Dear Mr Forward,

Submission Opposing the Department of Planning and Environment recommendation - Invincible Extension Project 07_0127 MOD 5 (D490/17)

I object to the proposed modification of the Invincible coal mine. Open-cut coal mining should not recommence in this sensitive part of the Gardens of Stone region. In October 2014 the Commission said that the “highest and best use of the area is for conservation purposes” and that ruling is not changed by the Department of Planning and Environment's (the Department's) recommendation.

It would be inappropriate to reverse the Commission's 2013 and 2014 decisions that had rejected open-cut mining in this 50 hectare area, as well as other areas of public forest. I strongly oppose this Department's recommendation to expand the open-cut area and continue coal production for eight years. As Commissioners' would appreciate, approval of this modification is likely to lead to incremental mine development, and the Department of Planning and Environment is opposed to a series of incremental increases in open-cut coal mining in the Ben Bullen State Forest.

Manildra (Castlereagh Coal) has made the open-cut proposal small (50ha) while at the same time it has applied for access to coal resources in 1,368 hectares around the proposed mine site. Manildra has been granted coal exploration licences Nos. 8618 and 8619 over much of the Ben Bullen State Forest that is of high conservation value. When the modification is read in this context it is obvious that it is not a different proposal from the proposals previously rejected for this mine site.

Coal from Manildra’s open-cut Invincible mine will be more expensive in terms of overall costs, when the environment is taken into account, than coal from existing operating mines that can meet the requirements of Manildra's Bomaderry plant.

Approving Manildra’s 50 hectare open-cut proposal will impose adverse environmental outcomes upon this outstanding natural area. The true cost of damage to the natural environment cannot be compensated by offsets, contrary to the assertions made by the Department.

The Ben Bullen pagoda landscape is unique, irreplaceable and covers a small area of which the woodlands affected by the proposed Invincible open-cut mining operation is a key part. The modification proposal is a key part of the only area where grassy tableland woodlands adjoin pagodas. This woodland is an integral part of this pagoda landscape and its loss will compromise this beautiful pagoda landscape.

The Planning Assessment Commission correctly observed in 2012 and confirmed 2014 that the pagoda landscape consists of the pagodas and woodlands below
them. The pagoda rock features cannot be considered in isolation from the surrounding woodlands that are proposed to be mined. The buffer debate was part of the previous PAC review and determination that refused consent.

Further, ecosystems cannot be replanted after open-cut mining. The proposed biodiversity offsets do not replace the unique Ben Bullen pagoda landscape. The proposed offsets are irrelevant to conservation of this pagoda landscape.

Please uphold the previous decisions of the PAC. No new evidence or Departmental analysis has come forward that could overturn the last PAC determination. Refuse consent for the proposed Invincible mine, modification 5 as the applicant and Department of Planning and Environment have not provided any basis to overturn the past decision regarding these matters.

The Commission may publish my name, location and this submission. Thank you for the opportunity to comment on this mining proposal.

Yours sincerely,

Marie Koen

Sunday, December 3, 2017 - 15:16
Mr Paul Forward
Chairperson
Planning Assessment Commission
Level 3, 201 Elizabeth Street
Sydney NSW 2000

Dear Mr Forward,

Submission Opposing the Department of Planning and Environment recommendation
- Invincible Extension Project 07_0127 MOD 5 (D490/17)

I object to the proposed modification of the Invincible coal mine. Open-cut
coal mining should not recommence in this sensitive part of the Gardens of
Stone region. In October 2014 the Commission said that the “highest and
best use of the area is for conservation purposes” and that ruling is not
changed by the Department of Planning and Environment's (the Department's)
recommendation.

It would be inappropriate to reverse the Commission's 2013 and 2014 decisions
that had rejected open-cut mining in this 50 hectare area, as well as other
areas of public forest. I strongly oppose this Department's recommendation to
expand the open-cut area and continue coal production for eight years. As
Commissioners' would appreciate, approval of this modification is likely to
lead to incremental mine development, and the Department of Planning and
Environment is opposed to a series of incremental increases in open-cut coal
mining in the Ben Bullen State Forest.

Manildra (Castlereagh Coal) has made the open-cut proposal small (50ha) while
at the same time it has applied for access to coal resources in 1,368
hectares around the proposed mine site. Manildra has been granted coal
exploration licences Nos. 8618 and 8619 over much of the Ben Bullen State
Forest that is of high conservation value. When the modification is read in
this context it is obvious that it is not a different proposal from the
proposals previously rejected for this mine site.

Coal from Manildra’s open-cut Invincible mine will be more expensive in
terms of overall costs, when the environment is taken into account, than coal
from existing operating mines that can meet the requirements of Manildra's
Bomaderry plant.

Approving Manildra’s 50 hectare open-cut proposal will impose adverse
environmental outcomes upon this outstanding natural area. The true cost of
damage to the natural environment cannot be compensated by offsets, contrary
to the assertions made by the Department.

The Ben Bullen pagoda landscape is unique, irreplaceable and covers a small
area of which the woodlands affected by the proposed Invincible open-cut
mining operation is a key part. The modification proposal is a key part of
the only area where grassy tableland woodlands adjoin pagodas. This woodland
is an integral part of this pagoda landscape and its loss will compromise
this beautiful pagoda landscape.

The Planning Assessment Commission correctly observed in 2012 and confirmed
2014 that the pagoda landscape consists of the pagodas and woodlands below
them. The pagoda rock features cannot be considered in isolation from the surrounding woodlands that are proposed to be mined. The buffer debate was part of the previous PAC review and determination that refused consent.

Further, ecosystems cannot be replanted after open-cut mining. The proposed biodiversity offsets do not replace the unique Ben Bullen pagoda landscape. The proposed offsets are irrelevant to conservation of this pagoda landscape.

Please uphold the previous decisions of the PAC. No new evidence or Departmental analysis has come forward that could overturn the last PAC determination. Refuse consent for the proposed Invincible mine, modification 5 as the applicant and Department of Planning and Environment have not provided any basis to overturn the past decision regarding these matters.

    Please Keep out of australias treasures we are destroying the absolute wonders of our country. Shame shame shame!!!!!

Yours sincerely, Robyn Brearley

Dear Mr Forward,

Submission Opposing the Department of Planning and Environment recommendation - Invincible Extension Project 07_0127 MOD 5 (D490/17)

I object to the proposed modification of the Invincible coal mine. Open-cut coal mining should not recommence in this sensitive part of the Gardens of Stone region. In October 2014 the Commission said that the “highest and best use of the area is for conservation purposes” and that ruling is not changed by the Department of Planning and Environment's (the Department's) recommendation.

It would be inappropriate to reverse the Commission's 2013 and 2014 decisions that had rejected open-cut mining in this 50 hectare area, as well as other areas of public forest. I strongly oppose this Department's recommendation to expand the open-cut area and continue coal production for eight years. As Commissioners' would appreciate, approval of this modification is likely to lead to incremental mine development, and the Department of Planning and Environment is opposed to a series of incremental increases in open-cut coal mining in the Ben Bullen State Forest.

Manildra (Castlereagh Coal) has made the open-cut proposal small (50ha) while at the same time it has applied for access to coal resources in 1,368 hectares around the proposed mine site. Manildra has been granted coal exploration licences Nos. 8618 and 8619 over much of the Ben Bullen State Forest that is of high conservation value. When the modification is read in this context it is obvious that it is not a different proposal from the proposals previously rejected for this mine site.

Coal from Manildra’s open-cut Invincible mine will be more expensive in terms of overall costs, when the environment is taken into account, than coal from existing operating mines that can meet the requirements of Manildra's Bomaderry plant.

Approving Manildra’s 50 hectare open-cut proposal will impose adverse environmental outcomes upon this outstanding natural area. The true cost of damage to the natural environment cannot be compensated by offsets, contrary to the assertions made by the Department.

The Ben Bullen pagoda landscape is unique, irreplaceable and covers a small area of which the woodlands affected by the proposed Invincible open-cut mining operation is a key part. The modification proposal is a key part of the only area where grassy tableland woodlands adjoin pagodas. This woodland is an integral part of this pagoda landscape and its loss will compromise this beautiful pagoda landscape.

The Planning Assessment Commission correctly observed in 2012 and confirmed 2014 that the pagoda landscape consists of the pagodas and woodlands below

Submission Opposing the Department of Planning and Environment recommendation - Invincible Extension Project 07_0127 MOD 5 (D490/17)

I object to the proposed modification of the Invincible coal mine. Open-cut coal mining should not recommence in this sensitive part of the Gardens of Stone region. In October 2014 the Commission said that the “highest and best use of the area is for conservation purposes” and that ruling is not changed by the Department of Planning and Environment's (the Department's) recommendation.

It would be inappropriate to reverse the Commission's 2013 and 2014 decisions that had rejected open-cut mining in this 50 hectare area, as well as other areas of public forest. I strongly oppose this Department's recommendation to expand the open-cut area and continue coal production for eight years. As Commissioners' would appreciate, approval of this modification is likely to lead to incremental mine development, and the Department of Planning and Environment is opposed to a series of incremental increases in open-cut coal mining in the Ben Bullen State Forest.

Manildra (Castlereagh Coal) has made the open-cut proposal small (50ha) while at the same time it has applied for access to coal resources in 1,368 hectares around the proposed mine site. Manildra has been granted coal exploration licences Nos. 8618 and 8619 over much of the Ben Bullen State Forest that is of high conservation value. When the modification is read in this context it is obvious that it is not a different proposal from the proposals previously rejected for this mine site.

Coal from Manildra’s open-cut Invincible mine will be more expensive in terms of overall costs, when the environment is taken into account, than coal from existing operating mines that can meet the requirements of Manildra's Bomaderry plant.

Approving Manildra’s 50 hectare open-cut proposal will impose adverse environmental outcomes upon this outstanding natural area. The true cost of damage to the natural environment cannot be compensated by offsets, contrary to the assertions made by the Department.

The Ben Bullen pagoda landscape is unique, irreplaceable and covers a small area of which the woodlands affected by the proposed Invincible open-cut mining operation is a key part. The modification proposal is a key part of the only area where grassy tableland woodlands adjoin pagodas. This woodland is an integral part of this pagoda landscape and its loss will compromise this beautiful pagoda landscape.

The Planning Assessment Commission correctly observed in 2012 and confirmed 2014 that the pagoda landscape consists of the pagodas and woodlands below
them. The pagoda rock features cannot be considered in isolation from the surrounding woodlands that are proposed to be mined. The buffer debate was part of the previous PAC review and determination that refused consent.

Further, ecosystems cannot be replanted after open-cut mining. The proposed biodiversity offsets do not replace the unique Ben Bullen pagoda landscape. The proposed offsets are irrelevant to conservation of this pagoda landscape.

Please uphold the previous decisions of the PAC. No new evidence or Departmental analysis has come forward that could overturn the last PAC determination. Refuse consent for the proposed Invincible mine, modification 5 as the applicant and Department of Planning and Environment have not provided any basis to overturn the past decision regarding these matters.

The Commission may publish my name, location and this submission. Thank you for the opportunity to comment on this mining proposal. coal is not the way of the future it is the past move forward not backwards

Yours sincerely,

Pat Tomkinson

Manildra has been granted coal exploration licences Nos. 8618 and 8619 over much of the Ben Bullen State Forest that is of high conservation value. When the modification is read in this context it is obvious that it is not a different proposal from the proposals previously rejected for this mine site.

Coal from Manildra’s open-cut Invincible mine will be more expensive in terms of overall costs, when the environment is taken into account, than coal from existing operating mines that can meet the requirements of Manildra's Bomaderry plant.

Approving Manildra’s 50 hectare open-cut proposal will impose adverse environmental outcomes upon this outstanding natural area. The true cost of damage to the natural environment cannot be compensated by offsets, contrary to the assertions made by the Department.

