Bullen State Forest that is of high conservation value. When the modification is read in this context it is obvious that it is not a different proposal from the proposals previously rejected for this mine site.

Coal from Manildra’s open-cut Invincible mine will be more expensive in terms of overall costs, when the environment is taken into account, than coal from existing operating mines that can meet the requirements of Manildra's Bomaderry plant.

Approving Manildra’s 50 hectare open-cut proposal will impose adverse environmental outcomes upon this outstanding natural area. The true cost of damage to the natural environment cannot be compensated by offsets, contrary to the assertions made by the Department.

The Ben Bullen pagoda landscape is unique, irreplaceable and covers a small area of which the woodlands affected by the proposed Invincible open-cut mining operation is a key part. The modification proposal is a key part of the only area where grassy tableland woodlands adjoin pagodas. This woodland is an integral part of this pagoda landscape and its loss will compromise this beautiful pagoda landscape.

The Planning Assessment Commission correctly observed in 2012 and confirmed 2014 that the pagoda landscape consists of the pagodas and woodlands below
them. The pagoda rock features cannot be considered in isolation from the surrounding woodlands that are proposed to be mined. The buffer debate was part of the previous PAC review and determination that refused consent.

Further, ecosystems cannot be replanted after open-cut mining. The proposed biodiversity offsets do not replace the unique Ben Bullen pagoda landscape. The proposed offsets are irrelevant to conservation of this pagoda landscape.

Please uphold the previous decisions of the PAC. No new evidence or Departmental analysis has come forward that could overturn the last PAC determination. Refuse consent for the proposed Invincible mine, modification 5 as the applicant and Department of Planning and Environment have not provided any basis to overturn the past decision regarding these matters.

The Commission may publish my name, location and this submission. Thank you for the opportunity to comment on this mining proposal.

Yours sincerely,

Alison Aldred

Clara Zuleta
Dear Mr Paul Forward, PAC Chair,

Re. Proposed extension of the Invincible Coal Mine

I most strongly object to the proposed extension of the Invincible Coal mine, now owned by the Manildra Group. This extension would destroy part of the incredible country known as the "Gardens of Stone". This area is arguably the most stunning landscape in NSW, with its ancient, fragile, "pagoda" rock formations. It also contains significant Aboriginal sites and is home to many threatened species.

The extension is located within the former Coalpac expansion projects - these were rejected by 2 independent PACs.

Other reasons for my objection:

1) The Invincible Extension Project (IEP) ignores the importance of the pagoda land system and only refers to the pagodas. This serious omission demonstrates no understanding of the conservation values of the western part of Ben Bullen State Forest, as recognised by two PACs, Department of Planning and the Office of Environment.

2) Both PACs recognised the area was part of the unique pagoda land system comprising the pagodas and cliffs, steep slopes and woodlands. The IEP is part of the woodlands adjoining the pagodas - an integral part of the pagoda land system that supports the plants and animals.

3) The IEP would allow destructive open cut mining in part of the Gardens of Stone region. Twice the independent Planning Assessment Commission (PAC) has comprehensively rejected open cut mining for parts of this region, including the IEP land, finding that the area should have “the highest level of protection”.

4) Once open cut mined, the land and its plants and animals are gone. The land cannot restore to its former values and it cannot be rehabilitated.

5) Approval of the IEP will lead to applications for more open-cut mining in the pagoda land system. Shoalhaven Coal, another company associated with the Manildra group, was granted two new exploration licences around the mine in 2016 (Exploration Licences 8168 and 8169) covering 1368 hectares.

6) The IEP would have a big permanent impact for a small amount of nut coal, the primary objective for the modification.

7) The IEP would add ugly open cut mining right beside the Castlereagh highway which is the main road to Gardens of Stone area and the tourism destination of Mudgee area. This will make a particularly uninviting impression on tourists to the area.

8) DPE’s recommendation to approve the IEP will endanger eight threatened species including allowing mining of the habitat for the Squirrel glider and the broad-headed snake.

Yours sincerely,
Daniel Hirschefeld

Dear Mr Forward,

Submission Opposing the Department of Planning and Environment recommendation
- Invincible Extension Project 07_0127 MOD 5 (D490/17)

I object to the proposed modification of the Invincible coal mine. Open-cut coal mining should not recommence in this sensitive part of the Gardens of Stone region. In October 2014 the Commission said that the “highest and best use of the area is for conservation purposes” and that ruling is not changed by the Department of Planning and Environment's (the Department's) recommendation.

It would be inappropriate to reverse the Commission's 2013 and 2014 decisions that had rejected open-cut mining in this 50 hectare area, as well as other areas of public forest. I strongly oppose this Department's recommendation to expand the open-cut area and continue coal production for eight years. As Commissioners' would appreciate, approval of this modification is likely to lead to incremental mine development, and the Department of Planning and Environment is opposed to a series of incremental increases in open-cut coal mining in the Ben Bullen State Forest.

Manildra (Castlereagh Coal) has made the open-cut proposal small (50ha) while at the same time it has applied for access to coal resources in 1,368 hectares around the proposed mine site. Manildra has been granted coal exploration licences Nos. 8618 and 8619 over much of the Ben Bullen State Forest that is of high conservation value. When the modification is read in this context it is obvious that it is not a different proposal from the proposals previously rejected for this mine site.

Coal from Manildra’s open-cut Invincible mine will be more expensive in terms of overall costs, when the environment is taken into account, than coal from existing operating mines that can meet the requirements of Manildra's Bomaderry plant.

Approving Manildra’s 50 hectare open-cut proposal will impose adverse environmental outcomes upon this outstanding natural area. The true cost of damage to the natural environment cannot be compensated by offsets, contrary to the assertions made by the Department.

The Ben Bullen pagoda landscape is unique, irreplaceable and covers a small area of which the woodlands affected by the proposed Invincible open-cut mining operation is a key part. The modification proposal is a key part of the only area where grassy tableland woodlands adjoin pagodas. This woodland is an integral part of this pagoda landscape and its loss will compromise this beautiful pagoda landscape.

The Planning Assessment Commission correctly observed in 2012 and confirmed 2014 that the pagoda landscape consists of the pagodas and woodlands below...
them. The pagoda rock features cannot be considered in isolation from the surrounding woodlands that are proposed to be mined. The buffer debate was part of the previous PAC review and determination that refused consent.

Further, ecosystems cannot be replanted after open-cut mining. The proposed biodiversity offsets do not replace the unique Ben Bullen pagoda landscape. The proposed offsets are irrelevant to conservation of this pagoda landscape.

Please uphold the previous decisions of the PAC. No new evidence or Departmental analysis has come forward that could overturn the last PAC determination. Refuse consent for the proposed Invincible mine, modification 5 as the applicant and Department of Planning and Environment have not provided any basis to overturn the past decision regarding these matters.

The Commission may publish my name, location and this submission. Thank you for the opportunity to comment on this mining proposal.

Yours sincerely,

david hufton

Wednesday, November 29, 2017 - 17:46
Dear Mr Forward

The Gardens of Stone area, near Lithgow, is an incredible landscape that has been in the making for 250 million years. Home to fragile pagoda rock formations, ancient Aboriginal culture and rare and threatened plants and animals, this area has been recognised for its international geological significance and fragile eco-systems.

I object to the proposed extension of the Invincible Coal mine, now owned by the Manildra Group (Castlereagh Coal). The extension is located within the former Coalgac expansion projects which were rejected by two independent Planning Assessment Commissions (PACs) in 2013 and 2014. I strongly object to open-cut mining being approved in this sensitive part of the Gardens of Stone when the 2014 Commission concluded that “the highest and best use of the area is for conservation purposes”. The Commission should uphold its previous decisions.

I object to the Invincible Extension Project (IEP) for the reasons set out below, in summary:

- The IEP ignores the importance of the pagoda land system and only refers to the pagodas. This serious omission demonstrates no understanding of the conservation values of the western part of Ben Bullen State Forest, as recognised by two PACs, Department of Planning and the Office of Environment.

- Both PACs recognised the area was part of the unique pagoda land system comprising the pagodas and cliffs, steeps slopes and woodlands. The IEP is part of the woodlands adjoining the pagodas - an integral part of the pagoda land system that supports the plants and animals.

- The IEP would allow destructive open cut mining in part of the Gardens of Stone region. Twice the independent Planning Assessment Commission (PAC) has comprehensively rejected open cut mining for parts of this region, including the IEP land, finding that the area should have “the highest level of protection”.

- Once open cut mined, the land and its plants and animals are gone. The land cannot restore to its former values and it cannot be rehabilitated.

- Approval of the IEP will lead to applications for more open-cut mining in the pagoda land system. Shoalhaven Coal, another company associated with the Manildra group, was granted two new exploration licences around the mine in 2016 (Exploration Licences 8168 and 8169) covering 1368 hectares.

- The IEP would have a big permanent impact for a small amount of nut coal, the primary objective for the modification.

- The IEP would add ugly open cut mining right beside the Castlereagh highway which is the main road to Gardens of Stone area and the tourism destination of Mudgee area. This will make a particularly uninviting impression on tourists to the area.

- DPE's recommendation to approve the IEP will endanger eight threatened species including allowing mining of the habitat for the Squirrel glider and the broad-headed snake.

We call on the Planning and Assessment Commission to recognise the high conservation values of the Gardens of Stone area and reject the Invincible Extension Project.

Yours Sincerely

David ---

Dear Mr Forward,

Submission Opposing the Department of Planning and Environment recommendation  
- Invincible Extension Project 07_0127 MOD 5 (D490/17)

I object to the proposed modification of the Invincible coal mine. Open-cut coal mining should not recommence in this sensitive part of the Gardens of Stone region. In October 2014 the Commission said that the “highest and best use of the area is for conservation purposes” and that ruling is not changed by the Department of Planning and Environment's (the Department's) recommendation.

It would be inappropriate to reverse the Commission's 2013 and 2014 decisions that had rejected open-cut mining in this 50 hectare area, as well as other areas of public forest. I strongly oppose this Department's recommendation to expand the open-cut area and continue coal production for eight years. As Commissioners' would appreciate, approval of this modification is likely to lead to incremental mine development, and the Department of Planning and Environment is opposed to a series of incremental increases in open-cut coal mining in the Ben Bullen State Forest.

Manildra (Castlereagh Coal) has made the open-cut proposal small (50ha) while at the same time it has applied for access to coal resources in 1,368 hectares around the proposed mine site. Manildra has been granted coal exploration licences Nos. 8618 and 8619 over much of the Ben Bullen State Forest that is of high conservation value. When the modification is read in this context it is obvious that it is not a different proposal from the proposals previously rejected for this mine site.

Coal from Manildra’s open-cut Invincible mine will be more expensive in terms of overall costs, when the environment is taken into account, than coal from existing operating mines that can meet the requirements of Manildra's Bomaderry plant.

Approving Manildra’s 50 hectare open-cut proposal will impose adverse environmental outcomes upon this outstanding natural area. The true cost of damage to the natural environment cannot be compensated by offsets, contrary to the assertions made by the Department.

The Ben Bullen pagoda landscape is unique, irreplaceable and covers a small area of which the woodlands affected by the proposed Invincible open-cut mining operation is a key part. The modification proposal is a key part of the only area where grassy tableland woodlands adjoin pagodas. This woodland is an integral part of this pagoda landscape and its loss will compromise this beautiful pagoda landscape.

The Planning Assessment Commission correctly observed in 2012 and confirmed 2014 that the pagoda landscape consists of the pagodas and woodlands below
them. The pagoda rock features cannot be considered in isolation from the surrounding woodlands that are proposed to be mined. The buffer debate was part of the previous PAC review and determination that refused consent.

Further, ecosystems cannot be replanted after open-cut mining. The proposed biodiversity offsets do not replace the unique Ben Bullen pagoda landscape. The proposed offsets are irrelevant to conservation of this pagoda landscape.

Please uphold the previous decisions of the PAC. No new evidence or Departmental analysis has come forward that could overturn the last PAC determination. Refuse consent for the proposed Invincible mine, modification 5 as the applicant and Department of Planning and Environment have not provided any basis to overturn the past decision regarding these matters.

This is a region of truly unique and beautiful scenery, with its own delicate balance of flora and fauna. When it is gone, we can never replace it.

Not only would the proposed open-cut mine destroy the landscape for all time, but the resulting pollution would cause unspeakable harm to all wildlife, both macroscopic and microscopic, as well.

Please do not allow the potential short-term financial gains of any company to damage this precious environment for eternity.

The Commission may publish my name, location and this submission. Thank you for the opportunity to comment on this mining proposal.

Yours sincerely,

Deborah Burns

It would be inappropriate to reverse the Commission's 2013 and 2014 decisions that had rejected open-cut mining in this 50 hectare area, as well as other areas of public forest. I strongly oppose this Department's recommendation to expand the open-cut area and continue coal production for eight years. As Commissioners' would appreciate, approval of this modification is likely to lead to incremental mine development, and the Department of Planning and Environment is opposed to a series of incremental increases in open-cut coal mining in the Ben Bullen State Forest.

Manildra (Castlereagh Coal) has made the open-cut proposal small (50ha) while at the same time it has applied for access to coal resources in 1,368 hectares around the proposed mine site. Manildra has been granted coal exploration licences Nos. 8618 and 8619 over much of the Ben Bullen State Forest that is of high conservation value. When the modification is read in this context it is obvious that it is not a different proposal from the proposals previously rejected for this mine site.

Coal from Manildra’s open-cut Invincible mine will be more expensive in terms of overall costs, when the environment is taken into account, than coal from existing operating mines that can meet the requirements of Manildra's Bomaderry plant.

Approving Manildra’s 50 hectare open-cut proposal will impose adverse environmental outcomes upon this outstanding natural area. The true cost of damage to the natural environment cannot be compensated by offsets, contrary to the assertions made by the Department.

The Ben Bullen pagoda landscape is unique, irreplaceable and covers a small area of which the woodlands affected by the proposed Invincible open-cut mining operation is a key part. The modification proposal is a key part of the only area where grassy tableland woodlands adjoin pagodas. This woodland is an integral part of this pagoda landscape and its loss will compromise this beautiful pagoda landscape.

The Planning Assessment Commission correctly observed in 2012 and confirmed 2014 that the pagoda landscape consists of the pagodas and woodlands below
them. The pagoda rock features cannot be considered in isolation from the surrounding woodlands that are proposed to be mined. The buffer debate was part of the previous PAC review and determination that refused consent.