The Ben Bullen pagoda landscape is unique, irreplaceable and covers a small area of which the woodlands affected by the proposed Invincible open-cut mining operation is a key part. The modification proposal is a key part of the only area where grassy tableland woodlands adjoin pagodas. This woodland is an integral part of this pagoda landscape and its loss will compromise this beautiful pagoda landscape.

The Planning Assessment Commission correctly observed in 2012 and confirmed 2014 that the pagoda landscape consists of the pagodas and woodlands below
them. The pagoda rock features cannot be considered in isolation from the surrounding woodlands that are proposed to be mined. The buffer debate was part of the previous PAC review and determination that refused consent.

Further, ecosystems cannot be replanted after open-cut mining. The proposed biodiversity offsets do not replace the unique Ben Bullen pagoda landscape. The proposed offsets are irrelevant to conservation of this pagoda landscape.

Please uphold the previous decisions of the PAC. No new evidence or Departmental analysis has come forward that could overturn the last PAC determination. Refuse consent for the proposed Invincible mine, modification 5 as the applicant and Department of Planning and Environment have not provided any basis to overturn the past decision regarding these matters.

The Commission may publish my name, location and this submission. Thank you for the opportunity to comment on this mining proposal.

Yours sincerely,

Ann Brownlie
Submission Opposing the Department of Planning and Environment recommendation - Invincible Extension Project 07_0127 MOD 5 (D490/17)

I object to the proposed modification of the Invincible coal mine. Open-cut coal mining should not recommence in this sensitive part of the Gardens of Stone region. In October 2014 the Commission said that the “highest and best use of the area is for conservation purposes” and that ruling is not changed by the Department of Planning and Environment’s (the Department’s) recommendation.

It would be inappropriate to reverse the Commission's 2013 and 2014 decisions that had rejected open-cut mining in this 50 hectare area, as well as other areas of public forest. I strongly oppose this Department's recommendation to expand the open-cut area and continue coal production for eight years. As Commissioners' would appreciate, approval of this modification is likely to lead to incremental mine development, and the Department of Planning and Environment is opposed to a series of incremental increases in open-cut coal mining in the Ben Bullen State Forest.

Manildra (Castlereagh Coal) has made the open-cut proposal small (50ha) while at the same time it has applied for access to coal resources in 1,368 hectares around the proposed mine site. Manildra has been granted coal exploration licences Nos. 8618 and 8619 over much of the Ben Bullen State Forest that is of high conservation value. When the modification is read in this context it is obvious that it is not a different proposal from the proposals previously rejected for this mine site.

Coal from Manildra’s open-cut Invincible mine will be more expensive in terms of overall costs, when the environment is taken into account, than coal from existing operating mines that can meet the requirements of Manildra's Bomaderry plant.

Approving Manildra’s 50 hectare open-cut proposal will impose adverse environmental outcomes upon this outstanding natural area. The true cost of damage to the natural environment cannot be compensated by offsets, contrary to the assertions made by the Department.

The Ben Bullen pagoda landscape is unique, irreplaceable and covers a small area of which the woodlands affected by the proposed Invincible open-cut mining operation is a key part. The modification proposal is a key part of the only area where grassy tableland woodlands adjoin pagodas. This woodland is an integral part of this pagoda landscape and its loss will compromise this beautiful pagoda landscape.

The Planning Assessment Commission correctly observed in 2012 and confirmed 2014 that the pagoda landscape consists of the pagodas and woodlands below...
them. The pagoda rock features cannot be considered in isolation from the surrounding woodlands that are proposed to be mined. The buffer debate was part of the previous PAC review and determination that refused consent.

Further, ecosystems cannot be replanted after open-cut mining. The proposed biodiversity offsets do not replace the unique Ben Bullen pagoda landscape. The proposed offsets are irrelevant to conservation of this pagoda landscape.

Please uphold the previous decisions of the PAC. No new evidence or Departmental analysis has come forward that could overturn the last PAC determination. Refuse consent for the proposed Invincible mine, modification 5 as the applicant and Department of Planning and Environment have not provided any basis to overturn the past decision regarding these matters.

The Commission may publish my name, location and this submission. Thank you for the opportunity to comment on this mining proposal.

It is time to re-evaluate the way we so easily approve coal mines across Australia. Not only are we risking diverse environmental landscapes, we put at risk the heritage value of these areas. Once that is gone, it can never be replaced. We all know there is a huge swing to sustainable energy and we know that thermal coal must not play a part of our future. A stand needs to be made now. Protect this unique environment. Oppose Manildras mine expansion.

Yours sincerely,
Kristen Davey

Dear Mr Forward,

Submission Opposing the Department of Planning and Environment recommendation - Invincible Extension Project 07_0127 MOD 5 (D490/17)

I object to the proposed modification of the Invincible coal mine. Open-cut coal mining should not recommence in this sensitive part of the Gardens of Stone region. In October 2014 the Commission said that the “highest and best use of the area is for conservation purposes” and that ruling is not changed by the Department of Planning and Environment's (the Department's) recommendation.

It would be inappropriate to reverse the Commission's 2013 and 2014 decisions that had rejected open-cut mining in this 50 hectare area, as well as other areas of public forest. I strongly oppose this Department's recommendation to expand the open-cut area and continue coal production for eight years. As Commissioners' would appreciate, approval of this modification is likely to lead to incremental mine development, and the Department of Planning and Environment is opposed to a series of incremental increases in open-cut coal mining in the Ben Bullen State Forest.

Manildra (Castlereagh Coal) has made the open-cut proposal small (50ha) while at the same time it has applied for access to coal resources in 1,368 hectares around the proposed mine site. Manildra has been granted coal exploration licences Nos. 8618 and 8619 over much of the Ben Bullen State Forest that is of high conservation value. When the modification is read in this context it is obvious that it is not a different proposal from the proposals previously rejected for this mine site.

Coal from Manildra’s open-cut Invincible mine will be more expensive in terms of overall costs, when the environment is taken into account, than coal from existing operating mines that can meet the requirements of Manildra's Bomaderry plant.

Approving Manildra’s 50 hectare open-cut proposal will impose adverse environmental outcomes upon this outstanding natural area. The true cost of damage to the natural environment cannot be compensated by offsets, contrary to the assertions made by the Department.

The Ben Bullen pagoda landscape is unique, irreplaceable and covers a small area of which the woodlands affected by the proposed Invincible open-cut mining operation is a key part. The modification proposal is a key part of the only area where grassy tableland woodlands adjoin pagodas. This woodland is an integral part of this pagoda landscape and its loss will compromise this beautiful pagoda landscape.

The Planning Assessment Commission correctly observed in 2012 and confirmed 2014 that the pagoda landscape consists of the pagodas and woodlands below
them. The pagoda rock features cannot be considered in isolation from the surrounding woodlands that are proposed to be mined. The buffer debate was part of the previous PAC review and determination that refused consent.

Further, ecosystems cannot be replanted after open-cut mining. The proposed biodiversity offsets do not replace the unique Ben Bullen pagoda landscape. The proposed offsets are irrelevant to conservation of this pagoda landscape.

Please uphold the previous decisions of the PAC. No new evidence or Departmental analysis has come forward that could overturn the last PAC determination. Refuse consent for the proposed Invincible mine, modification 5 as the applicant and Department of Planning and Environment have not provided any basis to overturn the past decision regarding these matters.

The Commission may publish my name, location and this submission. Thank you for the opportunity to comment on this mining proposal.

Yours sincerely,

William Wilkie

Dear Mr Forward,

Submission Opposing the Department of Planning and Environment recommendation  
- Invincible Extension Project 07_0127 MOD 5 (D490/17)

I strongly object to the proposal of a 50 hectare open cut mine in the Garden of Stone area. The project is unsound on both economical and ecological grounds.

The area is STUNNING. In its natural state the area has potential for income from ecotourism, indefinitely. An open cut mine there would destroy the area permanently, losing untold revenue, for possible short term gain. Others will show how the coal is not required and how existing operations cover the demand for coal. That market is unlikely to expand. So, for dubious profits of a limited duration, an asset of definite worth in perpetuity would be destroyed, if the proposal goes ahead. What a legacy to leave!

Please do not approve the development submission for little or no short term gain and definite long term loss.

The Commission may publish my name, location and this submission. Thank you for the opportunity to comment on this mining proposal.

Yours sincerely,

Julie Reynolds

It would be inappropriate to reverse the Commission's 2013 and 2014 decisions that had rejected open-cut mining in this 50 hectare area, as well as other areas of public forest. I strongly oppose this Department's recommendation to expand the open-cut area and continue coal production for eight years. As Commissioners' would appreciate, approval of this modification is likely to lead to incremental mine development, and the Department of Planning and Environment is opposed to a series of incremental increases in open-cut coal mining in the Ben Bullen State Forest.

Manildra (Castlereagh Coal) has made the open-cut proposal small (50ha) while at the same time it has applied for access to coal resources in 1,368 hectares around the proposed mine site. Manildra has been granted coal exploration licences Nos. 8618 and 8619 over much of the Ben Bullen State Forest that is of high conservation value. When the modification is read in this context it is obvious that it is not a different proposal from the proposals previously rejected for this mine site.

Coal from Manildra’s open-cut Invincible mine will be more expensive in terms of overall costs, when the environment is taken into account, than coal from existing operating mines that can meet the requirements of Manildra's Bomaderry plant.

Approving Manildra’s 50 hectare open-cut proposal will impose adverse environmental outcomes upon this outstanding natural area. The true cost of damage to the natural environment cannot be compensated by offsets, contrary to the assertions made by the Department.

The Ben Bullen pagoda landscape is unique, irreplaceable and covers a small area of which the woodlands affected by the proposed Invincible open-cut mining operation is a key part. The modification proposal is a key part of the only area where grassy tableland woodlands adjoin pagodas. This woodland is an integral part of this pagoda landscape and its loss will compromise this beautiful pagoda landscape.

The Planning Assessment Commission correctly observed in 2012 and confirmed 2014 that the pagoda landscape consists of the pagodas and woodlands below
them. The pagoda rock features cannot be considered in isolation from the surrounding woodlands that are proposed to be mined. The buffer debate was part of the previous PAC review and determination that refused consent.

Further, ecosystems cannot be replanted after open-cut mining. The proposed biodiversity offsets do not replace the unique Ben Bullen pagoda landscape. The proposed offsets are irrelevant to conservation of this pagoda landscape.

Please uphold the previous decisions of the PAC. No new evidence or Departmental analysis has come forward that could overturn the last PAC determination. Refuse consent for the proposed Invincible mine, modification 5 as the applicant and Department of Planning and Environment have not provided any basis to overturn the past decision regarding these matters.

The Commission may publish my name, location and this submission. Thank you for the opportunity to comment on this mining proposal.

Yours sincerely,

Carly Gladwell

These sensitive areas should be kept for conservation...too much of our country is being destroyed for ever by these industries who only care about making money and dont worry about the long term conservation of the land...when our grandchildren grow up there will be little left for them to see...please do not let anymore of our sensitive areas of land get destroyed...

Yours sincerely

Linda Douglas

Manildra (Castlereagh Coal) has made the open-cut proposal small (50ha) while at the same time it has applied for access to coal resources in 1,368 hectares around the proposed mine site. Manildra has been granted coal exploration licences Nos. 8618 and 8619 over much of the Ben Bullen State Forest that is of high conservation value. When the modification is read in this context it is obvious that it is not a different proposal from the proposals previously rejected for this mine site.

Coal from Manildra’s open-cut Invincible mine will be more expensive in terms of overall costs, when the environment is taken into account, than coal from existing operating mines that can meet the requirements of Manildra's Bomaderry plant.

Approving Manildra’s 50 hectare open-cut proposal will impose adverse environmental outcomes upon this outstanding natural area. The true cost of damage to the natural environment cannot be compensated by offsets, contrary to the assertions made by the Department.