Further, ecosystems cannot be replanted after open-cut mining. The proposed biodiversity offsets do not replace the unique Ben Bullen pagoda landscape. The proposed offsets are irrelevant to conservation of this pagoda landscape.

Please uphold the previous decisions of the PAC. No new evidence or Departmental analysis has come forward that could overturn the last PAC determination. Refuse consent for the proposed Invincible mine, modification 5 as the applicant and Department of Planning and Environment have not provided any basis to overturn the past decision regarding these matters.

The Commission may publish my name, location and this submission. Thank you for the opportunity to comment on this mining proposal.

Yours sincerely,
Felicia Shannon

Mr Paul Forward  
Chairperson  
Planning Assessment Commission  
Level 3, 201 Elizabeth Street  
Sydney NSW 2000  

Dear Mr Forward,

Submission Opposing the Department of Planning and Environment recommendation  
- Invincible Extension Project 07_0127 MOD 5 (D490/17)

I object to the proposed modification of the Invincible coal mine. Open-cut coal mining should not recommence in this sensitive part of the Gardens of Stone region. In October 2014 the Commission said that the “highest and best use of the area is for conservation purposes” and that ruling is not changed by the Department of Planning and Environment's (the Department's) recommendation.

It would be inappropriate to reverse the Commission's 2013 and 2014 decisions that had rejected open-cut mining in this 50 hectare area, as well as other areas of public forest. I strongly oppose this Department's recommendation to expand the open-cut area and continue coal production for eight years. As Commissioners' would appreciate, approval of this modification is likely to lead to incremental mine development, and the Department of Planning and Environment is opposed to a series of incremental increases in open-cut coal mining in the Ben Bullen State Forest.

Manildra (Castlereagh Coal) has made the open-cut proposal small (50ha) while at the same time it has applied for access to coal resources in 1,368 hectares around the proposed mine site. Manildra has been granted coal exploration licences Nos. 8618 and 8619 over much of the Ben Bullen State Forest that is of high conservation value. When the modification is read in this context it is obvious that it is not a different proposal from the proposals previously rejected for this mine site.

Coal from Manildra’s open-cut Invincible mine will be more expensive in terms of overall costs, when the environment is taken into account, than coal from existing operating mines that can meet the requirements of Manildra's Bomaderry plant.

Approving Manildra’s 50 hectare open-cut proposal will impose adverse environmental outcomes upon this outstanding natural area. The true cost of damage to the natural environment cannot be compensated by offsets, contrary to the assertions made by the Department.

The Ben Bullen pagoda landscape is unique, irreplaceable and covers a small area of which the woodlands affected by the proposed Invincible open-cut mining operation is a key part. The modification proposal is a key part of the only area where grassy tableland woodlands adjoin pagodas. This woodland is an integral part of this pagoda landscape and its loss will compromise this beautiful pagoda landscape.

The Planning Assessment Commission correctly observed in 2012 and confirmed 2014 that the pagoda landscape consists of the pagodas and woodlands below...
them. The pagoda rock features cannot be considered in isolation from the surrounding woodlands that are proposed to be mined. The buffer debate was part of the previous PAC review and determination that refused consent.

Further, ecosystems cannot be replanted after open-cut mining. The proposed biodiversity offsets do not replace the unique Ben Bullen pagoda landscape. The proposed offsets are irrelevant to conservation of this pagoda landscape.

Please uphold the previous decisions of the PAC. No new evidence or Departmental analysis has come forward that could overturn the last PAC determination. Refuse consent for the proposed Invincible mine, modification 5 as the applicant and Department of Planning and Environment have not provided any basis to overturn the past decision regarding these matters.

The Commission may publish my name, location and this submission. Thank you for the opportunity to comment on this mining proposal.

Yours sincerely,

Gemma Matteson

Wednesday, November 29, 2017 - 18:12
Dear Mr Forward

The Gardens of Stone area, near Lithgow, is an incredible landscape that has been in the making for 250 million years. Home to fragile pagoda rock formations, ancient Aboriginal culture and rare and threatened plants and animals, this area has been recognised for its international geological significance and fragile eco-systems.

I object to the proposed extension of the Invincible Coal mine, now owned by the Manildra Group (Castlereagh Coal). The extension is located within the former Coalpac expansion projects which were rejected by two independent Planning Assessment Commissions (PACs) in 2013 and 2014. I strongly object to open-cut mining being approved in this sensitive part of the Gardens of Stone when the 2014 Commission concluded that “the highest and best use of the area is for conservation purposes”. The Commission should uphold its previous decisions.

I object to the Invincible Extension Project (IEP) for the reasons set out below, in summary:

- The IEP ignores the importance of the pagoda land system and only refers to the pagodas. This serious omission demonstrates no understanding of the conservation values of the western part of Ben Bullen State Forest, as recognised by two PACs, Department of Planning and the Office of Environment.

- Both PACs recognised the area was part of the unique pagoda land system comprising the pagodas and cliffs, steeps slopes and woodlands. The IEP is part of the woodlands adjoining the pagodas - an integral part of the pagoda land system that supports them plants and animals

- The IEP would allow destructive open cut mining in part of the Gardens of Stone region. Twice the independent Planning Assessment Commission (PAC) has comprehensively rejected open cut mining for parts of this region, including the IEP land, finding that the area should have “the highest level of protection”.

- Once open cut mined, the land and its plants and animals are gone. The land cannot restore to its former values and it cannot be rehabilitated

- Approval of the IEP will lead to applications for more open-cut mining in the pagoda land system. Shoalhaven Coal, another company associated with the Manildra group, was granted two new exploration licences around the mine in 2016 (Exploration Licences 8168 and 8169) covering 1368 hectares.

- The IEP would have a big permanent impact for a small amount of nut coal, the primary objective for the modification.

- The IEP would add ugly open cut mining right beside the Castlereagh highway which is the main road to Gardens of Stone area and the tourism destination of Mudgee area. This will make a particularly uninviting impression on tourists to the area.

- DPE’s recommendation to approve the IEP will endanger eight threatened species including allowing mining of the habitat for the Squirrel glider and the broad-headed snake.

We call on the Planning and Assessment Commission to recognise the high conservation values of the Gardens of Stone area and reject the Invincible Extension Project.

Yours Sincerely

Cameron Wilkinson

Home to fragile pagoda rock formations, ancient Aboriginal culture and rare and threatened plants and animals, this area has been recognised for its international geological significance and fragile eco-systems.

I object to the proposed extension of the Invincible Coal mine. The extension is located within the former Coalpac expansion projects which were rejected by two independent Planning Assessment Commissions (PACs) in 2013 and 2014. I strongly object to open-cut mining being approved in this sensitive part of the Gardens of Stone when the 2014 Commission concluded that “the highest and best use of the area is for conservation purposes”. The Commission should uphold its previous decisions.

I object to the Invincible Extension Project (IEP) for the reasons set out below, in summary:

- The IEP ignores the importance of the pagoda land system and only refers to the pagodas. This serious omission demonstrates no understanding of the conservation values of the western part of Ben Bullen State Forest, as recognised by two PACs, Department of Planning and the Office of Environment.

- Both PACs recognised the area was part of the unique pagoda land system comprising the pagodas and cliffs, steeps slopes and woodlands. The IEP is part of the woodlands adjoining the pagodas - an integral part of the pagoda land system that supports the plants and animals

- The IEP would allow destructive open cut mining in part of the Gardens of Stone region. Twice the independent Planning Assessment Commission (PAC) has comprehensively rejected open cut mining for parts of this region, including the IEP land, finding that the area should have “the highest level of protection”.

- Once open cut mined, the land and its plants and animals are gone. The land cannot restore to its former values and it cannot be rehabilitated

- Approval of the IEP will lead to applications for more open-cut mining in the pagoda land system. The mine owners, Manildra group (Castlereagh Coal), were granted two new exploration licences around the mine in 2016 (Exploration Licences 8168 and 8169) covering 1368 hectares.

- The IEP would have a big permanent impact for a small amount of nut coal, the primary objective for the modification.

We call on the Planning and Assessment Commission to recognise the high conservation values of the Gardens of Stone area and reject the Invincible Extension Project.

Yours Sincerely

Simon Williams
Dear Mr Forward

The Gardens of Stone area, near Lithgow, is an incredible landscape that has been in the making for 250 million years. Home to fragile pagoda rock formations, ancient Aboriginal culture and rare and threatened plants and animals, this area has been recognised for its international geological significance and fragile eco-systems.

I object to the proposed extension of the Invincible Coal mine, now owned by the Manildra Group (Castlereagh Coal). The extension is located within the former Coalpac expansion projects which were rejected by two independent Planning Assessment Commissions (PACs) in 2013 and 2014. I strongly object to open-cut mining being approved in this sensitive part of the Gardens of Stone when the 2014 Commission concluded that “the highest and best use of the area is for conservation purposes”. The Commission should uphold its previous decisions.

I object to the Invincible Extension Project (IEP) for the reasons set out below, in summary:

- The IEP ignores the importance of the pagoda land system and only refers to the pagodas. This serious omission demonstrates no understanding of the conservation values of the western part of Ben Bullen State Forest, as recognised by two PACs, Department of Planning and the Office of Environment.

- Both PACs recognised the area was part of the unique pagoda land system comprising the pagodas and cliffs, steeps slopes and woodlands. The IEP is part of the woodlands adjoining the pagodas - an integral part of the pagoda land system that supports the plants and animals

- The IEP would allow destructive open cut mining in part of the Gardens of Stone region. Twice the independent Planning Assessment Commission (PAC) has comprehensively rejected open cut mining for parts of this region, including the IEP land, finding that the area should have “the highest level of protection”.

- Once open cut mined, the land and its plants and animals are gone. The land cannot restore to its former values and it cannot be rehabilitated

- Approval of the IEP will lead to applications for more open-cut mining in the pagoda land system. Shoalhaven Coal, another company associated with the Manildra group, was granted two new exploration licences around the mine in 2016 (Exploration Licences 8168 and 8169) covering 1368 hectares.

- The IEP would have a big permanent impact for a small amount of nut coal, the primary objective for the modification.

- The IEP would add ugly open cut mining right beside the Castlereagh highway which is the main road to Gardens of Stone area and the tourism destination of Mudgee area. This will make a particularly uninviting impression on tourists to the area.

- DPE's recommendation to approve the IEP will endanger eight threatened species including allowing mining of the habitat for the Squirrel glider and the broad-headed snake.

We call on the Planning and Assessment Commission to recognise the high conservation values of the Gardens of Stone area and reject the Invincible Extension Project.

Yours Sincerely

Dear Mr Forward,

Submission Opposing the Department of Planning and Environment recommendation - Invincible Extension Project 07_0127 MOD 5 (D490/17)

I object to the proposed modification of the Invincible coal mine. Open-cut coal mining should not recommence in this sensitive part of the Gardens of Stone region. In October 2014 the Commission said that the “highest and best use of the area is for conservation purposes” and that ruling is not changed by the Department of Planning and Environment's (the Department's) recommendation.

It would be inappropriate to reverse the Commission's 2013 and 2014 decisions that had rejected open-cut mining in this 50 hectare area, as well as other areas of public forest. I strongly oppose this Department's recommendation to expand the open-cut area and continue coal production for eight years. As Commissioners' would appreciate, approval of this modification is likely to lead to incremental mine development, and the Department of Planning and Environment is opposed to a series of incremental increases in open-cut coal mining in the Ben Bullen State Forest.

Manildra (Castlereagh Coal) has made the open-cut proposal small (50ha) while at the same time it has applied for access to coal resources in 1,368 hectares around the proposed mine site. Manildra has been granted coal exploration licences Nos. 8618 and 8619 over much of the Ben Bullen State Forest that is of high conservation value. When the modification is read in this context it is obvious that it is not a different proposal from the proposals previously rejected for this mine site.

Coal from Manildra’s open-cut Invincible mine will be more expensive in terms of overall costs, when the environment is taken into account, than coal from existing operating mines that can meet the requirements of Manildra's Bomaderry plant.

Approving Manildra’s 50 hectare open-cut proposal will impose adverse environmental outcomes upon this outstanding natural area. The true cost of damage to the natural environment cannot be compensated by offsets, contrary to the assertions made by the Department.

The Ben Bullen pagoda landscape is unique, irreplaceable and covers a small area of which the woodlands affected by the proposed Invincible open-cut mining operation is a key part. The modification proposal is a key part of the only area where grassy tableland woodlands adjoin pagodas. This woodland is an integral part of this pagoda landscape and its loss will compromise this beautiful pagoda landscape.

The Planning Assessment Commission correctly observed in 2012 and confirmed 2014 that the pagoda landscape consists of the pagodas and woodlands below...
them. The pagoda rock features cannot be considered in isolation from the surrounding woodlands that are proposed to be mined. The buffer debate was part of the previous PAC review and determination that refused consent.

Further, ecosystems cannot be replanted after open-cut mining. The proposed biodiversity offsets do not replace the unique Ben Bullen pagoda landscape. The proposed offsets are irrelevant to conservation of this pagoda landscape.

Please uphold the previous decisions of the PAC. No new evidence or Departmental analysis has come forward that could overturn the last PAC determination. Refuse consent for the proposed Invincible mine, modification 5 as the applicant and Department of Planning and Environment have not provided any basis to overturn the past decision regarding these matters.

The Commission may publish my name, location and this submission. Thank you for the opportunity to comment on this mining proposal.

Yours sincerely,

john stone

Wednesday, November 29, 2017 - 19:45
Mr Paul Forward  
Chairperson  
Planning Assessment Commission  
Level 3, 201 Elizabeth Street  
Sydney NSW 2000  

Dear Mr Forward,

Submission Opposing the Department of Planning and Environment recommendation  
- Invincible Extension Project 07_0127 MOD 5 (D490/17)

I object to the proposed modification of the Invincible coal mine. Open-cut coal mining should not recommence in this sensitive part of the Gardens of Stone region. In October 2014 the Commission said that the “highest and best use of the area is for conservation purposes” and that ruling is not changed by the Department of Planning and Environment's (the Department's) recommendation.