The Ben Bullen pagoda landscape is unique, irreplaceable and covers a small area of which the woodlands affected by the proposed Invincible open-cut mining operation is a key part. The modification proposal is a key part of the only area where grassy tableland woodlands adjoin pagodas. This woodland is an integral part of this pagoda landscape and its loss will compromise this beautiful pagoda landscape.

The Planning Assessment Commission correctly observed in 2012 and confirmed in 2014 that the pagoda landscape consists of the pagodas and woodlands below
them. The pagoda rock features cannot be considered in isolation from the surrounding woodlands that are proposed to be mined. The buffer debate was part of the previous PAC review and determination that refused consent.

Further, ecosystems cannot be replanted after open-cut mining. The proposed biodiversity offsets do not replace the unique Ben Bullen pagoda landscape. The proposed offsets are irrelevant to conservation of this pagoda landscape.

Please uphold the previous decisions of the PAC. No new evidence or Departmental analysis has come forward that could overturn the last PAC determination. Refuse consent for the proposed Invincible mine, modification 5 as the applicant and Department of Planning and Environment have not provided any basis to overturn the past decision regarding these matters.

The Commission may publish my name, location and this submission. Thank you for the opportunity to comment on this mining proposal.

Yours sincerely,

Susan Horsburgh

Dear Mr Forward,

Submission Opposing the Department of Planning and Environment recommendation  
- Invincible Extension Project 07_0127 MOD 5 (D490/17)

I object to the proposed modification of the Invincible coal mine. Open-cut coal mining should not recommence in this sensitive part of the Gardens of Stone region. In October 2014 the Commission said that the “highest and best use of the area is for conservation purposes” and that ruling is not changed by the Department of Planning and Environment's (the Department's) recommendation.

It would be inappropriate to reverse the Commission's 2013 and 2014 decisions that had rejected open-cut mining in this 50 hectare area, as well as other areas of public forest. I strongly oppose this Department's recommendation to expand the open-cut area and continue coal production for eight years. As Commissioners would appreciate, approval of this modification is likely to lead to incremental mine development, and the Department of Planning and Environment is opposed to a series of incremental increases in open-cut coal mining in the Ben Bullen State Forest.

Manildra (Castlereagh Coal) has made the open-cut proposal small (50ha) while at the same time it has applied for access to coal resources in 1,368 hectares around the proposed mine site. Manildra has been granted coal exploration licences Nos. 8618 and 8619 over much of the Ben Bullen State Forest that is of high conservation value. When the modification is read in this context it is obvious that it is not a different proposal from the proposals previously rejected for this mine site.

Coal from Manildra’s open-cut Invincible mine will be more expensive in terms of overall costs, when the environment is taken into account, than coal from existing operating mines that can meet the requirements of Manildra's Bomaderry plant.

Approving Manildra’s 50 hectare open-cut proposal will impose adverse environmental outcomes upon this outstanding natural area. The true cost of damage to the natural environment cannot be compensated by offsets, contrary to the assertions made by the Department.

The Ben Bullen pagoda landscape is unique, irreplaceable and covers a small area of which the woodlands affected by the proposed Invincible open-cut mining operation is a key part. Sunday, December 3, 2017 - 14:08
Mr Paul Forward  
Chairperson  
Planning Assessment Commission  
Level 3, 201 Elizabeth Street  
Sydney NSW 2000  

Dear Mr Forward,

Submission Opposing the Department of Planning and Environment recommendation  
- Invincible Extension Project 07_0127 MOD 5 (D490/17)

I object to the proposed modification of the Invincible coal mine. Open-cut  
coal mining should not recommence in this sensitive part of the Gardens of  
Stone region. In October 2014 the Commission said that the “highest and  
best use of the area is for conservation purposes” and that ruling is not  
changed by the Department of Planning and Environment's (the Department's)  
recommendation.

It would be inappropriate to reverse the Commission's 2013 and 2014 decisions  
that had rejected open-cut mining in this 50 hectare area, as well as other  
areas of public forest. I strongly oppose this Department's recommendation to  
expand the open-cut area and continue coal production for eight years. As  
Commissioners' would appreciate, approval of this modification is likely to  
lead to incremental mine development, and the Department of Planning and  
Environment is opposed to a series of incremental increases in open-cut coal  
mining in the Ben Bullen State Forest.

Manildra (Castlereagh Coal) has made the open-cut proposal small (50ha) while  
at the same time it has applied for access to coal resources in 1,368  
hectares around the proposed mine site. Manildra has been granted coal  
exploration licences Nos. 8618 and 8619 over much of the Ben Bullen State  
Forest that is of high conservation value. When the modification is read in  
this context it is obvious that it is not a different proposal from the  
proposals previously rejected for this mine site.

Coal from Manildra’s open-cut Invincible mine will be more expensive in  
terms of overall costs, when the environment is taken into account, than coal  
from existing operating mines that can meet the requirements of Manildra's  
Bomaderry plant.

Approving Manildra’s 50 hectare open-cut proposal will impose adverse  
environmental outcomes upon this outstanding natural area. The true cost of  
damage to the natural environment cannot be compensated by offsets, contrary  
to the assertions made by the Department.

The Ben Bullen pagoda landscape is unique, irreplaceable and covers a small  
area of which the woodlands affected by the proposed Invincible open-cut  
mining operation is a key part. The modification proposal is a key part of  
the only area where grassy tableland woodlands adjoin pagodas. This woodland  
is an integral part of this pagoda landscape and its loss will compromise  
this beautiful pagoda landscape.

The Planning Assessment Commission correctly observed in 2012 and confirmed  
2014 that the pagoda landscape consists of the pagodas and woodlands below
them. The pagoda rock features cannot be considered in isolation from the surrounding woodlands that are proposed to be mined. The buffer debate was part of the previous PAC review and determination that refused consent.

Further, ecosystems cannot be replanted after open-cut mining. The proposed biodiversity offsets do not replace the unique Ben Bullen pagoda landscape. The proposed offsets are irrelevant to conservation of this pagoda landscape.

Please uphold the previous decisions of the PAC. No new evidence or Departmental analysis has come forward that could overturn the last PAC determination. Refuse consent for the proposed Invincible mine, modification 5 as the applicant and Department of Planning and Environment have not provided any basis to overturn the past decision regarding these matters.

The Commission may publish my name, location and this submission. Thank you for the opportunity to comment on this mining proposal. This ancient and magnificent area should not be defiled for profit or greed, or any other reason. We must think of the future now more than ever and leave heritage to our children and theirs. Yours sincerely,

Robyn Florence

Dear Mr Forward,

Submission Opposing the Department of Planning and Environment recommendation
- Invincible Extension Project 07_0127 MOD 5 (D490/17)

I object to the proposed modification of the Invincible coal mine. Open-cut coal mining should not recommence in this sensitive part of the Gardens of Stone region. In October 2014 the Commission said that the “highest and best use of the area is for conservation purposes” and that ruling is not changed by the Department of Planning and Environment's (the Department's) recommendation.

It would be inappropriate to reverse the Commission's 2013 and 2014 decisions that had rejected open-cut mining in this 50 hectare area, as well as other areas of public forest. I strongly oppose this Department's recommendation to expand the open-cut area and continue coal production for eight years. As Commissioners' would appreciate, approval of this modification is likely to lead to incremental mine development, and the Department of Planning and Environment is opposed to a series of incremental increases in open-cut coal mining in the Ben Bullen State Forest.

Manildra (Castlereagh Coal) has made the open-cut proposal small (50ha) while at the same time it has applied for access to coal resources in 1,368 hectares around the proposed mine site. Manildra has been granted coal exploration licences Nos. 8618 and 8619 over much of the Ben Bullen State Forest that is of high conservation value. When the modification is read in this context it is obvious that it is not a different proposal from the proposals previously rejected for this mine site.

Coal from Manildra’s open-cut Invincible mine will be more expensive in terms of overall costs, when the environment is taken into account, than coal from existing operating mines that can meet the requirements of Manildra's Bomaderry plant.

Approving Manildra’s 50 hectare open-cut proposal will impose adverse environmental outcomes upon this outstanding natural area. The true cost of damage to the natural environment cannot be compensated by offsets, contrary to the assertions made by the Department.

The Ben Bullen pagoda landscape is unique, irreplaceable and covers a small area of which the woodlands affected by the proposed Invincible open-cut mining operation is a key part. The modification proposal is a key part of the only area where grassy tableland woodlands adjoin pagodas. This woodland is an integral part of this pagoda landscape and its loss will compromise this beautiful pagoda landscape.

The Planning Assessment Commission correctly observed in 2012 and confirmed 2014 that the pagoda landscape consists of the pagodas and woodlands below
them. The pagoda rock features cannot be considered in isolation from the surrounding woodlands that are proposed to be mined. The buffer debate was part of the previous PAC review and determination that refused consent.

Further, ecosystems cannot be replanted after open-cut mining. The proposed biodiversity offsets do not replace the unique Ben Bullen pagoda landscape. The proposed offsets are irrelevant to conservation of this pagoda landscape.

Please uphold the previous decisions of the PAC. No new evidence or Departmental analysis has come forward that could overturn the last PAC determination. Refuse consent for the proposed Invincible mine, modification 5 as the applicant and Department of Planning and Environment have not provided any basis to overturn the past decision regarding these matters.

The Commission may publish my name, location and this submission. Thank you for the opportunity to comment on this mining proposal.

Yours sincerely,

Rosanne Newton

Mr Paul Forward  
Chairperson  
Planning Assessment Commission  
Level 3, 201 Elizabeth Street  
Sydney NSW 2000

Dear Mr Forward,

Submission Opposing the Department of Planning and Environment recommendation  
- Invincible Extension Project 07_0127 MOD 5 (D490/17)

I object to the proposed modification of the Invincible coal mine. Open-cut  
coal mining should not recommence in this sensitive part of the Gardens of  
Stone region. In October 2014 the Commission said that the “highest and  
best use of the area is for conservation purposes” and that ruling is not  
changed by the Department of Planning and Environment's (the Department's)  
recommendation.

It would be inappropriate to reverse the Commission's 2013 and 2014 decisions  
that had rejected open-cut mining in this 50 hectare area, as well as other  
areas of public forest. I strongly oppose this Department's recommendation to  
expand the open-cut area and continue coal production for eight years. As  
Commissioners' would appreciate, approval of this modification is likely to  
lead to incremental mine development, and the Department of Planning and  
Environment is opposed to a series of incremental increases in open-cut coal  
mining in the Ben Bullen State Forest.

Manildra (Castlereagh Coal) has made the open-cut proposal small (50ha) while  
at the same time it has applied for access to coal resources in 1,368  
hectares around the proposed mine site. Manildra has been granted coal  
exploration licences Nos. 8618 and 8619 over much of the Ben Bullen State  
Forest that is of high conservation value. When the modification is read in  
this context it is obvious that it is not a different proposal from the  
proposals previously rejected for this mine site.

Coal from Manildra’s open-cut Invincible mine will be more expensive in  
terms of overall costs, when the environment is taken into account, than coal  
from existing operating mines that can meet the requirements of Manildra's  
Bomaderry plant.

Approving Manildra’s 50 hectare open-cut proposal will impose adverse  
environmental outcomes upon this outstanding natural area. The true cost of  
damage to the natural environment cannot be compensated by offsets, contrary  
to the assertions made by the Department.

The Ben Bullen pagoda landscape is unique, irreplaceable and covers a small  
area of which the woodlands affected by the proposed Invincible open-cut  
mining operation is a key part. The modification proposal is a key part of  
the only area where grassy tableland woodlands adjoin pagodas. This woodland  
is an integral part of this pagoda landscape and its loss will compromise  
this beautiful pagoda landscape.

The Planning Assessment Commission correctly observed in 2012 and confirmed  
2014 that the pagoda landscape consists of the pagodas and woodlands below
them. The pagoda rock features cannot be considered in isolation from the surrounding woodlands that are proposed to be mined. The buffer debate was part of the previous PAC review and determination that refused consent.

Further, ecosystems cannot be replanted after open-cut mining. The proposed biodiversity offsets do not replace the unique Ben Bullen pagoda landscape. The proposed offsets are irrelevant to conservation of this pagoda landscape.

Please uphold the previous decisions of the PAC. No new evidence or Departmental analysis has come forward that could overturn the last PAC determination. Refuse consent for the proposed Invincible mine, modification 5 as the applicant and Department of Planning and Environment have not provided any basis to overturn the past decision regarding these matters.

The Commission may publish my name, location and this submission. Thank you for the opportunity to comment on this mining proposal.

Yours sincerely,

Miguel Kelly

It would be inappropriate to reverse the Commission's 2013 and 2014 decisions that had rejected open-cut mining in this 50 hectare area, as well as other areas of public forest. I strongly oppose this Department's recommendation to expand the open-cut area and continue coal production for eight years. As Commissioners' would appreciate, approval of this modification is likely to lead to incremental mine development, and the Department of Planning and Environment is opposed to a series of incremental increases in open-cut coal mining in the Ben Bullen State Forest.

Manildra (Castlereagh Coal) has made the open-cut proposal small (50ha) while at the same time it has applied for access to coal resources in 1,368 hectares around the proposed mine site. Manildra has been granted coal exploration licences Nos. 8618 and 8619 over much of the Ben Bullen State Forest that is of high conservation value. When the modification is read in this context it is obvious that it is not a different proposal from the proposals previously rejected for this mine site.

Coal from Manildra’s open-cut Invincible mine will be more expensive in terms of overall costs, when the environment is taken into account, than coal from existing operating mines that can meet the requirements of Manildra's Bomaderry plant.

Approving Manildra’s 50 hectare open-cut proposal will impose adverse environmental outcomes upon this outstanding natural area. The true cost of damage to the natural environment cannot be compensated by offsets, contrary to the assertions made by the Department.

The Ben Bullen pagoda landscape is unique, irreplaceable and covers a small area of which the woodlands affected by the proposed Invincible open-cut mining operation is a key part. The modification proposal is a key part of the only area where grassy tableland woodlands adjoin pagodas. This woodland is an integral part of this pagoda landscape and its loss will compromise this beautiful pagoda landscape.

The Planning Assessment Commission correctly observed in 2012 and confirmed 2014 that the pagoda landscape consists of the pagodas and woodlands below
them. The pagoda rock features cannot be considered in isolation from the surrounding woodlands that are proposed to be mined. The buffer debate was part of the previous PAC review and determination that refused consent.

Further, ecosystems cannot be replanted after open-cut mining. The proposed biodiversity offsets do not replace the unique Ben Bullen pagoda landscape. The proposed offsets are irrelevant to conservation of this pagoda landscape.

Please uphold the previous decisions of the PAC. No new evidence or Departmental analysis has come forward that could overturn the last PAC determination. Refuse consent for the proposed Invincible mine, modification 5 as the applicant and Department of Planning and Environment have not provided any basis to overturn the past decision regarding these matters.

The Commission may publish my name, location and this submission. Thank you for the opportunity to comment on this mining proposal.

Yours sincerely,
Angela

Dear Mr Forward,  

Submission Opposing the Department of Planning and Environment recommendation - Invincible Extension Project 07_0127 MOD 5 (D490/17)  

I object to the proposed modification of the Invincible coal mine. Open-cut coal mining should not recommence in this sensitive part of the Gardens of Stone region. In October 2014 the Commission said that the “highest and best use of the area is for conservation purposes” and that ruling is not changed by the Department of Planning and Environment's (the Department’s) recommendation.

It would be inappropriate to reverse the Commission's 2013 and 2014 decisions that had rejected open-cut mining in this 50 hectare area, as well as other areas of public forest. I strongly oppose this Department's recommendation to expand the open-cut area and continue coal production for eight years. As Commissioners' would appreciate, approval of this modification is likely to lead to incremental mine development, and the Department of Planning and Environment is opposed to a series of incremental increases in open-cut coal mining in the Ben Bullen State Forest.

Manildra (Castlereagh Coal) has made the open-cut proposal small (50ha) while at the same time it has applied for access to coal resources in 1,368 hectares around the proposed mine site. Manildra has been granted coal exploration licences Nos. 8618 and 8619 over much of the Ben Bullen State Forest that is of high conservation value. When the modification is read in this context it is obvious that it is not a different proposal from the proposals previously rejected for this mine site.

Coal from Manildra’s open-cut Invincible mine will be more expensive in terms of overall costs, when the environment is taken into account, than coal from existing operating mines that can meet the requirements of Manildra's Bomaderry plant.

Approving Manildra’s 50 hectare open-cut proposal will impose adverse environmental outcomes upon this outstanding natural area. The true cost of damage to the natural environment cannot be compensated by offsets, contrary to the assertions made by the Department.

The Ben Bullen pagoda landscape is unique, irreplaceable and covers a small area of which the woodlands affected by the proposed Invincible open-cut mining operation is a key part. The modification proposal is a key part of the only area where grassy tableland woodlands adjoin pagodas. This woodland is an integral part of this pagoda landscape and its loss will compromise this beautiful pagoda landscape.

The Planning Assessment Commission correctly observed in 2012 and confirmed 2014 that the pagoda landscape consists of the pagodas and woodlands below
them. The pagoda rock features cannot be considered in isolation from the surrounding woodlands that are proposed to be mined. The buffer debate was part of the previous PAC review and determination that refused consent.

Further, ecosystems cannot be replanted after open-cut mining. The proposed biodiversity offsets do not replace the unique Ben Bullen pagoda landscape. The proposed offsets are irrelevant to conservation of this pagoda landscape.

Please uphold the previous decisions of the PAC. No new evidence or Departmental analysis has come forward that could overturn the last PAC determination. Refuse consent for the proposed Invincible mine, modification 5 as the applicant and Department of Planning and Environment have not provided any basis to overturn the past decision regarding these matters.

The Commission may publish my name, location and this submission. Thank you for the opportunity to comment on this mining proposal.

Yours sincerely,

Penny Osterhaus

Sydney NSW 2000

Dear Mr Forward,

Submission Opposing the Department of Planning and Environment recommendation  
- Invincible Extension Project 07_0127 MOD 5 (D490/17)

I object to the proposed modification of the Invincible coal mine. Open-cut coal mining should not recommence in this sensitive part of the Gardens of Stone region. In October 2014 the Commission said that the “highest and best use of the area is for conservation purposes” and that ruling is not changed by the Department of Planning and Environment's (the Department's) recommendation.

It would be inappropriate to reverse the Commission's 2013 and 2014 decisions that had rejected open-cut mining in this 50 hectare area, as well as other areas of public forest. I strongly oppose this Department's recommendation to expand the open-cut area and continue coal production for eight years. As Commissioners' would appreciate, approval of this modification is likely to lead to incremental mine development, and the Department of Planning and Environment is opposed to a series of incremental increases in open-cut coal mining in the Ben Bullen State Forest.

Manildra (Castlereagh Coal) has made the open-cut proposal small (50ha) while at the same time it has applied for access to coal resources in 1,368 hectares around the proposed mine site. Manildra has been granted coal exploration licences Nos. 8618 and 8619 over much of the Ben Bullen State Forest that is of high conservation value. When the modification is read in this context it is obvious that it is not a different proposal from the proposals previously rejected for this mine site.

Coal from Manildra’s open-cut Invincible mine will be more expensive in terms of overall costs, when the environment is taken into account, than coal from existing operating mines that can meet the requirements of Manildra's Bomaderry plant.

Approving Manildra’s 50 hectare open-cut proposal will impose adverse environmental outcomes upon this outstanding natural area. The true cost of damage to the natural environment cannot be compensated by offsets, contrary to the assertions made by the Department.

The Ben Bullen pagoda landscape is unique, irreplaceable and covers a small area of which the woodlands affected by the proposed Invincible open-cut mining operation is a key part. The modification proposal is a key part of the only area where grassy tableland woodlands adjoin pagodas. This woodland is an integral part of this pagoda landscape and its loss will compromise this beautiful pagoda landscape.

The Planning Assessment Commission correctly observed in 2012 and confirmed 2014 that the pagoda landscape consists of the pagodas and woodlands below
them. The pagoda rock features cannot be considered in isolation from the surrounding woodlands that are proposed to be mined. The buffer debate was part of the previous PAC review and determination that refused consent.

Further, ecosystems cannot be replanted after open-cut mining. The proposed biodiversity offsets do not replace the unique Ben Bullen pagoda landscape. The proposed offsets are irrelevant to conservation of this pagoda landscape.

Please uphold the previous decisions of the PAC. No new evidence or Departmental analysis has come forward that could overturn the last PAC determination. Refuse consent for the proposed Invincible mine, modification 5 as the applicant and Department of Planning and Environment have not provided any basis to overturn the past decision regarding these matters.

The Commission may publish my name, location and this submission. Thank you for the opportunity to comment on this mining proposal.

Yours sincerely,
Suzanne Peel

Mr Paul Forward  
Chairperson  
Planning Assessment Commission  
Level 3, 201 Elizabeth Street  
Sydney NSW 2000

Dear Mr Forward,

Submission Opposing the Department of Planning and Environment recommendation  
- Invincible Extension Project 07_0127 MOD 5 (D490/17)

I am writing to object to the proposed modification of the Invincible coal mine. I am of the firm view that open-cut coal mining should not recommence in this sensitive part of the Gardens of Stone region. In October 2014 the Commission said that the “highest and best use of the area is for conservation purposes” and that ruling is not changed by the Department of Planning and Environment's (the Department's) recommendation.

The Commission's 2013 and 2014 decisions that had rejected open-cut mining in this 50 hectare area, as well as other areas of public forest should not be reversed or ignored. I strongly oppose this Department's recommendation to expand the open-cut area and continue coal production for eight years. It is likely that approval of this modification will lead to incremental mine development, and the Department of Planning and Environment is opposed to a series of incremental increases in open-cut coal mining in the Ben Bullen State Forest. Commissioners are no doubt aware of this.

Manildra (Castlereagh Coal) has made the open-cut proposal small (50ha) while at the same time it has applied for access to coal resources in 1,368 hectares around the proposed mine site. Manildra has been granted coal exploration licences Nos. 8618 and 8619 over much of the Ben Bullen State Forest that is of high conservation value. When the modification is read in this context it is very clear that this is not a different proposal from those previously rejected for this mine site.

Coal from Manildra’s open-cut Invincible mine will be more expensive in terms of overall costs, when the environment is taken into account, than coal from existing operating mines that can meet the requirements of Manildra's Bomaderry plant.

Approving Manildra’s 50 hectare open-cut proposal will create adverse environmental outcomes upon this outstanding natural area. The true cost of damage to the natural environment cannot be compensated by offsets, contrary to the assertions made by the Department.

The Ben Bullen pagoda landscape is unique, irreplaceable and covers a small area of which the woodlands affected by the proposed Invincible open-cut mining operation is a key part. The modification proposal is a key part of the only area where grassy tableland woodlands adjoin pagodas. This woodland is an integral part of this pagoda landscape and its loss will compromise this beautiful pagoda landscape.

The Planning Assessment Commission correctly observed in 2012 and confirmed 2014 that the pagoda landscape consists of the pagodas and woodlands below
them. The pagoda rock features cannot be considered in isolation from the surrounding woodlands that are proposed to be mined. The buffer debate was part of the previous PAC review and determination that refused consent.

Further, ecosystems cannot be replanted after open-cut mining. The proposed biodiversity offsets do not replace the unique Ben Bullen pagoda landscape. The proposed offsets are irrelevant to conservation of this pagoda landscape.