It would be inappropriate to reverse the Commission's 2013 and 2014 decisions that had rejected open-cut mining in this 50 hectare area, as well as other areas of public forest. I strongly oppose this Department's recommendation to expand the open-cut area and continue coal production for eight years. As Commissioners' would appreciate, approval of this modification is likely to lead to incremental mine development, and the Department of Planning and Environment is opposed to a series of incremental increases in open-cut coal mining in the Ben Bullen State Forest.

Manildra (Castlereagh Coal) has made the open-cut proposal small (50ha) while at the same time it has applied for access to coal resources in 1,368 hectares around the proposed mine site. Manildra has been granted coal exploration licences Nos. 8618 and 8619 over much of the Ben Bullen State Forest that is of high conservation value. When the modification is read in this context it is obvious that it is not a different proposal from the proposals previously rejected for this mine site.

Coal from Manildra’s open-cut Invincible mine will be more expensive in terms of overall costs, when the environment is taken into account, than coal from existing operating mines that can meet the requirements of Manildra's Bomaderry plant.

Approving Manildra’s 50 hectare open-cut proposal will impose adverse environmental outcomes upon this outstanding natural area. The true cost of damage to the natural environment cannot be compensated by offsets, contrary to the assertions made by the Department.

The Ben Bullen pagoda landscape is unique, irreplaceable and covers a small area of which the woodlands affected by the proposed Invincible open-cut mining operation is a key part. The modification proposal is a key part of the only area where grassy tableland woodlands adjoin pagodas. This woodland is an integral part of this pagoda landscape and its loss will compromise this beautiful pagoda landscape.

The Planning Assessment Commission correctly observed in 2012 and confirmed in 2014 that the pagoda landscape consists of the pagodas and woodlands below
them. The pagoda rock features cannot be considered in isolation from the surrounding woodlands that are proposed to be mined. The buffer debate was part of the previous PAC review and determination that refused consent.

Further, ecosystems cannot be replanted after open-cut mining. The proposed biodiversity offsets do not replace the unique Ben Bullen pagoda landscape. The proposed offsets are irrelevant to conservation of this pagoda landscape.

Please uphold the previous decisions of the PAC. No new evidence or Departmental analysis has come forward that could overturn the last PAC determination. Refuse consent for the proposed Invincible mine, modification 5 as the applicant and Department of Planning and Environment have not provided any basis to overturn the past decision regarding these matters.

The Commission may publish my name, location and this submission. Thank you for the opportunity to comment on this mining proposal.

Yours sincerely,

Julie Bailey

Wednesday, November 29, 2017 - 17:46
Dear Mr Forward

The Gardens of Stone area, near Lithgow, is an incredible landscape that has been in the making for 250 million years. Home to fragile pagoda rock formations, ancient Aboriginal culture and rare and threatened plants and animals, this area has been recognised for its international geological significance and fragile eco-systems.

I object to the proposed extension of the Invincible Coal mine, now owned by the Manildra Group (Castlereagh Coal). The extension is located within the former Coalpac expansion projects which were rejected by two independent Planning Assessment Commissions (PACs) in 2013 and 2014. I strongly object to open-cut mining being approved in this sensitive part of the Gardens of Stone when the 2014 Commission concluded that “the highest and best use of the area is for conservation purposes”. The Commission should uphold its previous decisions.

I object to the Invincible Extension Project (IEP) for the reasons set out below, in summary:

- The IEP ignores the importance of the pagoda land system and only refers to the pagodas. This serious omission demonstrates no understanding of the conservation values of the western part of Ben Bullen State Forest, as recognised by two PACs, Department of Planning and the Office of Environment.

- Both PACs recognised the area was part of the unique pagoda land system comprising the pagodas and cliffs, steeps slopes and woodlands. The IEP is part of the woodlands adjoining the pagodas - an integral part of the pagoda land system that supports the plants and animals.

- The IEP would allow destructive open cut mining in part of the Gardens of Stone region. Twice the independent Planning Assessment Commission (PAC) has comprehensively rejected open cut mining for parts of this region, including the IEP land, finding that the area should have “the highest level of protection”.

- Once open cut mined, the land and its plants and animals are gone. The land cannot be restored to its former values and it cannot be rehabilitated.

- Approval of the IEP will lead to applications for more open-cut mining in the pagoda land system. Shoalhaven Coal, another company associated with the Manildra group, was granted two new exploration licences around the mine in 2016 (Exploration Licences 8168 and 8169) covering 1368 hectares.

- The IEP would have a big permanent impact for a small amount of nut coal, the primary objective for the modification.

- The IEP would add ugly open cut mining right beside the Castlereagh Highway which is the main road to Gardens of Stone area and the tourism destination of Mudgee area. This will make a particularly uninviting impression on tourists to the area.

- DPE’s recommendation to approve the IEP will endanger eight threatened species, including allowing mining of the habitat for the Squirrel Glider and the Broad-Headed Snake.

We call on the Planning and Assessment Commission to recognise the high conservation values of the Gardens of Stone area and reject the Invincible Extension Project.

Yours Sincerely

Karen Hising
Dear Mr Forward

The Gardens of Stone area, near Lithgow, is an incredible landscape that has been in the making for 250 million years. Home to fragile pagoda rock formations, ancient Aboriginal culture and rare and threatened plants and animals, this area has been recognised for its international geological significance and fragile eco-systems.

I object to the proposed extension of the Invincible Coal mine, now owned by the Manildra Group (Castlereagh Coal). The extension is located within the former Coalpac expansion projects which were rejected by two independent Planning Assessment Commissions (PACs) in 2013 and 2014. I strongly object to open-cut mining being approved in this sensitive part of the Gardens of Stone when the 2014 Commission concluded that “the highest and best use of the area is for conservation purposes”. The Commission should uphold its previous decisions.

I object to the Invincible Extension Project (IEP) for the reasons set out below, in summary:

- The IEP ignores the importance of the pagoda land system and only refers to the pagodas. This serious omission demonstrates no understanding of the conservation values of the western part of Ben Bullen State Forest, as recognised by two PACs, Department of Planning and the Office of Environment.

- Both PACs recognised the area was part of the unique pagoda land system comprising the pagodas and cliffs, steep slopes and woodlands. The IEP is part of the woodlands adjoining the pagodas - an integral part of the pagoda land system that supports the plants and animals.

- The IEP would allow destructive open cut mining in part of the Gardens of Stone region. Twice the independent Planning Assessment Commission (PAC) has comprehensively rejected open cut mining for parts of this region, including the IEP land, finding that the area should have “the highest level of protection”.

- Once open cut mined, the land and its plants and animals are gone. The land cannot restore to its former values and it cannot be rehabilitated.

- Approval of the IEP will lead to applications for more open-cut mining in the pagoda land system. Shoalhaven Coal, another company associated with the Manildra group, was granted two new exploration licences around the mine in 2016 (Exploration Licences 8168 and 8169) covering 1368 hectares.

- The IEP would have a big permanent impact for a small amount of nut coal, the primary objective for the modification.

- The IEP would add ugly open cut mining right beside the Castlereagh highway which is the main road to Gardens of Stone area and the tourism destination of Mudgee area. This will make a particularly uninviting impression on tourists to the area.

- DPE's recommendation to approve the IEP will endanger eight threatened species including allowing mining of the habitat for the Squirrel glider and the broad-headed snake.

We call on the Planning and Assessment Commission to recognise the high conservation values of the Gardens of Stone area and reject the Invincible Extension Project.

Yours Sincerely

Kelly Watson

Dear Mr Forward,

Submission Opposing the Department of Planning and Environment recommendation  
- Invincible Extension Project 07_0127 MOD 5 (D490/17)

I object to the proposed modification of the Invincible coal mine. Open-cut coal mining should not recommence in this sensitive part of the Gardens of Stone region. In October 2014 the Commission said that the “highest and best use of the area is for conservation purposes” and that ruling is not changed by the Department of Planning and Environment's (the Department's) recommendation.

It would be inappropriate to reverse the Commission's 2013 and 2014 decisions that had rejected open-cut mining in this 50 hectare area, as well as other areas of public forest. I strongly oppose this Department's recommendation to expand the open-cut area and continue coal production for eight years. As Commissioners' would appreciate, approval of this modification is likely to lead to incremental mine development, and the Department of Planning and Environment is opposed to a series of incremental increases in open-cut coal mining in the Ben Bullen State Forest.

Manildra (Castlereagh Coal) has made the open-cut proposal small (50ha) while at the same time it has applied for access to coal resources in 1,368 hectares around the proposed mine site. Manildra has been granted coal exploration licences Nos. 8618 and 8619 over much of the Ben Bullen State Forest that is of high conservation value. When the modification is read in this context it is obvious that it is not a different proposal from the proposals previously rejected for this mine site.

Coal from Manildra’s open-cut Invincible mine will be more expensive in terms of overall costs, when the environment is taken into account, than coal from existing operating mines that can meet the requirements of Manildra's Bomaderry plant.

Approving Manildra’s 50 hectare open-cut proposal will impose adverse environmental outcomes upon this outstanding natural area. The true cost of damage to the natural environment cannot be compensated by offsets, contrary to the assertions made by the Department.

The Ben Bullen pagoda landscape is unique, irreplaceable and covers a small area of which the woodlands affected by the proposed Invincible open-cut mining operation is a key part. The modification proposal is a key part of the only area where grassy tableland woodlands adjoin pagodas. This woodland is an integral part of this pagoda landscape and its loss will compromise this beautiful pagoda landscape.

The Planning Assessment Commission correctly observed in 2012 and confirmed 2014 that the pagoda landscape consists of the pagodas and woodlands below
them. The pagoda rock features cannot be considered in isolation from the surrounding woodlands that are proposed to be mined. The buffer debate was part of the previous PAC review and determination that refused consent.

Further, ecosystems cannot be replanted after open-cut mining. The proposed biodiversity offsets do not replace the unique Ben Bullen pagoda landscape. The proposed offsets are irrelevant to conservation of this pagoda landscape.

Please uphold the previous decisions of the PAC. No new evidence or Departmental analysis has come forward that could overturn the last PAC determination. Refuse consent for the proposed Invincible mine, modification 5 as the applicant and Department of Planning and Environment have not provided any basis to overturn the past decision regarding these matters.

The Commission may publish my name, location and this submission. Thank you for the opportunity to comment on this mining proposal.

Yours sincerely,

Kristene Smith

Dear Mr Forward,

Submission Opposing the Department of Planning and Environment recommendation  
- Invincible Extension Project 07_0127 MOD 5 (D490/17)

I object to the proposed modification of the Invincible coal mine. Open-cut coal mining should not recommence in this sensitive part of the Gardens of Stone region. In October 2014 the Commission said that the “highest and best use of the area is for conservation purposes” and that ruling is not changed by the Department of Planning and Environment's (the Department's) recommendation.

It would be inappropriate to reverse the Commission's 2013 and 2014 decisions that had rejected open-cut mining in this 50 hectare area, as well as other areas of public forest. I strongly oppose this Department's recommendation to expand the open-cut area and continue coal production for eight years. As Commissioners' would appreciate, approval of this modification is likely to lead to incremental mine development, and the Department of Planning and Environment is opposed to a series of incremental increases in open-cut coal mining in the Ben Bullen State Forest.

Manildra (Castlereagh Coal) has made the open-cut proposal small (50ha) while at the same time it has applied for access to coal resources in 1,368 hectares around the proposed mine site. Manildra has been granted coal exploration licences Nos. 8618 and 8619 over much of the Ben Bullen State Forest that is of high conservation value. When the modification is read in this context it is obvious that it is not a different proposal from the proposals previously rejected for this mine site.

Coal from Manildra’s open-cut Invincible mine will be more expensive in terms of overall costs, when the environment is taken into account, than coal from existing operating mines that can meet the requirements of Manildra's Bomaderry plant.

Approving Manildra’s 50 hectare open-cut proposal will impose adverse environmental outcomes upon this outstanding natural area. The true cost of damage to the natural environment cannot be compensated by offsets, contrary to the assertions made by the Department.

The Ben Bullen pagoda landscape is unique, irreplaceable and covers a small area of which the woodlands affected by the proposed Invincible open-cut mining operation is a key part. The modification proposal is a key part of the only area where grassy tableland woodlands adjoin pagodas. This woodland is an integral part of this pagoda landscape and its loss will compromise this beautiful pagoda landscape.

The Planning Assessment Commission correctly observed in 2012 and confirmed 2014 that the pagoda landscape consists of the pagodas and woodlands below...
them. The pagoda rock features cannot be considered in isolation from the surrounding woodlands that are proposed to be mined. The buffer debate was part of the previous PAC review and determination that refused consent.

Further, ecosystems cannot be replanted after open-cut mining. The proposed biodiversity offsets do not replace the unique Ben Bullen pagoda landscape. The proposed offsets are irrelevant to conservation of this pagoda landscape.

Please uphold the previous decisions of the PAC. No new evidence or Departmental analysis has come forward that could overturn the last PAC determination. Refuse consent for the proposed Invincible mine, modification 5 as the applicant and Department of Planning and Environment have not provided any basis to overturn the past decision regarding these matters.

The Commission may publish my name, location and this submission. Thank you for the opportunity to comment on this mining proposal.

Yours sincerely, pauline ahern

Ruth Beckett

Thursday, November 30, 2017 - 04:50
Dear Mr Forward

The Gardens of Stone area, near Lithgow, is an incredible landscape that has been in the making for 250 million years. Home to fragile pagoda rock formations, ancient Aboriginal culture and rare and threatened plants and animals, this area has been recognised for its international geological significance and fragile eco-systems.

I object to the proposed extension of the Invincible Coal mine, now owned by the Manildra Group (Castlereagh Coal). The extension is located within the former Coalpac expansion projects which were rejected by two independent Planning Assessment Commissions (PACs) in 2013 and 2014. I strongly object to open-cut mining being approved in this sensitive part of the Gardens of Stone when the 2014 Commission concluded that “the highest and best use of the area is for conservation purposes”. The Commission should uphold its previous decisions.

I object to the Invincible Extension Project (IEP) for the reasons set out below, in summary:

- The IEP ignores the importance of the pagoda land system and only refers to the pagodas. This serious omission demonstrates no understanding of the conservation values of the western part of Ben Bullen State Forest, as recognised by two PACs, Department of Planning and the Office of Environment.
- Both PACs recognised the area was part of the unique pagoda land system comprising the pagodas and cliffs, steep slopes and woodlands. The IEP is part of the woodlands adjoining the pagodas - an integral part of the pagoda land system that supports the plants and animals
- The IEP would allow destructive open cut mining in part of the Gardens of Stone region. Twice the independent Planning Assessment Commission (PAC) has comprehensively rejected open cut mining for parts of this region, including the IEP land, finding that the area should have “the highest level of protection”.
- Once open cut mined, the land and its plants and animals are gone. The land cannot restore to its former values and it cannot be rehabilitated
- Approval of the IEP will lead to applications for more open-cut mining in the pagoda land system. Shoalhaven Coal, another company associated with the Manildra group, was granted two new exploration licences around the mine in 2016 (Exploration Licences 8168 and 8169) covering 1368 hectares.
- The IEP would have a big permanent impact for a small amount of nut coal, the primary objective for the modification.
- The IEP would add ugly open cut mining right beside the Castlereagh highway which is the main road to Gardens of Stone area and the tourism destination of Mudgee area. This will make a particularly uninviting impression on tourists to the area.
- DPE's recommendation to approve the IEP will endanger eight threatened species including allowing mining of the habitat for the Squirrel glider and the broad-headed snake.

We call on the Planning and Assessment Commission to recognise the high conservation values of the Gardens of Stone area and reject the Invincible Extension Project.

Yours Sincerely

Ruth Bennett

Dear Mr Forward,

Submission Opposing the Department of Planning and Environment recommendation  
- Invincible Extension Project 07_0127 MOD 5 (D490/17)

I object to the proposed modification of the Invincible coal mine. Open-cut coal mining should not recommence in this sensitive part of the Gardens of Stone region. In October 2014 the Commission said that the “highest and best use of the area is for conservation purposes” and that ruling is not changed by the Department of Planning and Environment's (the Department's) recommendation.

It would be inappropriate to reverse the Commission's 2013 and 2014 decisions that had rejected open-cut mining in this 50 hectare area, as well as other areas of public forest. I strongly oppose this Department's recommendation to expand the open-cut area and continue coal production for eight years. As Commissioners' would appreciate, approval of this modification is likely to lead to incremental mine development, and the Department of Planning and Environment is opposed to a series of incremental increases in open-cut coal mining in the Ben Bullen State Forest.

Manildra (Castlereagh Coal) has made the open-cut proposal small (50ha) while at the same time it has applied for access to coal resources in 1,368 hectares around the proposed mine site. Manildra has been granted coal exploration licences Nos. 8618 and 8619 over much of the Ben Bullen State Forest that is of high conservation value. When the modification is read in this context it is obvious that it is not a different proposal from the proposals previously rejected for this mine site.

Coal from Manildra’s open-cut Invincible mine will be more expensive in terms of overall costs, when the environment is taken into account, than coal from existing operating mines that can meet the requirements of Manildra's Bomaderry plant.

Approving Manildra’s 50 hectare open-cut proposal will impose adverse environmental outcomes upon this outstanding natural area. The true cost of damage to the natural environment cannot be compensated by offsets, contrary to the assertions made by the Department.

The Ben Bullen pagoda landscape is unique, irreplaceable and covers a small area of which the woodlands affected by the proposed Invincible open-cut mining operation is a key part. The modification proposal is a key part of the only area where grassy tableland woodlands adjoin pagodas. This woodland is an integral part of this pagoda landscape and its loss will compromise this beautiful pagoda landscape.

The Planning Assessment Commission correctly observed in 2012 and confirmed 2014 that the pagoda landscape consists of the pagodas and woodlands below
them. The pagoda rock features cannot be considered in isolation from the surrounding woodlands that are proposed to be mined. The buffer debate was part of the previous PAC review and determination that refused consent.

Further, ecosystems cannot be replanted after open-cut mining. The proposed biodiversity offsets do not replace the unique Ben Bullen pagoda landscape. The proposed offsets are irrelevant to conservation of this pagoda landscape.

Please uphold the previous decisions of the PAC. No new evidence or Departmental analysis has come forward that could overturn the last PAC determination. Refuse consent for the proposed Invincible mine, modification 5 as the applicant and Department of Planning and Environment have not provided any basis to overturn the past decision regarding these matters.

The Commission may publish my name, location and this submission. Thank you for the opportunity to comment on this mining proposal.

Yours sincerely,

Barbara  Rennert

Refuse consent for the proposed Invincible mine, modification 5 as the applicant and Department of Planning and Environment have not provided any basis to overturn the past decision regarding these matters.

Agree with all of the above. As a regular visior to the Gardens of Stone, have see the outstanding beauty of this area and value ut both for walking and photography. These are fragile landscapes- which have been damaged and undermined- please leave it for "friendlier" purposes which would bring far greater benefits to our communities and bring a wealth beyond this short destructive period of open-cut.

The Commission may publish my name, location and this submission. Thank you for the opportunity to comment on this mining proposal.

Yours sincerely

When the modification is read in this context it is obvious that it is not a different proposal from the proposals previously rejected for this mine site.

Coal from Manildra’s open-cut Invincible mine will be more expensive in terms of overall costs, when the environment is taken into account, than coal from existing operating mines that can meet the requirements of Manildra's Bomaderry plant.

Approving Manildra’s 50 hectare open-cut proposal will impose adverse environmental outcomes upon this outstanding natural area. The true cost of damage to the natural environment cannot be compensated by offsets, contrary to the assertions made by the Department.

The Ben Bullen pagoda landscape is unique, irreplaceable and covers a small area of which the woodlands affected by the proposed Invincible open-cut mining operation is a key part. The modification proposal is a key part of the only area where grassy tableland woodlands adjoin pagodas. This woodland is an integral part of this pagoda landscape and its loss will compromise this beautiful pagoda landscape.

The Planning Assessment Commission correctly observed in 2012 and confirmed 2014 that the pagoda landscape consists of the pagodas and woodlands below
them. The pagoda rock features cannot be considered in isolation from the surrounding woodlands that are proposed to be mined. The buffer debate was part of the previous PAC review and determination that refused consent.

Further, ecosystems cannot be replanted after open-cut mining. The proposed biodiversity offsets do not replace the unique Ben Bullen pagoda landscape. The proposed offsets are irrelevant to conservation of this pagoda landscape.

Please uphold the previous decisions of the PAC. No new evidence or Departmental analysis has come forward that could overturn the last PAC determination. Refuse consent for the proposed Invincible mine, modification 5 as the applicant and Department of Planning and Environment have not provided any basis to overturn the past decision regarding these matters.

The Commission may publish my name, location and this submission. Thank you for the opportunity to comment on this mining proposal.

Yours sincerely,

Carla Johnson

Dear Mr Forward,

Submission Opposing the Department of Planning and Environment recommendation
- Invincible Extension Project 07_0127 MOD 5 (D490/17)

I object to the proposed modification of the Invincible coal mine. Open-cut
coal mining should not recommence in this sensitive part of the Gardens of
Stone region. In October 2014 the Commission said that the “highest and
best use of the area is for conservation purposes” and that ruling is not
changed by the Department of Planning and Environment's (the Department's)
recommendation.

It would be wrong to reverse the Commission's 2013 and 2014 decisions that
had rejected open-cut mining in this 50 hectare area, as well as other areas
of public forest. I oppose the Department's recommendation to expand the
open-cut area and continue coal production for eight. Approval of this
modification is likely to lead to incremental mine development, and the
Department of Planning and Environment is opposed to a series of incremental
increases in open-cut coal mining in the Ben Bullen State Forest.

Manildra (Castlereagh Coal) has made the open-cut proposal small (50ha) while
at the same time it has applied for access to coal resources in 1,368
hectares around the proposed mine site. Manildra has been granted coal
exploration licences Nos. 8618 and 8619 over much of the Ben Bullen State
Forest that is of high conservation value. When the modification is read in
this context it is obvious that it is not a different proposal from the
proposals previously rejected for this mine site.

Coal from Manildra’s open-cut Invincible mine will be more expensive in
terms of overall costs, when the environment is taken into account, than coal
from existing operating mines that can meet the requirements of Manildra's
Bomaderry plant.

Approving Manildra’s 50 hectare open-cut proposal will impose adverse
environmental outcomes upon this outstanding natural area. The true cost of
damage to the natural environment cannot be compensated by offsets, contrary
to the assertions made by the Department.

The Ben Bullen pagoda landscape is unique, irreplaceable and covers a small
area of which the woodlands affected by the proposed Invincible open-cut
mining operation is a key part. The modification proposal is a key part of
the only area where grassy tableland woodlands adjoin pagodas. This woodland
is an integral part of this pagoda landscape and its loss will compromise
this beautiful pagoda landscape.

The Planning Assessment Commission correctly observed in 2012 and confirmed
2014 that the pagoda landscape consists of the pagodas and woodlands below
them. The pagoda rock features cannot be considered in isolation from the
surrounding woodlands that are proposed to be mined. The buffer debate was part of the previous PAC review and determination that refused consent.

Further, ecosystems cannot be replanted after open-cut mining. The proposed biodiversity offsets do not replace the unique Ben Bullen pagoda landscape. The proposed offsets are irrelevant to conservation of this pagoda landscape.

Please uphold the previous decisions of the PAC. No new evidence or Departmental analysis has come forward that could overturn the last PAC determination. Refuse consent for the proposed Invincible mine, modification 5 as the applicant and Department of Planning and Environment have not provided any basis to overturn the past decision regarding these matters.

Dear Mr Forward,

Submission Opposing the Department of Planning and Environment recommendation  
- Invincible Extension Project 07_0127 MOD 5 (D490/17)

I object to the proposed modification of the Invincible coal mine. Open-cut coal mining should not recommence in this sensitive part of the Gardens of Stone region. In October 2014 the Commission said that the “highest and best use of the area is for conservation purposes” and that ruling is not changed by the Department of Planning and Environment's (the Department's) recommendation.

It would be inappropriate to reverse the Commission's 2013 and 2014 decisions that had rejected open-cut mining in this 50 hectare area, as well as other areas of public forest. I strongly oppose this Department's recommendation to expand the open-cut area and continue coal production for eight years. As Commissioners' would appreciate, approval of this modification is likely to lead to incremental mine development, and the Department of Planning and Environment is opposed to a series of incremental increases in open-cut coal mining in the Ben Bullen State Forest.

Manildra (Castlereagh Coal) has made the open-cut proposal small (50ha) while at the same time it has applied for access to coal resources in 1,368 hectares around the proposed mine site. Manildra has been granted coal exploration licences Nos. 8618 and 8619 over much of the Ben Bullen State Forest that is of high conservation value. When the modification is read in this context it is obvious that it is not a different proposal from the proposals previously rejected for this mine site.

Coal from Manildra’s open-cut Invincible mine will be more expensive in terms of overall costs, when the environment is taken into account, than coal from existing operating mines that can meet the requirements of Manildra's Bomaderry plant.

Approving Manildra’s 50 hectare open-cut proposal will impose adverse environmental outcomes upon this outstanding natural area. The true cost of damage to the natural environment cannot be compensated by offsets, contrary to the assertions made by the Department.

The Ben Bullen pagoda landscape is unique, irreplaceable and covers a small area of which the woodlands affected by the proposed Invincible open-cut mining operation is a key part. The modification proposal is a key part of the only area where grassy tableland woodlands adjoin pagodas. This woodland is an integral part of this pagoda landscape and its loss will compromise this beautiful pagoda landscape.

The Planning Assessment Commission correctly observed in 2012 and confirmed 2014 that the pagoda landscape consists of the pagodas and woodlands below
them. The pagoda rock features cannot be considered in isolation from the surrounding woodlands that are proposed to be mined. The buffer debate was part of the previous PAC review and determination that refused consent.

Further, ecosystems cannot be replanted after open-cut mining. The proposed biodiversity offsets do not replace the unique Ben Bullen pagoda landscape. The proposed offsets are irrelevant to conservation of this pagoda landscape.

Please uphold the previous decisions of the PAC. No new evidence or Departmental analysis has come forward that could overturn the last PAC determination. Refuse consent for the proposed Invincible mine, modification 5 as the applicant and Department of Planning and Environment have not provided any basis to overturn the past decision regarding these matters.

The Commission may publish my name, location and this submission. Thank you for the opportunity to comment on this mining proposal. There is too much of our natural and built heritage being destroyed, we have a responsibility to look after our world.

Yours sincerely,
Colleen Turnbull

Dear Mr Forward,

Submission Opposing the Department of Planning and Environment recommendation  
- Invincible Extension Project 07_0127 MOD 5 (D490/17)

I object to the proposed modification of the Invincible coal mine. Open-cut coal mining should not recommence in this sensitive part of the invaluable and irreplaceable Gardens of Stone region. In October 2014 the Commission said that the “highest and best use of the area is for conservation purposes” and that ruling is not changed by the Department of Planning and Environment's (the Department's) recommendation.

It would be inappropriate to reverse the Commission's 2013 and 2014 decisions that had rejected open-cut mining in this 50 hectare area, as well as other areas of public forest. I strongly oppose this Department's recommendation to expand the open-cut area and continue unnecessary coal production for eight years. As Commissioners would appreciate, approval of this modification is likely to lead to incremental mine development, and the Department of Planning and Environment is opposed to a series of incremental increases in open-cut coal mining in the Ben Bullen State Forest.

Manildra (Castlereagh Coal) has made the open-cut proposal small (50ha) while at the same time it has applied for access to coal resources in 1,368 hectares around the proposed mine site. Manildra has been granted coal exploration licences Nos. 8618 and 8619 over much of the Ben Bullen State Forest that is of high conservation value. When the modification is read in this context it is obvious that it is not a different proposal from the proposals previously rejected for this mine site.

Coal from Manildra’s open-cut Invincible mine will be more expensive in terms of overall costs, when the environment is taken into account, than coal from existing operating mines that can meet the requirements of Manildra's Bomaderry plant.

Approving Manildra’s 50 hectare open-cut proposal will impose adverse environmental outcomes upon this outstanding natural area. The true cost of damage to the natural environment cannot be compensated by offsets, contrary to the assertions made by the Department. There can be no offsets when the area under threat is unique in terms of its conservation and scenic values.

The Ben Bullen pagoda landscape is unique, irreplaceable and covers a small area of which the woodlands affected by the proposed Invincible open-cut mining operation is a key part. The modification proposal is a key part of the only area where grassy tableland woodlands adjoin pagodas. This woodland is an integral part of this pagoda landscape and its loss will compromise this beautiful pagoda landscape.