Please uphold the previous decisions of the PAC. No new evidence or Departmental analysis has come forward that could overturn the last PAC determination. Refuse consent for the proposed Invincible mine, modification 5 as the applicant and Department of Planning and Environment have not provided any basis to overturn the past decision regarding these matters.

The Commission may publish my name, location and this submission. Thank you for the opportunity to comment on this mining proposal.

Subject: Submission opposing the Department of Planning and Environment’s assessment of Invincible Colliery 07_0127 Mod 5 (D490/17)
Date: Sunday, 3 December 2017 11:57:19 AM

Dear Mr Forward,

Submission Opposing the Department of Planning and Environment recommendation - Invincible Extension Project 07_0127 MOD 5 (D490/17)

I object to the proposed modification of the Invincible coal mine.

The Gardens of Stone region must be protected for its conservation values, not subjected to destructive coal mining development. I believe that in 2017 NSW must stop developing coal resources in favour of renewable energy projects to contribute to the global efforts to reduce carbon emissions which are warming the planet beyond the 1.5 degree celsius limit agreed in 2016 by Australia in Paris. Continuing to develop coal mines in a climate impacted world is a crime against humanity and nature.

Please reject the Invincible Extension Project 07_0127 MOD 5 (D490/17).

Open-cut coal mining should not recommence in this sensitive part of the Gardens of Stone region. In October 2014 the Commission said that the “highest and best use of the area is for conservation purposes” and that ruling is not changed by the Department of Planning and Environment's (the Department's) recommendation.

It would be inappropriate to reverse the Commission's 2013 and 2014 decisions that had rejected open-cut mining in this 50 hectare area, as well as other areas of public forest. I strongly oppose this Department's recommendation to expand the open-cut area and continue coal production for eight years. As Commissioners' would appreciate, approval of this modification is likely to lead to incremental mine development, and the Department of Planning and Environment is opposed to a series of incremental increases in open-cut coal mining in the Ben Bullen State Forest.

Manildra (Castlereagh Coal) has made the open-cut proposal small (50ha) while at the same time it has applied for access to coal resources in 1,368 hectares around the proposed mine site. Manildra has been granted coal exploration licences Nos. 8618 and 8619 over much of the Ben Bullen State Forest that is of high conservation value. When the modification is read in this context it is obvious that it is not a different proposal from the proposals previously rejected for this mine site.

Coal from Manildra’s open-cut Invincible mine will be more expensive in terms of overall costs, when the environment is taken into account, than coal from existing operating mines that can meet the requirements of Manildra's Bomaderry plant.

Approving Manildra’s 50 hectare open-cut proposal will impose adverse environmental outcomes upon this outstanding natural area. The true cost of damage to the natural environment cannot be compensated by offsets, contrary
to the assertions made by the Department.

The Ben Bullen pagoda landscape is unique, irreplaceable and covers a small area of which the woodlands affected by the proposed Invincible open-cut mining operation is a key part. I strongly oppose this Department's recommendation to expand the open-cut area and continue coal production for eight years. As Commissioners' would appreciate, approval of this modification is likely to lead to incremental mine development, and the Department of Planning and Environment is opposed to a series of incremental increases in open-cut coal mining in the Ben Bullen State Forest.

Manildra (Castlereagh Coal) has made the open-cut proposal small (50ha) while at the same time it has applied for access to coal resources in 1,368 hectares around the proposed mine site. Manildra has been granted coal exploration licences Nos. 8618 and 8619 over much of the Ben Bullen State Forest that is of high conservation value. When the modification is read in this context it is obvious that it is not a different proposal from the proposals previously rejected for this mine site.

Coal from Manildra’s open-cut Invincible mine will be more expensive in terms of overall costs, when the environment is taken into account, than coal from existing operating mines that can meet the requirements of Manildra's Bomaderry plant.

Approving Manildra’s 50 hectare open-cut proposal will impose adverse environmental outcomes upon this outstanding natural area. The true cost of damage to the natural environment cannot be compensated by offsets, contrary to the assertions made by the Department.

The Ben Bullen pagoda landscape is unique, irreplaceable and covers a small area of which the woodlands affected by the proposed Invincible open-cut mining operation is a key part. The modification proposal is a key part of the only area where grassy tableland woodlands adjoin pagodas. This woodland is an integral part of this pagoda landscape and its loss will compromise this beautiful pagoda landscape.

The Planning Assessment Commission correctly observed in 2012 and confirmed 2014 that the pagoda landscape consists of the pagodas and woodlands below
them. The pagoda rock features cannot be considered in isolation from the surrounding woodlands that are proposed to be mined. The buffer debate was part of the previous PAC review and determination that refused consent.

Further, ecosystems cannot be replanted after open-cut mining. The proposed biodiversity offsets do not replace the unique Ben Bullen pagoda landscape. The proposed offsets are irrelevant to conservation of this pagoda landscape.

Please uphold the previous decisions of the PAC. No new evidence or Departmental analysis has come forward that could overturn the last PAC determination. Refuse consent for the proposed Invincible mine, modification 5 as the applicant and Department of Planning and Environment have not provided any basis to overturn the past decision regarding these matters.

The Commission may publish my name, location and this submission. Thank you for the opportunity to comment on this mining proposal.

Yours sincerely,

Sonya Hendricks

Dear Mr Forward,

Submission Opposing the Department of Planning and Environment recommendation
- Invincible Extension Project 07_0127 MOD 5 (D490/17)

I object to the proposed modification of the Invincible coal mine. Open-cut coal mining should not recommence in this sensitive part of the Gardens of Stone region. In October 2014 the Commission said that the “highest and best use of the area is for conservation purposes” and that ruling is not changed by the Department of Planning and Environment's (the Department's) recommendation.

It would be inappropriate to reverse the Commission's 2013 and 2014 decisions that had rejected open-cut mining in this 50 hectare area, as well as other areas of public forest. I strongly oppose this Department's recommendation to expand the open-cut area and continue coal production for eight years. As Commissioners' would appreciate, approval of this modification is likely to lead to incremental mine development, and the Department of Planning and Environment is opposed to a series of incremental increases in open-cut coal mining in the Ben Bullen State Forest.

Dear Mr Forward,

Submission Opposing the Department of Planning and Environment recommendation - Invincible Extension Project 07_0127 MOD 5 (D490/17)

I object to the proposed modification of the Invincible coal mine. Open-cut coal mining should not recommence in this sensitive part of the Gardens of Stone region. In October 2014 the Commission said that the “highest and best use of the area is for conservation purposes” and that ruling is not changed by the Department of Planning and Environment's recommendation.

It would be inappropriate to reverse the Commission's 2013 and 2014 decisions that had rejected open-cut mining in this 50 hectare area, as well as other areas of public forest. I strongly oppose this Department's recommendation to expand the open-cut area and continue coal production for eight years. As Commissioners' would appreciate, approval of this modification is likely to lead to incremental mine development, and the Department of Planning and Environment is opposed to a series of incremental increases in open-cut coal mining in the Ben Bullen State Forest.

Manildra (Castlereagh Coal) has made the open-cut proposal small (50ha) while at the same time it has applied for access to coal resources in 1,368 hectares around the proposed mine site. Manildra has been granted coal exploration licences Nos. 8618 and 8619 over much of the Ben Bullen State Forest that is of high conservation value. When the modification is read in this context it is obvious that it is not a different proposal from the proposals previously rejected for this mine site.

Coal from Manildra’s open-cut Invincible mine will be more expensive in terms of overall costs, when the environment is taken into account, than coal from existing operating mines that can meet the requirements of Manildra's Bomaderry plant.

Approving Manildra’s 50 hectare open-cut proposal will impose adverse environmental outcomes upon this outstanding natural area. The true cost of damage to the natural environment cannot be compensated by offsets, contrary to the assertions made by the Department.

The Ben Bullen pagoda landscape is unique, irreplaceable and covers a small area of which the woodlands affected by the proposed Invincible open-cut mining operation is a key part. The modification proposal is a key part of the only area where grassy tableland woodlands adjoin pagodas. This woodland is an integral part of this pagoda landscape and its loss will compromise this beautiful pagoda landscape.

The Planning Assessment Commission correctly observed in 2012 and confirmed in 2014 that the pagoda landscape consists of the pagodas and woodlands below
them. The pagoda rock features cannot be considered in isolation from the surrounding woodlands that are proposed to be mined. The buffer debate was part of the previous PAC review and determination that refused consent.

Further, ecosystems cannot be replanted after open-cut mining. The proposed biodiversity offsets do not replace the unique Ben Bullen pagoda landscape. The proposed offsets are irrelevant to conservation of this pagoda landscape.

Please uphold the previous decisions of the PAC. No new evidence or Departmental analysis has come forward that could overturn the last PAC determination. Refuse consent for the proposed Invincible mine, modification 5 as the applicant and Department of Planning and Environment have not provided any basis to overturn the past decision regarding these matters.

The Commission may publish my name, location and this submission. Thank you for the opportunity to comment on this mining proposal. More planning, development and funding needs to be directed at innovative renewable energy sources and we wouldn’t need to keep digging up and selling off our resources.

Yours sincerely,
Lee Gasser

I sincerely hope you adhere to the requests from those who are not supportive of the expansion of the mine. As an Australian nation we should be moving towards invasive renewables. We should be looking towards other countries who are progressing in these areas at a great rate who are researching and producing other ways of creating energy. Not holding fast to the ways of the Coal Age. We present ourselves globally as the backward country. It's time to stop thinking short term destruction to fulfill corporate needs and progress as an intelligent nation working in a non evasive, non destructive way.

Yours sincerely,

Deanne Eccles

As Commissioners' would appreciate, approval of this modification is likely to lead to incremental mine development, and the Department of Planning and Environment is opposed to a series of incremental increases in open-cut coal mining in the Ben Bullen State Forest.

Manildra (Castlereagh Coal) has made the open-cut proposal small (50ha) while at the same time it has applied for access to coal resources in 1,368 hectares around the proposed mine site. Manildra has been granted coal exploration licences Nos. 8618 and 8619 over much of the Ben Bullen State Forest that is of high conservation value. When the modification is read in this context it is obvious that it is not a different proposal from the proposals previously rejected for this mine site.

Coal from Manildra’s open-cut Invincible mine will be more expensive in terms of overall costs, when the environment is taken into account, than coal from existing operating mines that can meet the requirements of Manildra's Bomaderry plant.

Approving Manildra’s 50 hectare open-cut proposal will impose adverse environmental outcomes upon this outstanding natural area. The true cost of damage to the natural environment cannot be compensated by offsets, contrary to the assertions made by the Department.

The Ben Bullen pagoda landscape is unique, irreplaceable and covers a small area of which the woodlands affected by the proposed Invincible open-cut mining operation is a key part. The modification proposal is a key part of the only area where grassy tableland woodlands adjoin pagodas. This woodland is an integral part of this pagoda landscape and its loss will compromise this beautiful pagoda landscape.

The Planning Assessment Commission correctly observed in 2012 and confirmed 2014 that the pagoda landscape consists of the pagodas and woodlands below
them. The pagoda rock features cannot be considered in isolation from the surrounding woodlands that are proposed to be mined. The buffer debate was part of the previous PAC review and determination that refused consent.

Further, ecosystems cannot be replanted after open-cut mining. The proposed biodiversity offsets do not replace the unique Ben Bullen pagoda landscape. The proposed offsets are irrelevant to conservation of this pagoda landscape.

Please uphold the previous decisions of the PAC. No new evidence or Departmental analysis has come forward that could overturn the last PAC determination. Refuse consent for the proposed Invincible mine, modification 5 as the applicant and Department of Planning and Environment have not provided any basis to overturn the past decision regarding these matters.

The Commission may publish my name, location and this submission. Thank you for the opportunity to comment on this mining proposal.