The Planning Assessment Commission correctly observed in 2012 and confirmed
2014 that the pagoda landscape consists of the pagodas and woodlands below them. The pagoda rock features cannot be considered in isolation from the surrounding woodlands that are proposed to be mined. The buffer debate was part of the previous PAC review and determination that refused consent.

Further, ecosystems cannot be replanted after open-cut mining. The proposed biodiversity offsets do not replace the unique Ben Bullen pagoda landscape. The proposed offsets are irrelevant to conservation of this pagoda landscape.

Please uphold the previous decisions of the PAC. No new evidence or Departmental analysis has come forward that could overturn the last PAC determination. Refuse consent for the proposed Invincible mine, modification 5 as the applicant and Department of Planning and Environment have not provided any basis to overturn the past decision regarding these matters.

Dear Mr Forward,

Submission Opposing the Department of Planning and Environment recommendation - Invincible Extension Project 07_0127 MOD 5 (D490/17)

I object to the proposed modification of the Invincible coal mine. Open-cut coal mining should not recommence in this sensitive part of the Gardens of Stone region. In October 2014 the Commission said that the “highest and best use of the area is for conservation purposes” and that ruling is not changed by the Department of Planning and Environment's (the Department's) recommendation.

It would be inappropriate to reverse the Commission’s 2013 and 2014 decisions that had rejected open-cut mining in this 50 hectare area, as well as other areas of public forest. I strongly oppose this Department's recommendation to expand the open-cut area and continue coal production for eight years. As Commissioners' would appreciate, approval of this modification is likely to lead to incremental mine development, and the Department of Planning and Environment is opposed to a series of incremental increases in open-cut coal mining in the Ben Bullen State Forest.

Manildra (Castlereagh Coal) has made the open-cut proposal small (50ha) while at the same time it has applied for access to coal resources in 1,368 hectares around the proposed mine site. Manildra has been granted coal exploration licences Nos. 8618 and 8619 over much of the Ben Bullen State Forest that is of high conservation value. When the modification is read in this context it is obvious that it is not a different proposal from the proposals previously rejected for this mine site.

Coal from Manildra’s open-cut Invincible mine will be more expensive in terms of overall costs, when the environment is taken into account, than coal from existing operating mines that can meet the requirements of Manildra's Bomaderry plant.

Approving Manildra’s 50 hectare open-cut proposal will impose adverse environmental outcomes upon this outstanding natural area. The true cost of damage to the natural environment cannot be compensated by offsets, contrary to the assertions made by the Department.

The Ben Bullen pagoda landscape is unique, irreplaceable and covers a small area of which the woodlands affected by the proposed Invincible open-cut mining operation is a key part. The modification proposal is a key part of the only area where grassy tableland woodlands adjoin pagodas. This woodland is an integral part of this pagoda landscape and its loss will compromise this beautiful pagoda landscape.

The Planning Assessment Commission correctly observed in 2012 and confirmed 2014 that the pagoda landscape consists of the pagodas and woodlands below
them. The pagoda rock features cannot be considered in isolation from the surrounding woodlands that are proposed to be mined. The buffer debate was part of the previous PAC review and determination that refused consent.

Further, ecosystems cannot be replanted after open-cut mining. The proposed biodiversity offsets do not replace the unique Ben Bullen pagoda landscape. The proposed offsets are irrelevant to conservation of this pagoda landscape.

Please uphold the previous decisions of the PAC. No new evidence or Departmental analysis has come forward that could overturn the last PAC determination. Refuse consent for the proposed Invincible mine, modification 5 as the applicant and Department of Planning and Environment have not provided any basis to overturn the past decision regarding these matters.

The Commission may publish my name, location and this submission. Thank you for the opportunity to comment on this mining proposal.

Yours sincerely,

Diane Call

I strongly oppose this Department's recommendation to expand the open-cut area and continue coal production for eight years. As Commissioners' would appreciate, approval of this modification is likely to lead to incremental mine development, and the Department of Planning and Environment is opposed to a series of incremental increases in open-cut coal mining in the Ben Bullen State Forest.

Manildra (Castlereagh Coal) has made the open-cut proposal small (50ha) while at the same time it has applied for access to coal resources in 1,368 hectares around the proposed mine site. Manildra has been granted coal exploration licences Nos. 8618 and 8619 over much of the Ben Bullen State Forest that is of high conservation value. When the modification is read in this context it is obvious that it is not a different proposal from the proposals previously rejected for this mine site.

Coal from Manildra’s open-cut Invincible mine will be more expensive in terms of overall costs, when the environment is taken into account, than coal from existing operating mines that can meet the requirements of Manildra's Bomaderry plant.

Approving Manildra’s 50 hectare open-cut proposal will impose adverse environmental outcomes upon this outstanding natural area. The true cost of damage to the natural environment cannot be compensated by offsets, contrary to the assertions made by the Department.

The Ben Bullen pagoda landscape is unique, irreplaceable and covers a small area of which the woodlands affected by the proposed Invincible open-cut mining operation is a key part. The modification proposal is a key part of the only area where grassy tableland woodlands adjoin pagodas. This woodland is an integral part of this pagoda landscape and its loss will compromise this beautiful pagoda landscape.

The Planning Assessment Commission correctly observed in 2012 and confirmed 2014 that the pagoda landscape consists of the pagodas and woodlands below
them. The pagoda rock features cannot be considered in isolation from the surrounding woodlands that are proposed to be mined. The buffer debate was part of the previous PAC review and determination that refused consent.

Further, ecosystems cannot be replanted after open-cut mining. The proposed biodiversity offsets do not replace the unique Ben Bullen pagoda landscape. The proposed offsets are irrelevant to conservation of this pagoda landscape.

Please uphold the previous decisions of the PAC. No new evidence or Departmental analysis has come forward that could overturn the last PAC determination. Refuse consent for the proposed Invincible mine, modification 5 as the applicant and Department of Planning and Environment have not provided any basis to overturn the past decision regarding these matters.

The Commission may publish my name, location and this submission. Thank you for the opportunity to comment on this mining proposal.

Yours sincerely,

Grant McDonald

Dear Mr Forward,

Submission Opposing the Department of Planning and Environment recommendation - Invincible Extension Project 07_0127 MOD 5 (D490/17)

I object to the proposed modification of the Invincible coal mine. Open-cut coal mining should not recommence in this sensitive part of the Gardens of Stone region. In October 2014 the Commission said that the “highest and best use of the area is for conservation purposes” and that ruling is not changed by the Department of Planning and Environment's (the Department's) recommendation.

It would be inappropriate to reverse the Commission's 2013 and 2014 decisions that had rejected open-cut mining in this 50 hectare area, as well as other areas of public forest. I strongly oppose this Department's recommendation to expand the open-cut area and continue coal production for eight years. As Commissioners' would appreciate, approval of this modification is likely to lead to incremental mine development, and the Department of Planning and Environment is opposed to a series of incremental increases in open-cut coal mining in the Ben Bullen State Forest.

Manildra (Castlereagh Coal) has made the open-cut proposal small (50ha) while at the same time it has applied for access to coal resources in 1,368 hectares around the proposed mine site. This part of Australia is of rare beauty and of the highest intrinsic value to our country, its natural systems, its animals and people.
To cut open and destroy so much of it in the name of short term profit would amount to a major crime.

I'm passionately appealing to the decency and common sense of all people involved in the planning and decision making of this project.
We all have a responsibility towards this country and the future of it and its inhabitants.

Yours sincerely,
Inge

This woodland is an integral part of this pagoda landscape and its loss will compromise this beautiful pagoda landscape.

The Planning Assessment Commission correctly observed in 2012 and confirmed 2014 that the pagoda landscape consists of the pagodas and woodlands below...
them. The pagoda rock features cannot be considered in isolation from the surrounding woodlands that are proposed to be mined. The buffer debate was part of the previous PAC review and determination that refused consent.

Further, ecosystems cannot be replanted after open-cut mining. The proposed biodiversity offsets do not replace the unique Ben Bullen pagoda landscape. The proposed offsets are irrelevant to conservation of this pagoda landscape.

Please uphold the previous decisions of the PAC. No new evidence or Departmental analysis has come forward that could overturn the last PAC determination. Refuse consent for the proposed Invincible mine, modification 5 as the applicant and Department of Planning and Environment have not provided any basis to overturn the past decision regarding these matters.

The Commission may publish my name, location and this submission. Thank you for the opportunity to comment on this mining proposal.

Yours sincerely,

Janet Mckenzie

Dear Mr Forward,

Submission Opposing the Department of Planning and Environment recommendation  
- Invincible Extension Project 07_0127 MOD 5 (D490/17)

I object to the proposed modification of the Invincible coal mine. Open-cut coal mining should not recommence in this sensitive part of the Gardens of Stone region. In October 2014 the Commission said that the “highest and best use of the area is for conservation purposes” and that ruling is not changed by the Department of Planning and Environment's (the Department's) recommendation.

It would be inappropriate to reverse the Commission's 2013 and 2014 decisions that had rejected open-cut mining in this 50 hectare area, as well as other areas of public forest. I strongly oppose this Department's recommendation to expand the open-cut area and continue coal production for eight years. As Commissioners' would appreciate, approval of this modification is likely to lead to incremental mine development, and the Department of Planning and Environment is opposed to a series of incremental increases in open-cut coal mining in the Ben Bullen State Forest.

Manildra (Castlereagh Coal) has made the open-cut proposal small (50ha) while at the same time it has applied for access to coal resources in 1,368 hectares around the proposed mine site. Manildra has been granted coal exploration licences Nos. 8618 and 8619 over much of the Ben Bullen State Forest that is of high conservation value. When the modification is read in this context it is obvious that it is not a different proposal from the proposals previously rejected for this mine site.

Coal from Manildra’s open-cut Invincible mine will be more expensive in terms of overall costs, when the environment is taken into account, than coal from existing operating mines that can meet the requirements of Manildra's Bomaderry plant.

Approving Manildra’s 50 hectare open-cut proposal will impose adverse environmental outcomes upon this outstanding natural area. The true cost of damage to the natural environment cannot be compensated by offsets, contrary to the assertions made by the Department.

The Ben Bullen pagoda landscape is unique, irreplaceable and covers a small area of which the woodlands affected by the proposed Invincible open-cut mining operation is a key part. The modification proposal is a key part of the only area where grassy tableland woodlands adjoin pagodas. This woodland is an integral part of this pagoda landscape and its loss will compromise this beautiful pagoda landscape.

The Planning Assessment Commission correctly observed in 2012 and confirmed 2014 that the pagoda landscape consists of the pagodas and woodlands below
them. The pagoda rock features cannot be considered in isolation from the surrounding woodlands that are proposed to be mined. The buffer debate was part of the previous PAC review and determination that refused consent.

Further, ecosystems cannot be replanted after open-cut mining. The proposed biodiversity offsets do not replace the unique Ben Bullen pagoda landscape. The proposed offsets are irrelevant to conservation of this pagoda landscape.

It would be inappropriate to reverse the Commission's 2013 and 2014 decisions that had rejected open-cut mining in this 50 hectare area, as well as other areas of public forest. I strongly oppose this Department's recommendation to expand the open-cut area and continue coal production for eight years. As Commissioners' would appreciate, approval of this modification is likely to lead to incremental mine development, and the Department of Planning and Environment is opposed to a series of incremental increases in open-cut coal mining in the Ben Bullen State Forest.

Manildra (Castlereagh Coal) has made the open-cut proposal small (50ha) while at the same time it has applied for access to coal resources in 1,368 hectares around the proposed mine site. Manildra has been granted coal exploration licences Nos. 8618 and 8619 over much of the Ben Bullen State Forest that is of high conservation value. When the modification is read in this context it is obvious that it is not a different proposal from the proposals previously rejected for this mine site.

Coal from Manildra’s open-cut Invincible mine will be more expensive in terms of overall costs, when the environment is taken into account, than coal from existing operating mines that can meet the requirements of Manildra's Bomaderry plant.

Approving Manildra’s 50 hectare open-cut proposal will impose adverse environmental outcomes upon this outstanding natural area. The true cost of damage to the natural environment cannot be compensated by offsets, contrary to the assertions made by the Department.

The Ben Bullen pagoda landscape is unique, irreplaceable and covers a small area of which the woodlands affected by the proposed Invincible open-cut mining operation is a key part. The modification proposal is a key part of the only area where grassy tableland woodlands adjoin pagodas. This woodland is an integral part of this pagoda landscape and its loss will compromise this beautiful pagoda landscape.

The Planning Assessment Commission correctly observed in 2012 and confirmed 2014 that the pagoda landscape consists of the pagodas and woodlands below
them. The pagoda rock features cannot be considered in isolation from the surrounding woodlands that are proposed to be mined. The buffer debate was part of the previous PAC review and determination that refused consent.

Further, ecosystems cannot be replanted after open-cut mining. The proposed biodiversity offsets do not replace the unique Ben Bullen pagoda landscape. The proposed offsets are irrelevant to conservation of this pagoda landscape.

Please uphold the previous decisions of the PAC. No new evidence or Departmental analysis has come forward that could overturn the last PAC determination. Refuse consent for the proposed Invincible mine, modification 5 as the applicant and Department of Planning and Environment have not provided any basis to overturn the past decision regarding these matters.

The Commission may publish my name, location and this submission. Thank you for the opportunity to comment on this mining proposal.

Yours sincerely,

Joanne Bishop

Please uphold the previous decisions of the PAC. No new evidence or Departmental analysis has come forward that could overturn the last PAC determination. Refuse consent for the proposed Invincible mine, modification 5 as the applicant and Department of Planning and Environment have not provided any basis to overturn the past decision regarding these matters.

Open cut mining causes the extinction of all native wild life and its habitat. This is an unacceptable price to satisfy the Manildra Greed trying to squeeze the last drop of economic wealth from a dying industry. It will not provide more long term jobs because the whole operation will be driven by artificial intelligence production methods. It makes no sense to destroy the natural environment which contributes to the local economy in tourist dollars. Such proposals make me ashamed of my government which supports such vandalism. As of this day I will boycott all Manildra products. The Commission may publish my name, location and this submission. Thank you for the opportunity to comment on this mining proposal.

Yours sincerely, John Inshaw.

Monday, November 27, 2017 - 18:07
Mr Paul Forward  
Chairperson  
Planning Assessment Commission  
Level 3, 201 Elizabeth Street  
Sydney NSW 2000

Dear Mr Forward,

Submission Opposing the Department of Planning and Environment recommendation  
- Invincible Extension Project 07_0127 MOD 5 (D490/17)

I object to the proposed modification of the Invincible coal mine. Open-cut  
coal mining should not recommence in this sensitive part of the Gardens of  
Stone region. In October 2014 the Commission said that the “highest and  
best use of the area is for conservation purposes” and that ruling is not  
changed by the Department of Planning and Environment's (the Department's)  
recommendation.

It would be inappropriate to reverse the Commission's 2013 and 2014 decisions  
that had rejected open-cut mining in this 50 hectare area, as well as other  
areas of public forest. I strongly oppose this Department's recommendation to  
expand the open-cut area and continue coal production for eight years. As  
Commissioners' would appreciate, approval of this modification is likely to  
lead to incremental mine development, and the Department of Planning and  
Environment is opposed to a series of incremental increases in open-cut coal  
making in the Ben Bullen State Forest.

Manildra (Castlereagh Coal) has made the open-cut proposal small (50ha) while  
at the same time it has applied for access to coal resources in 1,368  
hectares around the proposed mine site. Manildra has been granted coal  
exploration licences Nos. 8618 and 8619 over much of the Ben Bullen State  
Forest that is of high conservation value. When the modification is read in  
this context it is obvious that it is not a different proposal from the  
proposals previously rejected for this mine site.

Coal from Manildra’s open-cut Invincible mine will be more expensive in  
terms of overall costs, when the environment is taken into account, than coal  
from existing operating mines that can meet the requirements of Manildra's  
Bomaderry plant.

Approving Manildra’s 50 hectare open-cut proposal will impose adverse  
environmental outcomes upon this outstanding natural area. The true cost of  
damage to the natural environment cannot be compensated by offsets, contrary  
to the assertions made by the Department.

The Ben Bullen pagoda landscape is unique, irreplaceable and covers a small  
area of which the woodlands affected by the proposed Invincible open-cut  
making operation is a key part. The modification proposal is a key part of  
the only area where grassy tableland woodlands adjoin pagodas. This woodland  
is an integral part of this pagoda landscape and its loss will compromise  
this beautiful pagoda landscape.

The Planning Assessment Commission correctly observed in 2012 and confirmed  
2014 that the pagoda landscape consists of the pagodas and woodlands below
them. The pagoda rock features cannot be considered in isolation from the surrounding woodlands that are proposed to be mined. The buffer debate was part of the previous PAC review and determination that refused consent.

Further, ecosystems cannot be replanted after open-cut mining. The proposed biodiversity offsets do not replace the unique Ben Bullen pagoda landscape. The proposed offsets are irrelevant to conservation of this pagoda landscape.

Please uphold the previous decisions of the PAC. No new evidence or Departmental analysis has come forward that could overturn the last PAC determination. Refuse consent for the proposed Invincible mine, modification 5 as the applicant and Department of Planning and Environment have not provided any basis to overturn the past decision regarding these matters.

The Commission may publish my name, location and this submission. Thank you for the opportunity to comment on this mining proposal.

Yours sincerely,

Julie Brown

Dear Mr Forward,

Submission Opposing the Department of Planning and Environment recommendation
- Invincible Extension Project 07_0127 MOD 5 (D490/17)

I object to the proposed modification of the Invincible coal mine. Open-cut coal mining should not recommence in this sensitive part of the Gardens of Stone region. In October 2014 the Commission said that the “highest and best use of the area is for conservation purposes” and that ruling is not changed by the Department of Planning and Environment's recommendation.

It would be inappropriate to reverse the Commission's 2013 and 2014 decisions that had rejected open-cut mining in this 50 hectare area, as well as other areas of public forest. I strongly oppose this Department's recommendation to expand the open-cut area and continue coal production for eight years. As Commissioners' would appreciate, approval of this modification is likely to lead to incremental mine development, and the Department of Planning and Environment is opposed to a series of incremental increases in open-cut coal mining in the Ben Bullen State Forest.

Manildra (Castlereagh Coal) has made the open-cut proposal small (50ha) while at the same time it has applied for access to coal resources in 1,368 hectares around the proposed mine site. Manildra has been granted coal exploration licences Nos. 8618 and 8619 over much of the Ben Bullen State Forest that is of high conservation value. When the modification is read in this context it is obvious that it is not a different proposal from the proposals previously rejected for this mine site.

Coal from Manildra's open-cut Invincible mine will be more expensive in terms of overall costs, when the environment is taken into account, than coal from existing operating mines that can meet the requirements of Manildra's Bomaderry plant.

Approving Manildra’s 50 hectare open-cut proposal will impose adverse environmental outcomes upon this outstanding natural area. The true cost of damage to the natural environment cannot be compensated by offsets, contrary to the assertions made by the Department.

The Ben Bullen pagoda landscape is unique, irreplaceable and covers a small area of which the woodlands affected by the proposed Invincible open-cut mining operation is a key part. The modification proposal is a key part of the only area where grassy tableland woodlands adjoin pagodas. This woodland is an integral part of this pagoda landscape and its loss will compromise this beautiful pagoda landscape.

The Planning Assessment Commission correctly observed in 2012 and confirmed 2014 that the pagoda landscape consists of the pagodas and woodlands below

It would be inappropriate to reverse the Commission's 2013 and 2014 decisions that had rejected open-cut mining in this 50 hectare area, as well as other areas of public forest. I strongly oppose this Department's recommendation to expand the open-cut area and continue coal production for eight years. As Commissioners' would appreciate, approval of this modification is likely to lead to incremental mine development, and the Department of Planning and Environment is opposed to a series of incremental increases in open-cut coal mining in the Ben Bullen State Forest.

Manildra (Castlereagh Coal) has made the open-cut proposal small (50ha) while at the same time it has applied for access to coal resources in 1,368 hectares around the proposed mine site. Manildra has been granted coal exploration licences Nos. 8618 and 8619 over much of the Ben Bullen State Forest that is of high conservation value. When the modification is read in this context it is obvious that it is not a different proposal from the proposals previously rejected for this mine site.

Coal from Manildra’s open-cut Invincible mine will be more expensive in terms of overall costs, when the environment is taken into account, than coal from existing operating mines that can meet the requirements of Manildra's Bomaderry plant.

Approving Manildra’s 50 hectare open-cut proposal will impose adverse environmental outcomes upon this outstanding natural area. The true cost of damage to the natural environment cannot be compensated by offsets, contrary to the assertions made by the Department.

The Ben Bullen pagoda landscape is unique, irreplaceable and covers a small area of which the woodlands affected by the proposed Invincible open-cut mining operation is a key part. The modification proposal is a key part of the only area where grassy tableland woodlands adjoin pagodas. This woodland is an integral part of this pagoda landscape and its loss will compromise this beautiful pagoda landscape.

The Planning Assessment Commission correctly observed in 2012 and confirmed 2014 that the pagoda landscape consists of the pagodas and woodlands below
them. The pagoda rock features cannot be considered in isolation from the surrounding woodlands that are proposed to be mined. The buffer debate was part of the previous PAC review and determination that refused consent.

Further, ecosystems cannot be replanted after open-cut mining. The proposed biodiversity offsets do not replace the unique Ben Bullen pagoda landscape. The proposed offsets are irrelevant to conservation of this pagoda landscape.

Please uphold the previous decisions of the PAC. No new evidence or Departmental analysis has come forward that could overturn the last PAC determination. Refuse consent for the proposed Invincible mine, modification 5 as the applicant and Department of Planning and Environment have not provided any basis to overturn the past decision regarding these matters.

The Commission may publish my name, location and this submission. Thank you for the opportunity to comment on this mining proposal.

Yours sincerely,

Kirsten Versendaal

Refuse consent for the proposed Invincible mine, modification 5 as the applicant and Department of Planning and Environment have not provided any basis to overturn the past decision regarding these matters.

It is well known that the future of coal mining is uncertain, that with the prospect of the Carmichael mine possible, many other coal mines will close. This cannot be a sound economic or environmental proposal.

Furthermore, the true costs, including fully costed environmental costs have clearly not been taken into account. I call on you to develop procedures in project assessment to include all environmental costs and benefits, fully evaluated.

The Commission may publish my name, location and this submission. Thank you for the opportunity to comment on this mining proposal.

Yours sincerely,

Lorraine Hardwick

Refuse consent for the proposed Invincible mine, modification 5 as the applicant and Department of Planning and Environment have not provided any basis to overturn the past decision regarding these matters.

The Commission may publish my name, location and this submission. Thank you for the opportunity to comment on this mining proposal. It becomes tedious to have to repeatedly point out the objections to the continuous assault by mining companies on these very important areas of our native forests and biodiversity, ecosystems which really need to be preserved to the future generations and the health of our environment, planet. I know this area of NSW and have visited the area many times over my lifetime. It is unique and beautiful and deserves to be conserved. Mining is short term and wrecks the environment and waterways. The previous PAC decisions must be upheld.

Yours sincerely,
Lyn Mews

The Ben Bullen pagoda landscape is unique, irreplaceable and covers a small area of which the woodlands affected by the proposed Invincible open-cut mining operation is a key part. The modification proposal is a key part of the only area where grassy tableland woodlands adjoin pagodas. This woodland is an integral part of this pagoda landscape and its loss will compromise this beautiful pagoda landscape.

The Planning Assessment Commission correctly observed in 2012 and confirmed in 2014 that the pagoda landscape consists of the pagodas and woodlands below
them. The pagoda rock features cannot be considered in isolation from the
surrounding woodlands that are proposed to be mined. The buffer debate was
part of the previous PAC review and determination that refused consent.

Further, ecosystems cannot be replanted after open-cut mining. The proposed
biodiversity offsets do not replace the unique Ben Bullen pagoda landscape.
The proposed offsets are irrelevant to conservation of this pagoda landscape.

Please uphold the previous decisions of the PAC. No new evidence or
Departmental analysis has come forward that could overturn the last PAC
determination. Refuse consent for the proposed Invincible mine, modification
5 as the applicant and Department of Planning and Environment have not
provided any basis to overturn the past decision regarding these matters.

The Commission may publish my name, location and this submission. As well as
the impact of further burning of fossil fuels on climate change which is a
very serious matter, I have observed that mining companies do more harm than
good to the economy and to society in general, as well as the particular and
long-lasting devastation of the environment

Economically, it is ridiculous to allow permanent damage to occur to one of
the great tourism assets of NSW. The amount earned in the short term is not
going to balance out against the future income and enterprise from tourism,
that would occur in the same area, but which will be no longer possible.

Socially the impacts are also devastating in both short and long term. While
some jobs may be created temporarily, many of these will be relatively short
term (other than a few positions). Mining is moving to greater automation and
the use of heavy equipment has already eliminated most mining jobs. Meanwhile
the people of the locality endure noise, dirt, increased traffic and light
pollution while the mine operates, and afterward there is a devastated
landscape where once was beauty.

Environmentally, this is a disaster. You cannot plant seedlings elsewhere and
claim you are replacing 300 year old hollow-bearing trees. I have doubts
about the effectiveness of the processes for removal of animals. Where it
takes place at all, it will only target large animals, certainly not all the
insects and soil biota that is killed off.

I do not believe that we in NSW can afford the luxury of digging up and
selling one more hectare of untouched or relatively intact Australian
bushland.

Thank you for the opportunity to comment on this mining proposal.

Yours sincerely, Lyndal Breen

Dear Mr Forward,

Submission Opposing the Department of Planning and Environment recommendation  
- Invincible Extension Project 07_0127 MOD 5 (D490/17)

I object to the proposed modification of the Invincible coal mine. Open-cut coal mining should not recommence in this sensitive part of the Gardens of Stone region. In October 2014 the Commission said that the “highest and best use of the area is for conservation purposes” and that ruling is not changed by the Department of Planning and Environment’s (the Department’s) recommendation.

It would be inappropriate to reverse the Commission’s 2013 and 2014 decisions that had rejected open-cut mining in this 50 hectare area, as well as other areas of public forest. I strongly oppose this Department’s recommendation to expand the open-cut area and continue coal production for eight years. As Commissioners’ would appreciate, approval of this modification is likely to lead to incremental mine development, and the Department of Planning and Environment is opposed to a series of incremental increases in open-cut coal mining in the Ben Bullen State Forest.

Manildra (Castlereagh Coal) has made the open-cut proposal small (50ha) while at the same time it has applied for access to coal resources in 1,368 hectares around the proposed mine site. Manildra has been granted coal exploration licences Nos. 8618 and 8619 over much of the Ben Bullen State Forest that is of high conservation value. When the modification is read in this context it is obvious that it is not a different proposal from the proposals previously rejected for this mine site.

Coal from Manildra’s open-cut Invincible mine will be more expensive in terms of overall costs, when the environment is taken into account, than coal from existing operating mines that can meet the requirements of Manildra’s Bomaderry plant.

Approving Manildra’s 50 hectare open-cut proposal will impose adverse environmental outcomes upon this outstanding natural area. The true cost of damage to the natural environment cannot be compensated by offsets, contrary to the assertions made by the Department.

The Ben Bullen pagoda landscape is unique, irreplaceable and covers a small area of which the woodlands affected by the proposed Invincible open-cut mining operation is a key part. The modification proposal is a key part of the only area where grassy tableland woodlands adjoin pagodas. This woodland is an integral part of this pagoda landscape and its loss will compromise this beautiful pagoda landscape.

The Planning Assessment Commission correctly observed in 2012 and confirmed 2014 that the pagoda landscape consists of the pagodas and woodlands below
them. The pagoda rock features cannot be considered in isolation from the surrounding woodlands that are proposed to be mined. The buffer debate was part of the previous PAC review and determination that refused consent.

Further, ecosystems cannot be replanted after open-cut mining. The proposed biodiversity offsets do not replace the unique Ben Bullen pagoda landscape. The proposed offsets are irrelevant to conservation of this pagoda landscape.

Please uphold the previous decisions of the PAC. No new evidence or Departmental analysis has come forward that could overturn the last PAC determination. Refuse consent for the proposed Invincible mine, modification 5 as the applicant and Department of Planning and Environment have not provided any basis to overturn the past decision regarding these matters.