Yours sincerely,

Bill Mann

Submission Opposing the Department of Planning and Environment recommendation - Invincible Extension Project 07_0127 MOD 5 (D490/17)

I object to the proposed modification of the Invincible coal mine. Open-cut coal mining should not recommence in this sensitive part of the Gardens of Stone region. In October 2014 the Commission said that the “highest and best use of the area is for conservation purposes” and that ruling is not changed by the Department of Planning and Environment's (the Department's) recommendation.

It would be inappropriate to reverse the Commission's 2013 and 2014 decisions that had rejected open-cut mining in this 50 hectare area, as well as other areas of public forest. I strongly oppose this Department's recommendation to expand the open-cut area and continue coal production for eight years. As Commissioners' would appreciate, approval of this modification is likely to lead to incremental mine development, and the Department of Planning and Environment is opposed to a series of incremental increases in open-cut coal mining in the Ben Bullen State Forest.

Manildra (Castlereagh Coal) has made the open-cut proposal small (50ha) while at the same time it has applied for access to coal resources in 1,368 hectares around the proposed mine site. Manildra has been granted coal exploration licences Nos. 8618 and 8619 over much of the Ben Bullen State Forest that is of high conservation value. When the modification is read in this context it is obvious that it is not a different proposal from the proposals previously rejected for this mine site.

Coal from Manildra’s open-cut Invincible mine will be more expensive in terms of overall costs, when the environment is taken into account, than coal from existing operating mines that can meet the requirements of Manildra's Bomaderry plant.

Approving Manildra’s 50 hectare open-cut proposal will impose adverse environmental outcomes upon this outstanding natural area. The true cost of damage to the natural environment cannot be compensated by offsets, contrary to the assertions made by the Department.

The Ben Bullen pagoda landscape is unique, irreplaceable and covers a small area of which the woodlands affected by the proposed Invincible open-cut mining operation is a key part. The modification proposal is a key part of the only area where grassy tableland woodlands adjoin pagodas. This woodland is an integral part of this pagoda landscape and its loss will compromise this beautiful pagoda landscape.

The Planning Assessment Commission correctly observed in 2012 and confirmed 2014 that the pagoda landscape consists of the pagodas and woodlands below...
them. The pagoda rock features cannot be considered in isolation from the surrounding woodlands that are proposed to be mined. The buffer debate was part of the previous PAC review and determination that refused consent.

Further, ecosystems cannot be replanted after open-cut mining. The proposed biodiversity offsets do not replace the unique Ben Bullen pagoda landscape. The proposed offsets are irrelevant to conservation of this pagoda landscape.

Dear Mr Forward,

Submission Opposing the Department of Planning and Environment recommendation  
- Invincible Extension Project 07_0127 MOD 5 (D490/17)

We must preserve areas such as the Gardens of Stone for future generations to 
enjoy.  I object to the proposed modification of the Invincible coal mine. 
Open-cut coal mining should not recommence in this sensitive part of the 
Gardens of Stone region. In October 2014 the Commission said that the 
“highest and best use of the area is for conservation purposes” and that 
ruling is not changed by the Department of Planning and Environment's (the 
Department's) recommendation.

It would be inappropriate to reverse the Commission's 2013 and 2014 decisions 
that had rejected open-cut mining in this 50 hectare area, as well as other 
areas of public forest. I strongly oppose this Department's recommendation to 
expand the open-cut area and continue coal production for eight years. As 
Commissioners' would appreciate, approval of this modification is likely to 
lead to incremental mine development, and the Department of Planning and 
Environment is opposed to a series of incremental increases in open-cut coal 
mining in the Ben Bullen State Forest.

Manildra (Castlereagh Coal) has made the open-cut proposal small (50ha) while 
at the same time it has applied for access to coal resources in 1,368 
hectares around the proposed mine site. Manildra has been granted coal 
exploration licences Nos. 8618 and 8619 over much of the Ben Bullen State 
Forest that is of high conservation value. When the modification is read in 
this context it is obvious that it is not a different proposal from the 
proposals previously rejected for this mine site.

Coal from Manildra’s open-cut Invincible mine will be more expensive in 
terms of overall costs, when the environment is taken into account, than coal 
from existing operating mines that can meet the requirements of Manildra's 
Bomaderry plant.

Approving Manildra’s 50 hectare open-cut proposal will impose adverse 
environmental outcomes upon this outstanding natural area. The true cost of 
damage to the natural environment cannot be compensated by offsets, contrary 
to the assertions made by the Department.

The Ben Bullen pagoda landscape is unique, irreplaceable and covers a small 
area of which the woodlands affected by the proposed Invincible open-cut 
mining operation is a key part. The modification proposal is a key part of 
the only area where grassy tableland woodlands adjoin pagodas. This woodland 
is an integral part of this pagoda landscape and its loss will compromise 
this beautiful pagoda landscape.

The Planning Assessment Commission correctly observed in 2012 and confirmed
2014 that the pagoda landscape consists of the pagodas and woodlands below them. The pagoda rock features cannot be considered in isolation from the surrounding woodlands that are proposed to be mined. The buffer debate was part of the previous PAC review and determination that refused consent.

Further, ecosystems cannot be replanted after open-cut mining. The proposed biodiversity offsets do not replace the unique Ben Bullen pagoda landscape. The proposed offsets are irrelevant to conservation of this pagoda landscape.

Please uphold the previous decisions of the PAC. No new evidence or Departmental analysis has come forward that could overturn the last PAC determination. Refuse consent for the proposed Invincible mine, modification 5 as the applicant and Department of Planning and Environment have not provided any basis to overturn the past decision regarding these matters.

The Commission may publish my name, location and this submission. Thank you for the opportunity to comment on this mining proposal.

Further, ecosystems cannot be replanted after open-cut mining. The proposed biodiversity offsets do not replace the unique Ben Bullen pagoda landscape. The proposed offsets are irrelevant to conservation of this pagoda landscape.

Please uphold the previous decisions of the PAC. No new evidence or Departmental analysis has come forward that could overturn the last PAC determination. Refuse consent for the proposed Invincible mine, modification 5 as the applicant and Department of Planning and Environment have not provided any basis to overturn the past decision regarding these matters.

The Commission may publish my name, location and this submission. Thank you for the opportunity to comment on this mining proposal.

Yours sincerely, Beth Jurkiewicz

Dear Mr Forward,

Submission Opposing the Department of Planning and Environment recommendation - Invincible Extension Project 07_0127 MOD 5 (D490/17)

I object to the proposed modification of the Invincible coal mine. Open-cut coal mining should not recommence in this sensitive part of the Gardens of Stone region. In October 2014 the Commission said that the “highest and best use of the area is for conservation purposes” and that ruling is not changed by the Department of Planning and Environment's (the Department's) recommendation.

It would be inappropriate to reverse the Commission's 2013 and 2014 decisions that had rejected open-cut mining in this 50 hectare area, as well as other areas of public forest. I strongly oppose this Department's recommendation to expand the open-cut area and continue coal production for eight years. As Commissioners' would appreciate, approval of this modification is likely to lead to incremental mine development, and the Department of Planning and Environment is opposed to a series of incremental increases in open-cut coal mining in the Ben Bullen State Forest.

Manildra (Castlereagh Coal) has made the open-cut proposal small (50ha) while at the same time it has applied for access to coal resources in 1,368 hectares around the proposed mine site. Manildra has been granted coal exploration licences Nos. 8618 and 8619 over much of the Ben Bullen State Forest that is of high conservation value. When the modification is read in this context it is obvious that it is not a different proposal from the proposals previously rejected for this mine site.

Coal from Manildra’s open-cut Invincible mine will be more expensive in terms of overall costs, when the environment is taken into account, than coal from existing operating mines that can meet the requirements of Manildra's Bomaderry plant.

Approving Manildra’s 50 hectare open-cut proposal will impose adverse environmental outcomes upon this outstanding natural area. The true cost of damage to the natural environment cannot be compensated by offsets, contrary to the assertions made by the Department.

The Ben Bullen pagoda landscape is unique, irreplaceable and covers a small area of which the woodlands affected by the proposed Invincible open-cut mining operation is a key part. The modification proposal is a key part of the only area where grassy tableland woodlands adjoin pagodas. This woodland is an integral part of this pagoda landscape and its loss will compromise this beautiful pagoda landscape.

The Planning Assessment Commission correctly observed in 2012 and confirmed 2014 that the pagoda landscape consists of the pagodas and woodlands below
them. The pagoda rock features cannot be considered in isolation from the surrounding woodlands that are proposed to be mined. The buffer debate was part of the previous PAC review and determination that refused consent.

Further, ecosystems cannot be replanted after open-cut mining. The proposed biodiversity offsets do not replace the unique Ben Bullen pagoda landscape. The proposed offsets are irrelevant to conservation of this pagoda landscape.

Please uphold the previous decisions of the PAC. No new evidence or Departmental analysis has come forward that could overturn the last PAC determination. Refuse consent for the proposed Invincible mine, modification 5 as the applicant and Department of Planning and Environment have not provided any basis to overturn the past decision regarding these matters.

The Commission may publish my name, location and this submission. Thank you for the opportunity to comment on this mining proposal.

Coal is a stranded asset, of depreciating value and mining is unnecessary. Develop a solar or wind farm instead.

Yours sincerely,

Vicki Bishop

When the modification is read in this context it is obvious that it is not a different proposal from the proposals previously rejected for this mine site.

Coal from Manildra’s open-cut Invincible mine will be more expensive in terms of overall costs, when the environment is taken into account, than coal from existing operating mines that can meet the requirements of Manildra’s Bomaderry plant.

Approving Manildra’s 50 hectare open-cut proposal will impose adverse environmental outcomes upon this outstanding natural area. The true cost of damage to the natural environment cannot be compensated by offsets, contrary to the assertions made by the Department.

The Ben Bullen pagoda landscape is unique, irreplaceable and covers a small area of which the woodlands affected by the proposed Invincible open-cut mining operation is a key part. The modification proposal is a key part of the only area where grassy tableland woodlands adjoin pagodas. This woodland is an integral part of this pagoda landscape and its loss will compromise this beautiful pagoda landscape.

The Planning Assessment Commission correctly observed in 2012 and confirmed 2014 that the pagoda landscape consists of the pagodas and woodlands below
them. The pagoda rock features cannot be considered in isolation from the surrounding woodlands that are proposed to be mined. The buffer debate was part of the previous PAC review and determination that refused consent.

Further, ecosystems cannot be replanted after open-cut mining. The proposed biodiversity offsets do not replace the unique Ben Bullen pagoda landscape. The proposed offsets are irrelevant to conservation of this pagoda landscape.

Please uphold the previous decisions of the PAC. No new evidence or Departmental analysis has come forward that could overturn the last PAC determination. Refuse consent for the proposed Invincible mine, modification 5 as the applicant and Department of Planning and Environment have not provided any basis to overturn the past decision regarding these matters.

The Commission may publish my name, location and this submission. Thank you for the opportunity to comment on this mining proposal.

Yours sincerely,

Paul Laver

Dear Mr Forward,

Submission Opposing the Department of Planning and Environment recommendation - Invincible Extension Project 07_0127 MOD 5 (D490/17)

I object to the proposed modification of the Invincible coal mine. Open-cut coal mining should not recommence in this sensitive part of the Gardens of Stone region. In October 2014 the Commission said that the “highest and best use of the area is for conservation purposes” and that ruling is not changed by the Department of Planning and Environment's (the Department's) recommendation.

It would be inappropriate to reverse the Commission's 2013 and 2014 decisions that had rejected open-cut mining in this 50 hectare area, as well as other areas of public forest. I strongly oppose this Department's recommendation to expand the open-cut area and continue coal production for eight years. As Commissioners' would appreciate, approval of this modification is likely to lead to incremental mine development, and the Department of Planning and Environment is opposed to a series of incremental increases in open-cut coal mining in the Ben Bullen State Forest.