The Commission may publish my name, location and this submission. Thank you for the opportunity to comment on this mining proposal.

We need to protect the beauties of nature.
Yours sincerely,

Lynne Montgomery

This woodland is an integral part of this pagoda landscape and its loss will compromise this beautiful pagoda landscape.

The Planning Assessment Commission correctly observed in 2012 and confirmed 2014 that the pagoda landscape consists of the pagodas and woodlands below
them. The pagoda rock features cannot be considered in isolation from the surrounding woodlands that are proposed to be mined. The buffer debate was part of the previous PAC review and determination that refused consent.

Further, ecosystems cannot be replanted after open-cut mining. The proposed biodiversity offsets do not replace the unique Ben Bullen pagoda landscape. The proposed offsets are irrelevant to conservation of this pagoda landscape.

Please uphold the previous decisions of the PAC. No new evidence or Departmental analysis has come forward that could overturn the last PAC determination. Refuse consent for the proposed Invincible mine, modification 5 as the applicant and Department of Planning and Environment have not provided any basis to overturn the past decision regarding these matters.

The Commission may publish my name, location and this submission. Thank you for the opportunity to comment on this mining proposal.

Yours sincerely,

Marni Keato

Dear Mr Forward,

Submission Opposing the Department of Planning and Environment recommendation  
- Invincible Extension Project 07_0127 MOD 5 (D490/17)  

I object to the proposed modification of the Invincible coal mine. Open-cut coal mining should not recommence in this sensitive part of the Gardens of Stone region. In October 2014 the Commission said that the “highest and best use of the area is for conservation purposes” and that ruling is not changed by the Department of Planning and Environment's (the Department's) recommendation.

It would be inappropriate to reverse the Commission's 2013 and 2014 decisions that had rejected open-cut mining in this 50 hectare area, as well as other areas of public forest. I strongly oppose this Department's recommendation to expand the open-cut area and continue coal production for eight years. As Commissioners' would appreciate, approval of this modification is likely to lead to incremental mine development, and the Department of Planning and Environment is opposed to a series of incremental increases in open-cut coal mining in the Ben Bullen State Forest.

Manildra (Castlereagh Coal) has made the open-cut proposal small (50ha) while at the same time it has applied for access to coal resources in 1,368 hectares around the proposed mine site. Manildra has been granted coal exploration licences Nos. 8618 and 8619 over much of the Ben Bullen State Forest that is of high conservation value. When the modification is read in this context it is obvious that it is not a different proposal from the proposals previously rejected for this mine site.

Coal from Manildra’s open-cut Invincible mine will be more expensive in terms of overall costs, when the environment is taken into account, than coal from existing operating mines that can meet the requirements of Manildra's Bomaderry plant.

Approving Manildra’s 50 hectare open-cut proposal will impose adverse environmental outcomes upon this outstanding natural area. The true cost of damage to the natural environment cannot be compensated by offsets, contrary to the assertions made by the Department.

The Ben Bullen pagoda landscape is unique, irreplaceable and covers a small area of which the woodlands affected by the proposed Invincible open-cut mining operation is a key part. The modification proposal is a key part of the only area where grassy tableland woodlands adjoin pagodas. This woodland is an integral part of this pagoda landscape and its loss will compromise this beautiful pagoda landscape.

The Planning Assessment Commission correctly observed in 2012 and confirmed 2014 that the pagoda landscape consists of the pagodas and woodlands below...
them. The pagoda rock features cannot be considered in isolation from the surrounding woodlands that are proposed to be mined. The buffer debate was part of the previous PAC review and determination that refused consent.

Further, ecosystems cannot be replanted after open-cut mining. The proposed biodiversity offsets do not replace the unique Ben Bullen pagoda landscape. The proposed offsets are irrelevant to conservation of this pagoda landscape.

Please uphold the previous decisions of the PAC. No new evidence or Departmental analysis has come forward that could overturn the last PAC determination. Refuse consent for the proposed Invincible mine, modification 5 as the applicant and Department of Planning and Environment have not provided any basis to overturn the past decision regarding these matters.

The Commission may publish my name, location and this submission. Thank you for the opportunity to comment on this mining proposal.

Yours sincerely,

Mary Syrett

I object to the proposed modification of the Invincible coal mine. Open-cut coal mining should not recommence in this sensitive part of the Gardens of Stone region. In October 2014 the Commission said that the “highest and best use of the area is for conservation purposes” and that ruling is not changed by the Department of Planning and Environment's (the Department's) recommendation.

It would be inappropriate to reverse the Commission's 2013 and 2014 decisions that had rejected open-cut mining in this 50 hectare area, as well as other areas of public forest. I strongly oppose this Department's recommendation to expand the open-cut area and continue coal production for eight years. As Commissioners' would appreciate, approval of this modification is likely to lead to incremental mine development, and the Department of Planning and Environment is opposed to a series of incremental increases in open-cut coal mining in the Ben Bullen State Forest.

Manildra (Castlereagh Coal) has made the open-cut proposal small (50ha) while at the same time it has applied for access to coal resources in 1,368 hectares around the proposed mine site. Manildra has been granted coal exploration licences Nos. 8618 and 8619 over much of the Ben Bullen State Forest that is of high conservation value. When the modification is read in this context it is obvious that it is not a different proposal from the proposals previously rejected for this mine site.

Coal from Manildra’s open-cut Invincible mine will be more expensive in terms of overall costs, when the environment is taken into account, than coal from existing operating mines that can meet the requirements of Manildra's Bomaderry plant.

Approving Manildra’s 50 hectare open-cut proposal will impose adverse environmental outcomes upon this outstanding natural area. The true cost of damage to the natural environment cannot be compensated by offsets, contrary to the assertions made by the Department.

The Ben Bullen pagoda landscape is unique, irreplaceable and covers a small area of which the woodlands affected by the proposed Invincible open-cut mining operation is a key part. The modification proposal is a key part of the only area where grassy tableland woodlands adjoin pagodas. This woodland is an integral part of this pagoda landscape and its loss will compromise this beautiful pagoda landscape.

The Planning Assessment Commission correctly observed in 2012 and confirmed 2014 that the pagoda landscape consists of the pagodas and woodlands below
them. The pagoda rock features cannot be considered in isolation from the surrounding woodlands that are proposed to be mined. The buffer debate was part of the previous PAC review and determination that refused consent.

Further, ecosystems cannot be replanted after open-cut mining. The proposed biodiversity offsets do not replace the unique Ben Bullen pagoda landscape. The proposed offsets are irrelevant to conservation of this pagoda landscape.

Please uphold the previous decisions of the PAC. No new evidence or Departmental analysis has come forward that could overturn the last PAC determination. Refuse consent for the proposed Invincible mine, modification 5 as the applicant and Department of Planning and Environment have not provided any basis to overturn the past decision regarding these matters.

The Commission may publish my name, location and this submission. Thank you for the opportunity to comment on this mining proposal.

Yours sincerely,

P Dorrington

Mr Paul Forward  
Chairperson  
Planning Assessment Commission  
Level 3, 201 Elizabeth Street  
Sydney NSW 2000  

Dear Mr Forward,  

Submission Opposing the Department of Planning and Environment recommendation  
- Invincible Extension Project 07_0127 MOD 5 (D490/17)  

I think it is wrong to allow the proposed modification of the Invincible coal mine. Open-cut coal mining should not recommence in this sensitive part of the Gardens of Stone region. I strongly agree with the Commission when it said in October 2014 that the “highest and best use of the area is for conservation purposes”.  

It is not appropriate to reverse the Commission's 2013 and 2014 decisions that rejected open-cut mining in this 50 hectare area, as well as other areas of public forest. I strongly oppose the Department of Planning and Environment's recommendation regarding expansion of the open-cut area and continuing coal production for eight years. Approval of this modification is likely to lead to incremental mine development.  

Manildra (Castlereagh Coal) has made the open-cut proposal small (50ha) while at the same time it has applied for access to coal resources in 1,368 hectares around the proposed mine site. Manildra has been granted coal exploration licences Nos. 8618 and 8619 over much of the Ben Bullen State Forest that is of high conservation value. When the modification is read in this context it is obvious that it is not a different proposal from the proposals previously rejected for this mine site.  

Coal from Manildra’s open-cut Invincible mine will be more expensive in terms of overall costs, when the environment is taken into account, than coal from existing operating mines that can meet the requirements of Manildra's Bomaderry plant.  

The Ben Bullen pagoda landscape is unique, irreplaceable and covers a small area of which the woodlands affected by the proposed Invincible open-cut mining operation is a key part. The modification proposal is a key part of the only area where grassy tableland woodlands adjoin pagodas. This woodland is an integral part of this pagoda landscape and its loss will compromise this beautiful pagoda landscape. The pagoda rock features cannot be considered in isolation from the surrounding woodlands that are proposed to be mined. The buffer debate was part of the previous PAC review and determination that refused consent.  

Ecosystems cannot be replanted after open-cut mining. The proposed biodiversity offsets do not replace the unique Ben Bullen pagoda landscape. The proposed offsets are irrelevant to conservation of this pagoda landscape.  

Approving Manildra’s 50 hectare open-cut proposal will impose adverse environmental outcomes upon this outstanding natural area. The true cost of damage to the natural environment cannot be compensated by offsets, contrary
to the assertions made by the Department.

Please uphold the previous decisions of the PAC. No new evidence or Departmental analysis has come forward that ought overturn the last PAC determination. Refuse consent for the proposed Invincible mine, modification 5 as the applicant and Department of Planning and Environment have not provided any basis to overturn the past decision regarding these matters which recognised the conservation value of the area.

The Commission may publish my name, location and this submission. Thank you for the opportunity to comment on this mining proposal.

Yours sincerely,

Paula Kelly

them. The pagoda rock features cannot be considered in isolation from the surrounding woodlands that are proposed to be mined. The buffer debate was part of the previous PAC review and determination that refused consent.

Further, ecosystems cannot be replanted after open-cut mining. The proposed biodiversity offsets do not replace the unique Ben Bullen pagoda landscape. The proposed offsets are irrelevant to conservation of this pagoda landscape.

Please uphold the previous decisions of the PAC. No new evidence or Departmental analysis has come forward that could overturn the last PAC determination. Refuse consent for the proposed Invincible mine, modification 5 as the applicant and Department of Planning and Environment have not provided any basis to overturn the past decision regarding these matters.

The Commission may publish my name, location and this submission. Thank you for the opportunity to comment on this mining proposal.

Yours sincerely,

pete simpson

Mr Paul Forward  
Chairperson  
Planning Assessment Commission  
Level 3, 201 Elizabeth Street  
Sydney NSW 2000  

Dear Mr Forward,

Submission Opposing the Department of Planning and Environment recommendation  
- Invincible Extension Project 07_0127 MOD 5 (D490/17)

I object to the proposed modification of the Invincible coal mine. Open-cut coal mining should not recommence in this sensitive part of the Gardens of Stone region. In October 2014 the Commission said that the “highest and best use of the area is for conservation purposes” and that ruling is not changed by the Department of Planning and Environment's (the Department's) recommendation.

It would be inappropriate to reverse the Commission's 2013 and 2014 decisions that had rejected open-cut mining in this 50 hectare area, as well as other areas of public forest. I strongly oppose this Department's recommendation to expand the open-cut area and continue coal production for eight years. As Commissioners' would appreciate, approval of this modification is likely to lead to incremental mine development, and the Department of Planning and Environment is opposed to a series of incremental increases in open-cut coal mining in the Ben Bullen State Forest.

Manildra (Castlereagh Coal) has made the open-cut proposal small (50ha) while at the same time it has applied for access to coal resources in 1,368 hectares around the proposed mine site. Manildra has been granted coal exploration licences Nos. 8618 and 8619 over much of the Ben Bullen State Forest that is of high conservation value. When the modification is read in this context it is obvious that it is not a different proposal from the proposals previously rejected for this mine site.

Coal from Manildra’s open-cut Invincible mine will be more expensive in terms of overall costs, when the environment is taken into account, than coal from existing operating mines that can meet the requirements of Manildra's Bomaderry plant.

Approving Manildra’s 50 hectare open-cut proposal will impose adverse environmental outcomes upon this outstanding natural area. The true cost of damage to the natural environment cannot be compensated by offsets, contrary to the assertions made by the Department.

The Ben Bullen pagoda landscape is unique, irreplaceable and covers a small area of which the woodlands affected by the proposed Invincible open-cut mining operation is a key part. The modification proposal is a key part of the only area where grassy tableland woodlands adjoin pagodas. This woodland is an integral part of this pagoda landscape and its loss will compromise this beautiful pagoda landscape.

The Planning Assessment Commission correctly observed in 2012 and confirmed 2014 that the pagoda landscape consists of the pagodas and woodlands below
them. The pagoda rock features cannot be considered in isolation from the
surrounding woodlands that are proposed to be mined. The buffer debate was
part of the previous PAC review and determination that refused consent.

Further, ecosystems cannot be replanted after open-cut mining. The proposed
biodiversity offsets do not replace the unique Ben Bullen pagoda landscape.
The proposed offsets are irrelevant to conservation of this pagoda landscape.

Please uphold the previous decisions of the PAC. No new evidence or
Departmental analysis has come forward that could overturn the last PAC
determination. Refuse consent for the proposed Invincible mine, modification
5 as the applicant and Department of Planning and Environment have not
provided any basis to overturn the past decision regarding these matters.

The Commission may publish my name, location and this submission. Thank you
for the opportunity to comment on this mining proposal.

Yours sincerely,

Peter Dowson

Manildra has been granted coal exploration licences Nos. 8618 and 8619 over much of the Ben Bullen State Forest that is of high conservation value. When the modification is read in this context it is obvious that it is not a different proposal from the proposals previously rejected for this mine site.

Coal from Manildra’s open-cut Invincible mine will be more expensive in terms of overall costs, when the environment is taken into account, than coal from existing operating mines that can meet the requirements of Manildra's Bomaderry plant.

Approving Manildra’s 50 hectare open-cut proposal will impose adverse environmental outcomes upon this outstanding natural area. The true cost of damage to the natural environment cannot be compensated by offsets, contrary to the assertions made by the Department.

The Ben Bullen pagoda landscape is unique, irreplaceable and covers a small area of which the woodlands affected by the proposed Invincible open-cut mining operation is a key part. The modification proposal is a key part of the only area where grassy tableland woodlands adjoin pagodas. This woodland is an integral part of this pagoda landscape and its loss will compromise this beautiful pagoda landscape.