Manildra (Castlereagh Coal) has made the open-cut proposal small (50ha) while at the same time it has applied for access to coal resources in 1,368 hectares around the proposed mine site. Manildra has been granted coal exploration licences Nos. 8618 and 8619 over much of the Ben Bullen State Forest that is of high conservation value. When the modification is read in this context it is obvious that it is not a different proposal from the proposals previously rejected for this mine site.

Coal from Manildra’s open-cut Invincible mine will be more expensive in terms of overall costs, when the environment is taken into account, than coal from existing operating mines that can meet the requirements of Manildra's Bomaderry plant.

Approving Manildra’s 50 hectare open-cut proposal will impose adverse environmental outcomes upon this outstanding natural area. The true cost of damage to the natural environment cannot be compensated by offsets, contrary to the assertions made by the Department.

The Ben Bullen pagoda landscape is unique, irreplaceable and covers a small area of which the woodlands affected by the proposed Invincible open-cut mining operation is a key part. The modification proposal is a key part of the only area where grassy tableland woodlands adjoin pagodas. This woodland is an integral part of this pagoda landscape and its loss will compromise this beautiful pagoda landscape.

The Planning Assessment Commission correctly observed in 2012 and confirmed 2014 that the pagoda landscape consists of the pagodas and woodlands below
them. The pagoda rock features cannot be considered in isolation from the
surrounding woodlands that are proposed to be mined. The buffer debate was
part of the previous PAC review and determination that refused consent.

Further, ecosystems cannot be replanted after open-cut mining. The proposed
biodiversity offsets do not replace the unique Ben Bullen pagoda landscape.
The proposed offsets are irrelevant to conservation of this pagoda landscape.

Please uphold the previous decisions of the PAC. No new evidence or
Departmental analysis has come forward that could overturn the last PAC
determination. Refuse consent for the proposed Invincible mine, modification
5 as the applicant and Department of Planning and Environment have not
provided any basis to overturn the past decision regarding these matters.

The Commission may publish my name, location and this submission.
Coal is not the way of the future. We must develop renewable energy sources
now. We must protect and preserve our natural environment for future
generations.
Thank you for the opportunity to comment on this mining proposal.

Yours sincerely,

Fabiola Superina

Sydney NSW 2000

Dear Mr Forward,

Submission Opposing the Department of Planning and Environment recommendation
- Invincible Extension Project 07_0127 MOD 5 (D490/17)

I object to the proposed modification of the Invincible coal mine. Open-cut coal mining should not recommence in this sensitive part of the Gardens of Stone region. In October 2014 the Commission said that the “highest and best use of the area is for conservation purposes” and that ruling is not changed by the Department of Planning and Environment's (the Department's) recommendation.

It would be inappropriate to reverse the Commission's 2013 and 2014 decisions that had rejected open-cut mining in this 50 hectare area, as well as other areas of public forest. I strongly oppose this Department's recommendation to expand the open-cut area and continue coal production for eight years. As Commissioners' would appreciate, approval of this modification is likely to lead to incremental mine development, and the Department of Planning and Environment is opposed to a series of incremental increases in open-cut coal mining in the Ben Bullen State Forest.

Manildra (Castlereagh Coal) has made the open-cut proposal small (50ha) while at the same time it has applied for access to coal resources in 1,368 hectares around the proposed mine site. Manildra has been granted coal exploration licences Nos. 8618 and 8619 over much of the Ben Bullen State Forest that is of high conservation value. When the modification is read in this context it is obvious that it is not a different proposal from the proposals previously rejected for this mine site.

Coal from Manildra’s open-cut Invincible mine will be more expensive in terms of overall costs, when the environment is taken into account, than coal from existing operating mines that can meet the requirements of Manildra's Bomaderry plant. Coal does not provide a secure economic investment for future benefits to Australia, unlike this potentially threatened natural resource, the benefits of which will be far more important.

Approving Manildra’s 50 hectare open-cut proposal will impose adverse environmental outcomes upon this outstanding natural area. The true cost of damage to the natural environment cannot be compensated by offsets, contrary to the assertions made by the Department.

The Ben Bullen pagoda landscape is unique, irreplaceable and covers a small area of which the woodlands affected by the proposed Invincible open-cut mining operation is a key part. The modification proposal is a key part of the only area where grassy tableland woodlands adjoin pagodas. This woodland is an integral part of this pagoda landscape and its loss will compromise this beautiful pagoda landscape.
The Planning Assessment Commission correctly observed in 2012 and confirmed 2014 that the pagoda landscape consists of the pagodas and woodlands below them. The pagoda rock features cannot be considered in isolation from the surrounding woodlands that are proposed to be mined. The buffer debate was part of the previous PAC review and determination that refused consent.

Further, ecosystems cannot be replanted after open-cut mining. The proposed biodiversity offsets do not replace the unique Ben Bullen pagoda landscape. The proposed offsets are irrelevant to conservation of this pagoda landscape.

Please uphold the previous decisions of the PAC. No new evidence or Departmental analysis has come forward that could overturn the last PAC determination. Refuse consent for the proposed Invincible mine, modification 5 as the applicant and Department of Planning and Environment have not provided any basis to overturn the past decision regarding these matters.

The Commission may publish my name, location and this submission. Thank you for the opportunity to comment on this mining proposal. Coal is a short term proposition which does not reflect the trend toward sustainable energy supply. Will history perceive our nation as being shortsighted and ignorant in the face of progressive others? Decisions to preserve our natural assets will define how future generations and History will remember our generation...

Yours sincerely,

Ian Richardson

Dear Mr Forward,

Submission Opposing the Department of Planning and Environment recommendation - Invincible Extension Project 07_0127 MOD 5 (D490/17)

I object to the proposed modification of the Invincible coal mine. Open-cut coal mining should not recommence in this sensitive part of the Gardens of Stone region. In October 2014 the Commission said that the “highest and best use of the area is for conservation purposes” and that ruling is not changed by the Department of Planning and Environment's (the Department's) recommendation.

It would be inappropriate to reverse the Commission's 2013 and 2014 decisions that had rejected open-cut mining in this 50 hectare area, as well as other areas of public forest. I strongly oppose this Department's recommendation to expand the open-cut area and continue coal production for eight years. As Commissioners' would appreciate, approval of this modification is likely to lead to incremental mine development, and the Department of Planning and Environment is opposed to a series of incremental increases in open-cut coal mining in the Ben Bullen State Forest.

Manildra (Castlereagh Coal) has made the open-cut proposal small (50ha) while at the same time it has applied for access to coal resources in 1,368 hectares around the proposed mine site. Manildra has been granted coal exploration licences Nos. 8618 and 8619 over much of the Ben Bullen State Forest that is of high conservation value. When the modification is read in this context it is obvious that it is not a different proposal from the proposals previously rejected for this mine site.

Coal from Manildra’s open-cut Invincible mine will be more expensive in terms of overall costs, when the environment is taken into account, than coal from existing operating mines that can meet the requirements of Manildra's Bomaderry plant.

Approving Manildra’s 50 hectare open-cut proposal will impose adverse environmental outcomes upon this outstanding natural area. The true cost of damage to the natural environment cannot be compensated by offsets, contrary to the assertions made by the Department.

The Ben Bullen pagoda landscape is unique, irreplaceable and covers a small area of which the woodlands affected by the proposed Invincible open-cut mining operation is a key part. The modification proposal is a key part of the only area where grassy tableland woodlands adjoin pagodas. This woodland is an integral part of this pagoda landscape and its loss will compromise this beautiful pagoda landscape.

The Planning Assessment Commission correctly observed in 2012 and confirmed 2014 that the pagoda landscape consists of the pagodas and woodlands below
them. The pagoda rock features cannot be considered in isolation from the surrounding woodlands that are proposed to be mined. The buffer debate was part of the previous PAC review and determination that refused consent.

Further, ecosystems cannot be replanted after open-cut mining. The proposed biodiversity offsets do not replace the unique Ben Bullen pagoda landscape. The proposed offsets are irrelevant to conservation of this pagoda landscape.

Please uphold the previous decisions of the PAC. No new evidence or Departmental analysis has come forward that could overturn the last PAC determination. Refuse consent for the proposed Invincible mine, modification 5 as the applicant and Department of Planning and Environment have not provided any basis to overturn the past decision regarding these matters.

The Commission may publish my name, location and this submission. Thank you for the opportunity to comment on this mining proposal.

Yours sincerely,
Richard Jones
PS This is totally unthinkable

Coal from Manildra’s open-cut Invincible mine will be more expensive in terms of overall costs, when the environment is taken into account, than coal from existing operating mines that can meet the requirements of Manildra's Bomaderry plant.

Approving Manildra’s 50 hectare open-cut proposal will impose adverse environmental outcomes upon this outstanding natural area. The true cost of damage to the natural environment cannot be compensated by offsets, contrary to the assertions made by the Department.

The Ben Bullen pagoda landscape is unique, irreplaceable and covers a small area of which the woodlands affected by the proposed Invincible open-cut mining operation is a key part. The modification proposal is a key part of the only area where grassy tableland woodlands adjoin pagodas. This woodland is an integral part of this pagoda landscape and its loss will compromise this beautiful pagoda landscape.

The Planning Assessment Commission correctly observed in 2012 and confirmed 2014 that the pagoda landscape consists of the pagodas and woodlands below...
them. The pagoda rock features cannot be considered in isolation from the surrounding woodlands that are proposed to be mined. The buffer debate was part of the previous PAC review and determination that refused consent.

Further, ecosystems cannot be replanted after open-cut mining. The proposed biodiversity offsets do not replace the unique Ben Bullen pagoda landscape. The proposed offsets are irrelevant to conservation of this pagoda landscape.

Please uphold the previous decisions of the PAC. No new evidence or Departmental analysis has come forward that could overturn the last PAC determination. Refuse consent for the proposed Invincible mine, modification 5 as the applicant and Department of Planning and Environment have not provided any basis to overturn the past decision regarding these matters.

The Commission may publish my name, location and this submission. Thank you for the opportunity to comment on this mining proposal.

Yours sincerely,

Mr Matthew Skellett RN

Dear Mr Forward,

Submission Opposing the Department of Planning and Environment recommendation  
- Invincible Extension Project 07_0127 MOD 5 (D490/17)

Mining is a technology of the past. We need to focus on renewable policy and  
work toward protecting our environment for future generations.

I object to the proposed modification of the Invincible coal mine. Open-cut  
coal mining should not recommence in this sensitive part of the Gardens of  
Stone region. In October 2014 the Commission said that the “highest and  
best use of the area is for conservation purposes” and that ruling is not  
changed by the Department of Planning and Environment's (the Department's)  
recommendation.

It would be inappropriate to reverse the Commission's 2013 and 2014 decisions  
that had rejected open-cut mining in this 50 hectare area, as well as other  
areas of public forest. I strongly oppose this Department's recommendation to  
expand the open-cut area and continue coal production for eight years. As  
Commissioners' would appreciate, approval of this modification is likely to  
lead to incremental mine development, and the Department of Planning and  
Environment is opposed to a series of incremental increases in open-cut coal  
mining in the Ben Bullen State Forest.

Manildra (Castlereagh Coal) has made the open-cut proposal small (50ha) while  
at the same time it has applied for access to coal resources in 1,368  
hectares around the proposed mine site. Manildra has been granted coal  
exploration licences Nos. 8618 and 8619 over much of the Ben Bullen State  
Forest that is of high conservation value. When the modification is read in  
this context it is obvious that it is not a different proposal from the  
proposals previously rejected for this mine site.

Coal from Manildra’s open-cut Invincible mine will be more expensive in  
terms of overall costs, when the environment is taken into account, than coal  
from existing operating mines that can meet the requirements of Manildra's  
Bomaderry plant.

Approving Manildra’s 50 hectare open-cut proposal will impose adverse  
environmental outcomes upon this outstanding natural area. The true cost of  
damage to the natural environment cannot be compensated by offsets, contrary  
to the assertions made by the Department.

The Ben Bullen pagoda landscape is unique, irreplaceable and covers a small  
area of which the woodlands affected by the proposed Invincible open-cut  
mining operation is a key part. The modification proposal is a key part of  
the only area where grassy tableland woodlands adjoin pagodas. This woodland  
is an integral part of this pagoda landscape and its loss will compromise  
this beautiful pagoda landscape.
The Planning Assessment Commission correctly observed in 2012 and confirmed 2014 that the pagoda landscape consists of the pagodas and woodlands below them. The pagoda rock features cannot be considered in isolation from the surrounding woodlands that are proposed to be mined. The buffer debate was part of the previous PAC review and determination that refused consent.

Further, ecosystems cannot be replanted after open-cut mining. The proposed biodiversity offsets do not replace the unique Ben Bullen pagoda landscape. The proposed offsets are irrelevant to conservation of this pagoda landscape.

Please uphold the previous decisions of the PAC. No new evidence or Departmental analysis has come forward that could overturn the last PAC determination. Refuse consent for the proposed Invincible mine, modification 5 as the applicant and Department of Planning and Environment have not provided any basis to overturn the past decision regarding these matters.

The Commission may publish my name, location and this submission. Thank you for the opportunity to comment on this mining proposal.

Dear Mr Forward,

Submission Opposing the Department of Planning and Environment recommendation  
- Invincible Extension Project 07_0127 MOD 5 (D490/17)

It’s time to do the right thing by this great country of ours, our kids and 
the environment, having witnessed the damage coal mines do around Australian 
we do not need this one to be allowed to operate in this area

I object to the proposed modification of the Invincible coal mine. Open-cut 
coal mining should not recommence in this sensitive part of the Gardens of 
Stone region. In October 2014 the Commission said that the “highest and 
best use of the area is for conservation purposes” and that ruling is not 
changed by the Department of Planning and Environment's (the Department's) 
recommendation.

It would be inappropriate to reverse the Commission's 2013 and 2014 decisions 
that had rejected open-cut mining in this 50 hectare area, as well as other 
areas of public forest. I strongly oppose this Department's recommendation to 
expand the open-cut area and continue coal production for eight years. As 
Commissioners' would appreciate, approval of this modification is likely to 
lead to incremental mine development, and the Department of Planning and 
Environment is opposed to a series of incremental increases in open-cut coal 
mining in the Ben Bullen State Forest.

Manildra (Castlereagh Coal) has made the open-cut proposal small (50ha) while 
at the same time it has applied for access to coal resources in 1,368 
hectares around the proposed mine site. Manildra has been granted coal 
exploration licences Nos. 8618 and 8619 over much of the Ben Bullen State 
Forest that is of high conservation value. When the modification is read in 
this context it is obvious that it is not a different proposal from the 
proposals previously rejected for this mine site.

Coal from Manildra’s open-cut Invincible mine will be more expensive in 
terms of overall costs, when the environment is taken into account, than coal 
from existing operating mines that can meet the requirements of Manildra's 
Bomaderry plant.

Approving Manildra’s 50 hectare open-cut proposal will impose adverse 
environmental outcomes upon this outstanding natural area. The true cost of 
damage to the natural environment cannot be compensated by offsets, contrary 
to the assertions made by the Department.

The Ben Bullen pagoda landscape is unique, irreplaceable and covers a small 
area of which the woodlands affected by the proposed Invincible open-cut 
milling operation is a key part. The modification proposal is a key part of 
the only area where grassy tableland woodlands adjoin pagodas. This woodland 
is an integral part of this pagoda landscape and its loss will compromise
this beautiful pagoda landscape.

The Planning Assessment Commission correctly observed in 2012 and confirmed 2014 that the pagoda landscape consists of the pagodas and woodlands below them. The pagoda rock features cannot be considered in isolation from the surrounding woodlands that are proposed to be mined. The buffer debate was part of the previous PAC review and determination that refused consent.

Further, ecosystems cannot be replanted after open-cut mining. The proposed biodiversity offsets do not replace the unique Ben Bullen pagoda landscape. The proposed offsets are irrelevant to conservation of this pagoda landscape.

Please uphold the previous decisions of the PAC. No new evidence or Departmental analysis has come forward that could overturn the last PAC determination. Refuse consent for the proposed Invincible mine, modification 5 as the applicant and Department of Planning and Environment have not provided any basis to overturn the past decision regarding these matters.

Sydney NSW 2000

Dear Mr Forward,

Submission Opposing the Department of Planning and Environment recommendation
- Invincible Extension Project 07_0127 MOD 5 (D490/17)

I object most strongly to the proposed modification of the Invincible coal mine. Open-cut coal mining should be stopped at all cost anywhere near the Garden of Stones Region let alone in this sensitive part of the Gardens of Stone region. In October 2014 the Commission said that the “highest and best use of the area is for conservation purposes” and that ruling is not changed by the Department of Planning and Environment's (the Department's) recommendation.

It would not only be inappropriate to reverse the Commission's 2013 and 2014 decisions that had rejected open-cut mining in this 50 hectare area, as well as other areas of public forest, it would be a criminal act of environmental destruction. I strongly oppose this Department's recommendation to expand the open-cut area and continue coal production for eight years. As Commissioners' would appreciate, the approval of this modification would set a precedent that would then allow incremental mine development, and the Department of Planning and Environment is opposed to a series of incremental increases in open-cut coal mining in the Ben Bullen State Forest. There are already proposals to expand the mine over a very large area which will create a massive area of environmental destruction.

Manildra (Castlereagh Coal) has made the open-cut proposal small (50ha) while at the same time it has applied for access to coal resources in 1,368 hectares around the proposed mine site. Manildra has been granted coal exploration licences Nos. 8618 and 8619 over much of the Ben Bullen State Forest that is of high conservation value. When the modification is read in this context it is obvious that it is not a different proposal from the proposals previously rejected for this mine site.

Coal from Manildra’s open-cut Invincible mine will be more expensive in terms of overall costs, when the environment is taken into account, than coal from existing operating mines that can meet the requirements of Manildra's Bomaderry plant.

Approving Manildra’s 50 hectare open-cut proposal will impose adverse environmental outcomes upon this outstanding natural area. The true cost of damage to the natural environment cannot be compensated by offsets, contrary to the assertions made by the Department.

The Ben Bullen pagoda landscape is unique, irreplaceable and covers a small area of which the woodlands affected by the proposed Invincible open-cut mining operation is a key part. The modification proposal is a key part of the only area where grassy tableland woodlands adjoin pagodas. This woodland is an integral part of this pagoda landscape and its loss will compromise
this beautiful pagoda landscape.

The Planning Assessment Commission correctly observed in 2012 and confirmed 2014 that the pagoda landscape consists of the pagodas and woodlands below them. The pagoda rock features cannot be considered in isolation from the surrounding woodlands that are proposed to be mined. The buffer debate was part of the previous PAC review and determination that refused consent.

Further, ecosystems cannot be replanted after open-cut mining. The proposed biodiversity offsets do not replace the unique Ben Bullen pagoda landscape. The proposed offsets are irrelevant to conservation of this pagoda landscape.

Please uphold the previous decisions of the PAC. No new evidence or Departmental analysis has come forward that could overturn the last PAC determination. Refuse Consent for the proposed Invincible mine modification 5 as the applicant and Department of Planning and Environment have not provided any basis to overturn the past decision regarding these matters.

It is time that the Department of Planning and Environment actually protected the Environment they are charged to protect. The Commission may publish my name, location and this submission. Thank you for the opportunity to comment on this mining proposal.

Yours sincerely,
Cate Warren
Mr Paul Forward

The modification proposal is a key part of the only area where grassy tableland woodlands adjoin pagodas. This woodland is an integral part of this pagoda landscape and its loss will compromise this beautiful pagoda landscape.

The Planning Assessment Commission correctly observed in 2012 and confirmed 2014 that the pagoda landscape consists of the pagodas and woodlands below
them. The pagoda rock features cannot be considered in isolation from the
surrounding woodlands that are proposed to be mined. The buffer debate was
part of the previous PAC review and determination that refused consent.

Further, ecosystems cannot be replanted after open-cut mining. The proposed
biodiversity offsets do not replace the unique Ben Bullen pagoda landscape.
The proposed offsets are irrelevant to conservation of this pagoda landscape.

Please uphold the previous decisions of the PAC. No new evidence or
Departmental analysis has come forward that could overturn the last PAC
determination. Refuse consent for the proposed Invincible mine, modification
5 as the applicant and Department of Planning and Environment have not
provided any basis to overturn the past decision regarding these matters.

The Commission may publish my name, location and this submission. Thank you
for the opportunity to comment on this mining proposal.

Yours sincerely,

Rick Kilpatrick

Mr Paul Forward  
Chairperson  
Planning Assessment Commission  
Level 3, 201 Elizabeth Street  
Sydney NSW 2000

Dear Mr Forward,

Submission Opposing the Department of Planning and Environment recommendation - Invincible Extension Project 07_0127 MOD 5 (D490/17)

I object to the proposed modification of the Invincible coal mine. Open-cut coal mining should not recommence in this sensitive part of the Gardens of Stone region. In October 2014 the Commission said that the “highest and best use of the area is for conservation purposes” and that ruling is not changed by the Department of Planning and Environment's (the Department's) recommendation.

It would be inappropriate to reverse the Commission's 2013 and 2014 decisions that had rejected open-cut mining in this 50 hectare area, as well as other areas of public forest. I strongly oppose this Department's recommendation to expand the open-cut area and continue coal production for eight years. As Commissioners' would appreciate, approval of this modification is likely to lead to incremental mine development, and the Department of Planning and Environment is opposed to a series of incremental increases in open-cut coal mining in the Ben Bullen State Forest.

Manildra (Castlereagh Coal) has made the open-cut proposal small (50ha) while at the same time it has applied for access to coal resources in 1,368 hectares around the proposed mine site. Manildra has been granted coal exploration licences Nos. 8618 and 8619 over much of the Ben Bullen State Forest that is of high conservation value. When the modification is read in this context it is obvious that it is not a different proposal from the proposals previously rejected for this mine site.

Coal from Manildra’s open-cut Invincible mine will be more expensive in terms of overall costs, when the environment is taken into account, than coal from existing operating mines that can meet the requirements of Manildra's Bomaderry plant.

Approving Manildra’s 50 hectare open-cut proposal will impose adverse environmental outcomes upon this outstanding natural area. The true cost of damage to the natural environment cannot be compensated by offsets, contrary to the assertions made by the Department.

The Ben Bullen pagoda landscape is unique, irreplaceable and covers a small area of which the woodlands affected by the proposed Invincible open-cut mining operation is a key part. The modification proposal is a key part of the only area where grassy tableland woodlands adjoin pagodas. This woodland is an integral part of this pagoda landscape and its loss will compromise this beautiful pagoda landscape.

The Planning Assessment Commission correctly observed in 2012 and confirmed 2014 that the pagoda landscape consists of the pagodas and woodlands below
them. The pagoda rock features cannot be considered in isolation from the surrounding woodlands that are proposed to be mined. The buffer debate was part of the previous PAC review and determination that refused consent.

Further, ecosystems cannot be replanted after open-cut mining. The proposed biodiversity offsets do not replace the unique Ben Bullen pagoda landscape. The proposed offsets are irrelevant to conservation of this pagoda landscape.

Please uphold the previous decisions of the PAC. No new evidence or Departmental analysis has come forward that could overturn the last PAC determination. Refuse consent for the proposed Invincible mine, modification 5 as the applicant and Department of Planning and Environment have not provided any basis to overturn the past decision regarding these matters.

The Commission may publish my name, location and this submission. Thank you for the opportunity to comment on this mining proposal.

Yours sincerely,

Linda Campbell