The Planning Assessment Commission correctly observed in 2012 and confirmed 2014 that the pagoda landscape consists of the pagodas and woodlands below
them. The pagoda rock features cannot be considered in isolation from the surrounding woodlands that are proposed to be mined. The buffer debate was part of the previous PAC review and determination that refused consent.

Further, ecosystems cannot be replanted after open-cut mining. The proposed biodiversity offsets do not replace the unique Ben Bullen pagoda landscape. The proposed offsets are irrelevant to conservation of this pagoda landscape.

Please uphold the previous decisions of the PAC. No new evidence or Departmental analysis has come forward that could overturn the last PAC determination. Refuse consent for the proposed Invincible mine, modification 5 as the applicant and Department of Planning and Environment have not provided any basis to overturn the past decision regarding these matters.

The Commission may publish my name, location and this submission. Thank you for the opportunity to comment on this mining proposal.

Yours sincerely,

Richard Maude

Dear Mr Forward,

Submission Opposing the Department of Planning and Environment recommendation - Invincible Extension Project 07_0127 MOD 5 (D490/17)

I object to the proposed modification of the Invincible coal mine. Open-cut coal mining should not recommence in this sensitive part of the Gardens of Stone region. In October 2014 the Commission said that the “highest and best use of the area is for conservation purposes” and that ruling is not changed by the Department of Planning and Environment's (the Department's) recommendation.

It would be inappropriate to reverse the Commission's 2013 and 2014 decisions that had rejected open-cut mining in this 50 hectare area, as well as other areas of public forest. I strongly oppose this Department's recommendation to expand the open-cut area and continue coal production for eight years. As Commissioners' would appreciate, approval of this modification is likely to lead to incremental mine development, and the Department of Planning and Environment is opposed to a series of incremental increases in open-cut coal mining in the Ben Bullen State Forest.

Manildra (Castlereagh Coal) has made the open-cut proposal small (50ha) while at the same time it has applied for access to coal resources in 1,368 hectares around the proposed mine site. Manildra has been granted coal exploration licences Nos. 8618 and 8619 over much of the Ben Bullen State Forest that is of high conservation value. When the modification is read in this context it is obvious that it is not a different proposal from the proposals previously rejected for this mine site.

Coal from Manildra’s open-cut Invincible mine will be more expensive in terms of overall costs, when the environment is taken into account, than coal from existing operating mines that can meet the requirements of Manildra's Bomaderry plant.

Please uphold the previous decisions of the PAC. No new evidence or Departmental analysis has come forward that could overturn the last PAC determination. Refuse consent for the proposed Invincible mine, modification 5 as the applicant and Department of Planning and Environment have not provided any basis to overturn the past decision regarding these matters.

An essential consideration regarding this outrageous mine expansion. Last week saw the world get together once again, this time in Bonn, Germany, for the World Climate Change Conference, stressing again the importance of keeping coal in the ground, so as to mitigate the rapidly increasing ocean temperature. Not only will this proposal decimate Australia's unique heritage and landscape—representing major future tourism dollars and employment—but on a global level, it represents a contribution to the disastrous climate destruction. This must not proceed.

The Commission may publish my name, location and this submission. Thank you for the opportunity to comment on this mining proposal.

Further, ecosystems cannot be replanted after open-cut mining. The proposed biodiversity offsets do not replace the unique Ben Bullen pagoda landscape. The proposed offsets are irrelevant to conservation of this pagoda landscape.

Please uphold the previous decisions of the PAC. No new evidence or Departmental analysis has come forward that could overturn the last PAC determination. Refuse consent for the proposed Invincible mine, modification 5 as the applicant and Department of Planning and Environment have not provided any basis to overturn the past decision regarding these matters.

The Commission may publish my name, location and this submission. Thank you for the opportunity to comment on this mining proposal.

Yours sincerely,

Ruth Boydell

Dear Mr Forward,

Submission Opposing the Department of Planning and Environment recommendation - Invincible Extension Project 07_0127 MOD 5 (D490/17)

I object to the proposed modification of the Invincible coal mine. Open-cut coal mining should not recommence in this sensitive part of the Gardens of Stone region. In October 2014 the Commission said that the “highest and best use of the area is for conservation purposes” and that ruling is not changed by the Department of Planning and Environment’s (the Department’s) recommendation.

It would be inappropriate to reverse the Commission’s 2013 and 2014 decisions that had rejected open-cut mining in this 50 hectare area, as well as other areas of public forest. I strongly oppose this Department's recommendation to expand the open-cut area and continue coal production for eight years. As Commissioners would appreciate, approval of this modification is likely to lead to incremental mine development, and the Department of Planning and Environment is opposed to a series of incremental increases in open-cut coal mining in the Ben Bullen State Forest.

Manildra (Castlereagh Coal) has made the open-cut proposal small (50ha) while at the same time it has applied for access to coal resources in 1,368 hectares around the proposed mine site. Manildra has been granted coal exploration licences Nos. 8618 and 8619 over much of the Ben Bullen State Forest that is of high conservation value. When the modification is read in this context it is obvious that it is not a different proposal from the proposals previously rejected for this mine site.

Coal from Manildra’s open-cut Invincible mine will be more expensive in terms of overall costs, when the environment is taken into account, than coal from existing operating mines that can meet the requirements of Manildra's Bomaderry plant.

Approving Manildra’s 50 hectare open-cut proposal will impose adverse environmental outcomes upon this outstanding natural area. The true cost of damage to the natural environment cannot be compensated by offsets, contrary to the assertions made by the Department.

The Ben Bullen pagoda landscape is unique, irreplaceable and covers a small area of which the woodlands affected by the proposed Invincible open-cut mining operation is a key part. The modification proposal is a key part of the only area where grassy tableland woodlands adjoin pagodas. This woodland is an integral part of this pagoda landscape and its loss will compromise this beautiful pagoda landscape.

The Planning Assessment Commission correctly observed in 2012 and confirmed 2014 that the pagoda landscape consists of the pagodas and woodlands below
them. The pagoda rock features cannot be considered in isolation from the surrounding woodlands that are proposed to be mined. The buffer debate was part of the previous PAC review and determination that refused consent.

Further, ecosystems cannot be replanted after open-cut mining. The proposed biodiversity offsets do not replace the unique Ben Bullen pagoda landscape. The proposed offsets are irrelevant to conservation of this pagoda landscape.

Please uphold the previous decisions of the PAC. No new evidence or Departmental analysis has come forward that could overturn the last PAC determination. Refuse consent for the proposed Invincible mine, modification 5 as the applicant and Department of Planning and Environment have not provided any basis to overturn the past decision regarding these matters.

The Commission may publish my name, location and this submission. Thank you for the opportunity to comment on this mining proposal.

Yours sincerely,
Ruth east

When the modification is read in this context it is obvious that it is not a different proposal from the proposals previously rejected for this mine site.

Coal from Manildra’s open-cut Invincible mine will be more expensive in terms of overall costs, when the environment is taken into account, than coal from existing operating mines that can meet the requirements of Manildra's Bomaderry plant.

Approving Manildra’s 50 hectare open-cut proposal will impose adverse environmental outcomes upon this outstanding natural area. The true cost of damage to the natural environment cannot be compensated by offsets, contrary to the assertions made by the Department.

The Ben Bullen pagoda landscape is unique, irreplaceable and covers a small area of which the woodlands affected by the proposed Invincible open-cut mining operation is a key part. The modification proposal is a key part of the only area where grassy tableland woodlands adjoin pagodas. This woodland is an integral part of this pagoda landscape and its loss will compromise this beautiful pagoda landscape.

The Planning Assessment Commission correctly observed in 2012 and confirmed 2014 that the pagoda landscape consists of the pagodas and woodlands below
them. The pagoda rock features cannot be considered in isolation from the surrounding woodlands that are proposed to be mined. The buffer debate was part of the previous PAC review and determination that refused consent.

Further, ecosystems cannot be replanted after open-cut mining. The proposed biodiversity offsets do not replace the unique Ben Bullen pagoda landscape. The proposed offsets are irrelevant to conservation of this pagoda landscape.

Please uphold the previous decisions of the PAC. No new evidence or Departmental analysis has come forward that could overturn the last PAC determination. Refuse consent for the proposed Invincible mine, modification 5 as the applicant and Department of Planning and Environment have not provided any basis to overturn the past decision regarding these matters.

The Commission may publish my name, location and this submission. Thank you for the opportunity to comment on this mining proposal.

Yours sincerely,

Stephen Corry

Dear Mr Forward,

Submission Opposing the Department of Planning and Environment recommendation  
- Invincible Extension Project 07_0127 MOD 5 (D490/17)

I object to the proposed modification of the Invincible coal mine. Open-cut coal mining should not recommence in this sensitive part of the Gardens of Stone region. In October 2014 the Commission said that the “highest and best use of the area is for conservation purposes” and that ruling is not changed by the Department of Planning and Environment's (the Department's) recommendation.

It would be inappropriate to reverse the Commission's 2013 and 2014 decisions that had rejected open-cut mining in this 50 hectare area, as well as other areas of public forest. I strongly oppose this Department's recommendation to expand the open-cut area and continue coal production for eight years. As Commissioners' would appreciate, approval of this modification is likely to lead to incremental mine development, and the Department of Planning and Environment is opposed to a series of incremental increases in open-cut coal mining in the Ben Bullen State Forest.

Manildra (Castlereagh Coal) has made the open-cut proposal small (50ha) while at the same time it has applied for access to coal resources in 1,368 hectares around the proposed mine site. Manildra has been granted coal exploration licences Nos. 8618 and 8619 over much of the Ben Bullen State Forest that is of high conservation value. When the modification is read in this context it is obvious that it is not a different proposal from the proposals previously rejected for this mine site.

Coal from Manildra’s open-cut Invincible mine will be more expensive in terms of overall costs, when the environment is taken into account, than coal from existing operating mines that can meet the requirements of Manildra's Bomaderry plant.

Approving Manildra’s 50 hectare open-cut proposal will impose adverse environmental outcomes upon this outstanding natural area. The true cost of damage to the natural environment cannot be compensated by offsets, contrary to the assertions made by the Department.

The Ben Bullen pagoda landscape is unique, irreplaceable and covers a small area of which the woodlands affected by the proposed Invincible open-cut mining operation is a key part. The modification proposal is a key part of the only area where grassy tableland woodlands adjoin pagodas. This woodland is an integral part of this pagoda landscape and its loss will compromise this beautiful pagoda landscape.

The Planning Assessment Commission correctly observed in 2012 and confirmed 2014 that the pagoda landscape consists of the pagodas and woodlands below...
them. The pagoda rock features cannot be considered in isolation from the surrounding woodlands that are proposed to be mined. The buffer debate was part of the previous PAC review and determination that refused consent.

Further, ecosystems cannot be replanted after open-cut mining. The proposed biodiversity offsets do not replace the unique Ben Bullen pagoda landscape. The proposed offsets are irrelevant to conservation of this pagoda landscape.

Refuse consent for the proposed Invincible mine, modification 5 as the applicant and Department of Planning and Environment have not provided any basis to overturn the past decision regarding these matters.

We have to stop being so short sighted, short term profit that decimates our environment is not longer an option we need to think to our future.

The Commission may publish my name, location and this submission. Thank you for the opportunity to comment on this mining proposal.

Yours sincerely,
Susan Clarkson

Sydney NSW 2000

Dear Mr Forward,

Submission Opposing the Department of Planning and Environment recommendation  
- Invincible Extension Project 07_0127 MOD 5 (D490/17)

I object to the proposed modification of the Invincible coal mine. Open-cut coal mining should not recommence in this sensitive part of the Gardens of Stone region. In October 2014 the Commission said that the “highest and best use of the area is for conservation purposes” and that ruling is not changed by the Department of Planning and Environment's (the Department's) recommendation.

It would be inappropriate to reverse the Commission's 2013 and 2014 decisions that had rejected open-cut mining in this 50 hectare area, as well as other areas of public forest. I strongly oppose this Department's recommendation to expand the open-cut area and continue coal production for eight years. As Commissioners' would appreciate, approval of this modification is likely to lead to incremental mine development, and the Department of Planning and Environment is opposed to a series of incremental increases in open-cut coal mining in the Ben Bullen State Forest.

Manildra (Castlereagh Coal) has made the open-cut proposal small (50ha) while at the same time it has applied for access to coal resources in 1,368 hectares around the proposed mine site. Manildra has been granted coal exploration licences Nos. 8618 and 8619 over much of the Ben Bullen State Forest that is of high conservation value. When the modification is read in this context it is obvious that it is not a different proposal from the proposals previously rejected for this mine site.

Coal from Manildra’s open-cut Invincible mine will be more expensive in terms of overall costs, when the environment is taken into account, than coal from existing operating mines that can meet the requirements of Manildra's Bomaderry plant.

Approving Manildra’s 50 hectare open-cut proposal will impose adverse environmental outcomes upon this outstanding natural area. The true cost of damage to the natural environment cannot be compensated by offsets, contrary to the assertions made by the Department.

The Ben Bullen pagoda landscape is unique, irreplaceable and covers a small area of which the woodlands affected by the proposed Invincible open-cut mining operation is a key part. The modification proposal is a key part of the only area where grassy tableland woodlands adjoin pagodas. This woodland is an integral part of this pagoda landscape and its loss will compromise this beautiful pagoda landscape.

The Planning Assessment Commission correctly observed in 2012 and confirmed 2014 that the pagoda landscape consists of the pagodas and woodlands below
them. The pagoda rock features cannot be considered in isolation from the surrounding woodlands that are proposed to be mined. The buffer debate was part of the previous PAC review and determination that refused consent.

Further, ecosystems cannot be replanted after open-cut mining. The proposed biodiversity offsets do not replace the unique Ben Bullen pagoda landscape. The proposed offsets are irrelevant to conservation of this pagoda landscape.

Please uphold the previous decisions of the PAC. No new evidence or Departmental analysis has come forward that could overturn the last PAC determination. Refuse consent for the proposed Invincible mine, modification 5 as the applicant and Department of Planning and Environment have not provided any basis to overturn the past decision regarding these matters.

The Commission may publish my name, location and this submission. Thank you for the opportunity to comment on this mining proposal.

Yours sincerely,

Wade Stewart
